

Put Your Feet in a Pair at Our Risk! STEEL SHOES

Will Surprise and Delight You With Their Lightness, Neatness and Comfort Their Almost Unbelievable Durability

We want you to slip your feet into a pair of Steel Shoes—to FEEL and SEE and KNOW how much LIGHTER, NEATER, STRONGER, more COMFORTABLE they are than any other work shoes in existence. Hence we are making this special FREE EXAMINATION OFFER, merely asking a deposit of the price, while you are "sizing up" the shoes. If they fail to convince you IMMEDIATELY you can notify us to send for them at our expense and we will refund your money.

MUST SELL THEMSELVES
We ask no favors for Steel Shoes. Compare them with the best all-leather work shoes you can find. Give them the most rigid inspection inside and out. Let them tell their own story. It's no sale unless, of your own accord, you decide that you must have them.

Better than the Best All-Leather Work Shoes
Steel shoes are the strongest and easiest working shoes made.

There's more good wear in one pair of Steel Shoes than in three to six pairs of the best all-leather work shoes. The leather is waterproof. The Steel Soles are wear-proof and rust-resistant.

They are lighter than all-leather work shoes. Need no breaking in. Comfortable from the first moment you put them on.

Impossible to get out of shape. They keep the feet dry. They retain their flexibility in spite of mud, slush or water. They cure corns and bunions, prevent colds and rheumatism—save doctors' bills and medicines.

Thousands of Farmers Shout Their Praises
The enthusiasm of users knows no bounds. People can't say enough for their comfort, economy, lightness and astonishing durability. The introduction of Steel Shoes in a neighborhood always arouses such interest that an avalanche of orders follows.

Here is the way Steel Shoes are made: The uppers are made of a superior quality of leather, as waterproof as leather can be tanned. Wonderfully soft and pliable—never gets stiff. The soles and sides are made out of one piece of special light, thin, springy, rust-resisting Steel. Soles and heels are studded with adjustable Steel Rivets, which prevent the bottoms from wearing out. Rivets easily replaced when partly worn. 50 extra rivets cost only 30 cents and should keep the shoes in good repair for at least two years! No other repairs ever needed! The uppers are tightly joined to the steel by small rivets of rust-resisting metal, so that no water can get between.

The soles are lined with soft, springy, comfortable Hair Cushions which absorb perspiration and odors and add to ease of walking. 47

OUR THREE GREAT FACTORIES in Racine, Toronto and Northampton, England, Almost Overwhelmed by the World-wide Demand

The success of Steel Shoes is almost startling. Within three years we have established Steel Shoe factories in Racine, Wis.; Toronto, Canada, and Northampton, England. These great factories, running at full capacity, can scarcely keep up with the demand from all over the world. The public is rapidly learning that Steel Shoes are

**Good for the Feet!
Good for the Health!
Good for the Bank Account!**

These shoes are better for the feet, better for the health, better for the pocketbook than heavy work shoes or rubber boots.

You Actually Save \$5 to \$10 a Year

by wearing Steel Shoes. Figure it out for yourself. One pair will outlast 3 to 6 pairs of ordinary work shoes. They save all repair bills and keep your feet in perfect condition.

Free Examination
And Your Money Back Promptly if It Looks Better Than the Shoes

You owe it to yourself to investigate. Get a pair of Steel Shoes for Free Examination by sending the price, which will be returned if you and your own feet are not convinced of their merits.

Why Wait? Send Now!

No risk! No bother! No obligation! Don't hesitate! Act while this offer is open! Simply state size of shoe you wear. Enclose the price and get the shoes for Free Examination.

For general field work we strongly recommend our 6-inch high Steel Shoes at \$3.50 per pair, or the 9-inch at \$5.00 per pair. For all classes of use requiring high-cut shoes our 12 to 16-inch high Steel Shoes are absolutely indispensable. Shoes can be returned at once if not O. K. and the money will be refunded.

WEAK MEN THIS BELT IS FREE UNTIL YOU ARE CURED

Take my Electric Belt for what it will do for you. Wear it while you sleep at night or while you are resting after your work. You will find it a vitalizer, a tonic to your nerves, a rejuvenator of waning vitality. Use it for any ailment which drugs have failed to cure, and you will never cease praising it.

I claim that I can cure weak men; that I can pump new life into worn-out bodies; that I can cure your pains and aches, limber up your joints and make you feel as frisky and vigorous as you ever did in your life. That's claiming a good deal, but I have got a good remedy and know it well enough to take all the risk if you will pay me when you are cured.

No man can lose on this. If the cure is worth the price, you don't have to pay for it until you get it. When you are ready to say you are a big, husky and frisky specimen of vigorous manhood; that you haven't got an ache or pain in your whole body and that you feel better than you ever did in your life. I get paid. If you can't say it after using my Belt for three months, then give me back my old Belt, and I won't ask a cent. All I ask is security while you use it.

