**Maple Grove YORKSHIRES--200 head**

Are as good as the best, because they combine the bloods of the following noted sires:—M. C. Champion 20102, Champion boar at Toronto, 1906; S. H. Jack, Imp. 28515, Champion boar at Toronto, 1908, 1909, 1910; and S. H. Romeo 27th, 24653, certainly the best sire we ever owned, and a grand large individual.

Our Brood sows, in view of the above, could not but be of a very high class, combining great size, true type, and easy-feeding qualities.

Our present offering—25 sows, bred and ready to breed—a grand lot. Sows and boars, from six weeks old, up to six months. Write us or come and see for yourself. All stock shipped on approval. Satisfaction guaranteed.

Questions and Answers. Miscellaneous.

**Maple Disease.**

I would like to ask if there is any remedy for maple scale in a woods which is practically "forest primeval"?

J. H. T.

Ans.—We do not think you could profitably treat the disease.

**Silage.**

I noticed in your paper of April 23rd, an inquiry regarding a silo 16 feet in height. To this I would say, the inquirer need not be afraid to try a 16-foot silo. There have been several silos in this part with not more than that depth of corn in them, and no weight on top, and the corn kept well. If 16 feet of corn would not keep in a silo, why would the top 16 feet keep in any silo? He had better make his silo 12 feet across, or it will not hold enough for 15 head of cattle. Have the silo built close, the corn not too dry, and cut fine, and it will keep.

JOS. G. CRICH,  
Huron Co., Ont.

**Discharging Man.**

If A hires a man for a term of six or seven months at a stated wage per month, and after a couple of months A becomes dissatisfied with him, can A discharge him, and upon what notice?

W. K.

Ans.—If the man is purposely slighting his work, and is not trying to do what is right, he may be discharged. It would be better, however, to speak to him first and give him due warning. He, of course, cannot be turned away without just and sufficient reason.

**Salt Petre—Oil Cake.**

1. What is the difference between salt-petre and nitrate of potassium? Is it safe to give in-foal mare, due in six weeks, and which has been overheated in working?

2. Has oil-cake meal as much feeding value to milk cows and fattening cattle as turnips or mangels? What amount should be fed to cattle? I have not a very good cellar to keep roots, and I don't want to pit any.

J. H.

Ans.—1. Salt-petre is potassium nitrate. Would not advise giving drugs to a pregnant mare unless absolutely necessary.

2. Oil-cake meal is a rich concentrate, several times as rich in feeding value as roots. In commencing feeding it, give only in small quantities with other feed, and increase to from two to three pounds daily, according to size of animal and other feed given. Oil cake should not be fed to take the place of rough feeds, like roots or silage.

**Turkey Picks Foot.**

Two years ago a young turkey had a sore foot between the toes. It seemed to be itchy, as it kept picking at it till it bled. I put sulphur and lard on, and it got better. Last spring a two-year-old hen turkey took the same thing, so far as I could see, and the sulphur cured her. This spring, the same hen turkey took it again, only worse, and it swelled in the joint of the foot. She was very lame. The sulphur and lard did not cure her so quickly this time. The turkey appeared all right otherwise; could eat, and laid just the same. Would like to know what it is, and the cause of it; also, could you give me a better cure than the lard and sulphur?

M. Q. F.

Ans.—This does not appear to be a contagious disease. It may be a habit of the turkey, as we have heard of fowling such a habit from picking wherever blood showed. Your treatment seems to be quite effective, and we can suggest no better. Keep the birds in a clean place when housed, so that there will be no danger from filth, and keep them free of lice to prevent any pecking.

Roofing Information

THE days of hand-made wood shingles, such as our grandfathers used, are past. To produce such shingles to-day would cost far more than the best galvanized steel shingles. The ordinary sawn shingles of to-day are a miserable substitute. Their lifetime is short because the rough surface holds water like a sponge and collects chaff and decaying vegetable matter which quickly rots the wood.

**Galt Steel Shingles** make the best and most durable roofing you can buy. They have special patented features possessed by no other steel shingles on the market.

Write to-day for literature and valuable information, which may save you hundreds of dollars. Simply write the word "Roofing" on a postcard, together with your name and address.
