A Valuation of the Life Liabilities has been made by the Officers of the Company as heretofore, and a totally independent Valuation has been obtained from Mr. SAMUEL BROWN, one of the most experienced Actuaries of the day. It is satisfactory to state that the two Valuations were nearly identical in their results, although in the one case each Policy was valued separately, and in the other they were grouped in classes according to ages.

The proportion of Profit which falls to the Assured will provide a Reversionary Bonus of £1 10s. per cent. per annum to be added to the original sum assured of every Participating Policy effected previously to the 1st January, 1868, and existing on 1st January, 1870, for each entire year that it had been in existence since the last Appropriation of Bonus.

The Table used for the Valuation has been Mr. GRIFFITH DAVIES' Equitable Experience, and the rate of Interest assumed has been 3 per cent.

The net Premiums only, as computed upon each Policy, have been valued, so as not to bring into account any portion of the future Profits.
