

How Is Your Cold?

Every place you go you hear the same question asked.

Do you know that there is nothing so dangerous as a neglected cold?

Do you know that a neglected cold will turn into Chronic Bronchitis, Pneumonia, disgusting Catarrh and the most deadly of all, the "White Plague," Consumption.

Many a life history would read different if, on the first appearance of a cough, it had been remedied with

Dr. Wood's Norway Pine Syrup

This wonderful cough and cold medicine contains all those very pine principles which make the pine woods so valuable in the treatment of lung affections.

Combined with this are Wild Cherry Bark and the soothing, healing and expectorant properties of other pectoral herbs and barks.

For Coughs, Colds, Bronchitis, Pain in the Chest, Asthma, Croup, Whooping Cough, Hoarseness or any affection of the Throat or Lungs. You will find a sure cure in Dr. Wood's Norway Pine Syrup.

Mrs. C. N. Loomer, Berwick, N.S., writes: "I have used Dr. Wood's Norway Pine Syrup for coughs and colds, and have always found it to give instant relief. I also recommended it to one of my neighbors and she was more that pleased with the results."

Dr. Wood's Norway Pine Syrup 25 cts. per bottle at all dealers. Put up in yellow wrapper, and three gold stars the trade mark. Refuse substitutes. There is only one Norway Pine Syrup and that one is Dr. Wood's.

LARGE ENGLISH YORKSHIRES

Pigs of the most improved type of both sexes all ages, for sale at all times. We have more imported animals in our herd than all other breeders in Canada combined. We won more first prizes at the large shows this year than all other breeders combined. We won every first but one and all silver medals and Bacon prizes at Toronto and London, and at St. Louis we furnished all the first-prize hogs in the breeding classes except two; also supplied both champion and grand champions. Prices reasonable.

D. C. FLATT & SON, Millgrove, Ont.

For Sale—Ohio Improved Chester Whites, the largest strain, oldest established registered herd in Canada; young sows in farrow; choice young pigs, six weeks to six months old; pairs not skinned; express charges prepaid; pedigrees and safe delivery guaranteed. Address: E. G. GEOFFREY, Putnam, Ont.

AND THEY WONDERED.

At a banquet, held in a room the walls of which were adorned with many beautiful paintings, a well-known college president was called upon to respond to a toast. In the course of his remarks, wishing to pay a compliment to the ladies present, and designating the paintings with one of his characteristic gestures, he said: "What need is there of these painted beauties when we have so many with us at this table?"

QUESTIONS AND ANSWERS. Miscellaneous.

RE DRIPPING CHIMNEY.

Editor "The Farmer's Advocate":

Have seen several enquiries in "The Farmer's Advocate" lately re the drip from house chimneys. In the fall of 1905, I purchased an air-tight heater, and, after about three months' use, the chimney began dripping, and now the chimney is nearly spoiled. The drip is nearly continuous, and smoke issues through at times. This chimney gave us no trouble formerly. The chimney to the cooking stove or range, under the same conditions, does not drip at all; plenty of air, which cannot be given in the air-tight or hot-blast.

EXPERIENCE.

[Note.—See answers re this difficulty by Mr. Day in this issue.]

DOSE OF BELLADONNA.

I always read your answers to questions in the "Veterinary" department with interest, as they are instructive and helpful in many respects. Upon looking them over this morning, I find that you must have made a mistake in the answer to question 5, "Miscellaneous," on page 100, January 16th issue. The quantity of belladonna would be about eight times too much, I would think. Perhaps it is a typographical error, but everyone wouldn't know, so I thought I would write these few lines, as you always want communications that would be of interest to your readers. Hoping this will not be trespassing on your good nature.

M. W. S.

[Note.—We are always pleased to have readers call our attention to possible errors. Mistakes will occur in spite of the greatest care. In this case, however, the prescription was correctly given. Our friend will observe, on consulting the formula, that it was fluid extract of belladonna that was recommended. The standard dose of this extract for the horse or ox is 1 to 2 fluid ounces. Of the solid extract, the dose for the horse is given in veterinary works as 1 to 2 drams. Doubtless, it was the dose of the solid extract that our correspondent had in mind.—Editor.]

STOCK FOR 100-ACRE FARM—FARM HORSES.

1. In your opinion, how many head of cattle, etc., should the average 100-acre farm in this county carry?
2. Would the following be too many: 5 horses, 2 two-year-old colts, 3 yearlings, 12 cows, 4 heifers, 6 calves, 2 feeders, 6 sheep and produce to be sold as yearlings, 1 ram, 2 brood sows and 200 hens? Feed and sell about twenty fat pigs a year; milk all used for butter; good silo.
3. How would you crop the farm, that is, how many acres pasture, hay, oats, etc., would be required to feed the stock, supposing an average crop year and farm?
4. Would there be a surplus of any product, that is, hay or grain, left for sale?
5. What are the main objections to the Percheron horse, are they not better or more suitable farm horses than the Clydesdale or Shire?
6. Are Suffolk Punches not more suitable than the Clydesdale or Shire?

C. L. B.

Ans.—1. One mature animal for each three acres would be very fair. Some specialists, by extra manuring and growing soiling crops have been able to increase the number of stock kept to two head per acre.

2. Rather too many, unless silage or other soiling crop were fed in the fall months.

3. Forty to fifty acres pasture, sixteen of hay, eight of corn, and twenty-four acres of oats and barley.

4. Not likely. That would depend on how stock was fed in winter.

5 and 6. Any of the breeds named make good farm horses. It is largely a matter of personal fancy or choice, and of the demand and market prices obtainable. We know of no valid objection to either the Percheron or the Suffolk Punch as farm horses. They are easily kept, strong, healthy, as free from unsoundness as any, and have excellent dispositions.

Elmhurst Berkshires

We have a number of choice young boars ready for service. Some imported, others imported in dam—also from imp. sire and dam—which we will price right for quick sale. Write us for what you want.

H. M. VANDERLIP,