A short time ago I took a case that I couldn't cure, and I didn't see why, as I had cured hundreds like it. Anyway, my patient returned the Belt and said I hadn't done him any good. He said he thought I had treated him honestly, and wanted to pay me the cost of the Belt, because it couldn't be used again. I refused and told him that I had made a contract to cure him or get nothing, and I wouldn't take a dollar I hadn't earned.

Dear Sir:—I have been wearing your Belt a month now, and it is certainly helping me. My food digests better than it did and my bowels move more regularly. I am not as constipated as I was, and sleep better than I did. My back is getting stronger and I do not have to pass water as often and the burning sensation is gone. I have had no night losses since wearing the Belt, and my private organs are getting stronger—**EDD. BODELL, Clover Bar, Alta.**

My Belt is easy to use; put it on when you go to bed; you feel the glowing heat from it (no sting or burn, as in old style belts), and you feel the nerves tingle with the new life flowing into them. You get up in the morning feeling like a two-year-old.

Wherever you are, I think I can give you the name of a man in your town that I have cured. Just send me your address and let me try. This is my twenty-fourth year in the business of pumping new vim into worn-out humanity, and I've got cures in nearly every town on the map.

If you will come and see me, I will explain it to you. If you can't call, let me send you my book full of the things a man finds inspiring to strength and courage. Free if you send this ad.

Office Hours—9 a.m. to 6 p.m. Wednesday and Saturday till 8.30 p.m.

Robin Hood Flour IS DIFFERENT

MANAGING THE SUMMER HEN

EDITOR FARMER'S ADVOCATE:

Of course there is a flock of hens and a poultry house to begin with. Cull out all useless hens and fit them for market or the table; remove all cocks and cockerels. If required for breeding another season, house them by themselves away from the laying flock, and take care of them as prescribed for the hens. Lice! Wage war to the death of all lice for they breed very rapidly during summer and especially so when fowl are confined. The hens should be individually dusted with some good insect powder once a week. Whatever method is used for destroying lice be sure that they are destroyed.

Clean out the house. Scrub every nest, perch, dropping board walls and ceiling with saturated lime water or thin lime whitewash, and keep everything clean and spray or wash with limed water once a month. Take out the glass windows and cover the openings with cotton.

Make the yard as large as the premises will permit. If there is plenty of room allow fifteen square feet of ground space to each hen. Fence with wire netting to the desired height. Make a box twelve to eighteen inches high and as large as will accommodate a large percentage of the hens at a time. Keep this box two-thirds full of clean chaff or cut straw. Make a second box same height but not so large and fill two-thirds full of clean, fine gravel. Make a third box as large and as deep as box number one and fill it two-thirds full of clean, fine, dusty earth or sand into which put a quantity of insect powder occasionally. Make a fourth box similar in size and depth to number two, for ashes with plenty of granulated charcoal. These boxes and their contents are placed in the yard.

Feed should consist of half wheat, not screening, and half of oats, barley or some other grain in equal quantities. Also cut bone, green or dry, small quantities of flax and small weed seeds, such as the mustards, porridge and all the green feed they can and will eat. This green feed is produced as follows: Make a sufficient number of boxes similar to those referred to above and place in some place where they will not be disturbed by stock—in which to grow a continuous supply of green feed. Cover the bottom of each with an inch of fine earth; fill in about two inches of mixed grain. Keep damp and let grow three to four inches high and commence to feed. The boxes should have loose covers, and be covered. If, however, color is desired in the contents of the egg, expose the growing grain to the sun, which will turn it a dark green, thus giving a deep yellow to the yolks.

Feed in the open yard during summer. In the morning feed light meal of hard porridge, in V-shaped troughs. Take as much of the mixed grain ration as the fowl will eat during the day and mix two-thirds of it in the litter in box one and the balance mix with the gravel in the gravel box. Also mix each day a quantity of weed seeds in these two boxes. Feed a half ounce per hen every other day of cut bone and meat, also a half-ounce of flax, by scattering so that each hen will get a proper share. Serve table scraps and boiled potatoes in similar fashion. The green grain, lettuce, lawn cuttings, etc., should be provided as much as the hens will eat each day. Give skimmed or buttermilk all they will drink. The evening meal should consist of dry mixed grain all they will eat just before going to roost. No mid-day meals should be given. Hens should have to work for that by scratching it out of the litter, gravel or otherwise.

Good, clean water in which is dropped a lump of bluestone the size of a medium pea, or of green stone twice the size, to each four gallons, should be constantly kept before the flock. Keep house and yard perfectly clean at all times. Do not be afraid to spade or plow up the yard often. Throw the earth into cones five feet high, if possible. Mixing a few gallons of mixed grain into the earth as it is piled up.

Thus do and there will be eggs to sell and eat, and no wanton damages to gardens and grain, has been for many years the writer's experience.

Sask. J. E. FRITH.
