Home Building!

When planning a home the appearance the structure will present when finished is given much consideration. The brick to be used must be decided upon. Many have solved the problem by using "Ideal Red Brick," thus securing quality and appearance. When giving the contract for your home specify "Ideal Brick."

ENQUIRY IS

(Continued from Page 1)

Lord Mersey wanted evidence from ad been laid open to the sea when

that the ship would float with two open. He had thought a day or two live the surface of Edinburgh. There was evidence, he thought go that the explanation of this disster was that two compartments had een broken in by the stem of the 3 stoke hole." torstad, and that as she cleared she ad laid open the starboard side of he Empress.

ad made a careful search for evience of that kind, but he regretted say there was none available. The Hon. McLeod wanted to know what the divers had discovered in

Mr. Beatty, C. P. R. counsel, said ive a report. He admitted that they ere working in the interests of their aderwriters, the owners of the buleneral of Canada.

Construction of Ship he Empress was constructed, testime she sank.

xamination of the witness on the pouring through the bunker door ulkheads, and answering him Mr. fillhouse said that they were exended clear through the ship to the ipper deck. He said that with even ave got in somewhere else.

gearing was in all cases carried from for the water that was pouring in the doors to the upper level where The passage was flooded and the ship had to be turned round or worked he knew, no one eyer got to that door Lord Mersey said he had been askto put a question as to whether up. He fled to his room for his life here were sill plates to the doors

and Mr. Hillhouse said there were. Lord Mersey asked how long is took to close the water tight com partments, but the witness could not the apparatus which closed the waterupply the information himself. Captain Staunton, life saving super

belts and other equipment had been passage in regard to the top of the tested at Quebec on May 23 and bulkheads, Lord Mersey remarked found in first class condition. It that apparently the water had only to close the water tight doors in the top, and then nothing could stop the gine room and between three and Empress from going to the bottom. all on the decks.

Lord Mersey said that he had described how he had experimented heard it suggested that bodies were with her sister ship and had put her found with belts on but the heads from full speed ahead to full speed under water. Captain Staunton replied that the belts would keep the onds. After a close cross-examinaheads above water if put on right at tion by Mr. Haight as to whether all. He could not say if the passengers were instructed in the way putting the belts on or not. vere clear instructions with each one

Lord Mersey: "Do you think people ead the instructions?"

"I think they would for curiosity. "I don't believe it: I dont believe they ever read them." George O'Donovan, an engineer

the Empress, said he was in charge the steering gear. He inspected to every day, but he had never found nything wrong with it and neve had any complaints.

He was in the stoke hole when the ships hit. After the impact, about ? seconds, water rushed through the starboard, number two bunker in the stoke hole.

Lord Mersey: "How far below the ater line was that?" "22 feet 6 inches."

"Why bless my soul that must i ear the bottom of the ship. Wa coming in a great body?"

"Oh, a great volume the full size the door; all that could come rough. The stoke hole was soon

loor. He thought it was about ti ninutes after the ship was struc hat the lights went out. Mr. Haigh then examined the w

ness very carefully about the to of steering apparatus in use on Empress. Mr. O'Donovan explain how glycerine and water in a cylinder on the bridge was moved by action of the wheel, how this liquid was cor A number of sizes of ankle strap tinued through pipes to a similar cv slippers and barefoot sandals which inder in the wheel house and control we are selling to-morrow, Saturday ed valves which allowed steam to on for 50c. Come early, Coles Shoe Co. erate the gear. The pipes were 50c ty from the Department, -15794.

pipes and thought they were benear! the decks but he would know whether there was a shortage of glycerine by the indicator on the bridge. last inspection of the glycerine in the apparatus took place the day before sailing. The ship's steering gear was

not then in operation as she was tied up at the dock. Of course if there was a leak the apparatus would no work but it would be shown immed ne engine room to learn if possible lately on the indicator on the bridge. ow many watertight compartments In answer to Lord Mersey the wit ness said that he believed that the Empress type of steering apparatus was in use on all big steamers now

your opinion, the vessel was hit? "Somewhere between No. 2 and No.

Mr. Haight interrupted to say that a cabin number plate had been picked up on the deck of the Storstad, and Mr. Aspinall informed him that he that it would be ready for evidence

Lord Mersey-That may help us ed'not to call Dr. Grant of the Em press. "We wish to express our very great appreciation of the work this gentleman did at this period. He did
