

DR. WILLIAMS' FLY AND INSECT DESTROYER

Destroys all fly pests—will certainly keep flies off all kinds of stock. The cows give more milk. The best disinfe tant for stables, hogpens and poultry houses. Spray your workhorses and not a fly will come near them. Guaranteed or money refunded. The best preparation in the world for keeping flies off stock. Put up in quart cans at 35c.; ½-gals, at 65c.; 1-gal. at \$1.00.

Don, Aug. 6th, 1910. Gentlemen,—We have used Dr. Williams Fly Destroyer on our herd of Jerseys for some years, and find it the most satisfactory preparation we have ever used, because it does certainly keep flies off.

D. DUNCAN & SON, Breeders and Importers of Thoroughbred Jerseys, Don, Ont.

Islington, Sept. 4, 1910. Gentlemen,—I cannot say too much in favor of Dr. Williams' Fly and Insect Destroyer. I think it is the best preparation in the world for keeping flies off stock. It is also a splendid preparation for killing lice on cattle in winter. J. B. WOLFE, Islington.

Britannia, Sept. 9, 1910. Gentlemen,—Dr. Williams' Fly and Insect Destroyer is the best preparation we have ever used for keeping flies off stock. F.ies simply cannot live where it is used. All farmers in our locality use and recommend it.

GRAFTING WAX

What is grafting wax composed of? B. T. How is it made? Ans.—See answer to "Old Subscriber," page 820, issue May 4th.

PASTURE FOR HILLY LAND.

Please inform us as to best mixture of seed to sow on dry, hilly land, for permanent pasture.

Ans.-Prof. C. A. Zavitz recommends for high, dry land as a seeding for permanent pasture: Orchard grass, 5 lbs.; meadow fescue, 5 lbs.; tall oat grass, 2 lbs.; meadow foxtail, 2 lbs.; alfalfa, 5 lbs.; white clover, 3 lbs.; red clover, 1 lb., per acre. Prof. Zavitz advises not to pasture too closely, or there will be poor results from all the grasses, and killing out of the alfalfa plants. If making any change in the above mixture, we would increase the proportion of

NATURAL GAS IN CANADA

What districts of Ontario, and of other Provinces, if any, enjoy the use of natural W. H. M.

Ans.-Natural gas is found in the eastern part of Essex and southern part of Kent Counties, Ont., and is piped to such towns as Windsor, Sarnia and Chatham. It is also found in the eastern part of Elgin, Norfolk, Haldimand and Welland Counties. Most of the towns and villages of the last three counties are utilizing the gas, and it is piped to outside counties, and is wsed in such towns as Brantford, Paris, Galt, Dundas and Toronto, and by farmers located along the pipe lines. In Alberta, natural gas is being used in the following towns: Suffield, Bassano, Medicine Hat, Bow Island, Wetaskiwin and Calgary. It is expected that the town of Moncton, N. B., will shortly be supplied with natural gas piped from the wells on the Petitcodiac river, about eleven miles south of the

WHITEWASH FOR STABLE.

How can I make a good solution for whitewashing stable, same to be applied with spray-pump?

Ans.—The very best whitewash for stable is simply to use lime, slaking it with water, and afterwards diluting it to the proper consistency for use in the spray pump. Lime is a germ destroyer, and a wonderful sweetener of foul places.

If you wish for something that will not rub off easily, what is known as the "White House" whitewash would be satisfactory. The formula has been given repeatedly in this column, but here it is again: Half a bushel of unslaked lime. Slake with hot water; cover it during the liquid through a fine sieve, add a peck of salt previously dissolved in warm water, three pounds of ground rice boiled to a thin paste and stir in boiling hot, and a pound of glue which has previously been dissolved over a slow fire, and add five gallons of hot water to the mixture. Stir well, and let it stand for a few days covered up from the dirt. It should be put on hot.

MITES ON HENS,

What will kill mites on hens? Hens are in good condition; have been laying well, but the sitters leave their eggs when they are nearly hatched on account of these pests. I have noticed the insects on the eggs. Feed hens principally on oats and barley, give them some wheat, and an occasional feed of soft food. They are running at large.

A SUBSCRIBER. Ans.-Mites subsist on the blood of the fowls, but are not usually found on the bodies of the bird, except when at roost or on the nest. During the day they inhabit cracks and crevices of the walls,

osts and nests. Sitting hens are often annoved that they are compelled to the nests in order to relieve themof these parasites. When it is not cable to funigate the house with times of burning sulphur, the best to use kerosene freely about the walls of the y be sprayed, the operation befour days for the Dust the basis thoroughly, -- is with in-

Only one milk-pail will do the two operations at on time, and do them right. You can milk in the sam way you always do, and at the same time positively keep the dirt from coming into contact with the mill in any way by using the

STERILAC SANITARY PAIL

Look at the illustration at the left. All falling dirt is caught on the raised dirt shelf. The milk passes directly through the strainer, and only the pure, sweet milk as drawn from the cow goes into the pail. Price \$2.50. Get our catalogue

Purity Milk Cooler-Aerator

really does cool the milk better and faster than any other. The simple construction makes it easy to clean and the corrugated surface keeps the milk flowing slowly, making certain of perfect cooling. The top is removable, so that ice may be put in the cooling drum. Any medium may be used as a cooler—either running water, well or spring water. The price is only \$6.50, and the cooler will pay for itself in time saved and in better quality of product. Write to-day for our catalogue showing a full line of Dairy Supplies.
