

# HERE IS THE DAY YOU REGISTER,

ON June 22nd, Saturday, every man and woman, resident in Canada, who is 16 years and over, must attend at one of the places provided for registration, between the hours of 7 a.m. and 10 p.m., and there truthfully answer all the questions set forth upon the registration card. Upon signing the card, vouching for the accuracy of the answers, the man or woman will receive a Registration Certificate, as shown below, which must be carried upon the person thereafter.

## Why the Certificate is so Important

For failure to register a maximum fine of \$100 and one month's imprisonment is provided, also an added penalty of \$10 for each day the person remains unregistered after June 22nd.

Persons remaining unregistered cannot lawfully be employed, and cannot draw wages for work done after June 22nd. Employers who keep unregistered persons in their employ will be liable for fines equal in amount to those recoverable from the unregistered employees.

Unregistered persons cannot lawfully purchase transportation tickets, and may find themselves barred from travelling on railroads, steamboats, etc. Similarly they may be denied board and lodging at any hotel, restaurant, public house or boarding house.

In a word—All persons remaining unregistered, and all persons having dealings with unregistered persons, knowing them to be such, incur heavy penalties under the law.

Canada Registration Board

This certificate is issued to certify that the person named hereon was duly registered for the national purposes of Canada this \_\_\_\_\_ day of \_\_\_\_\_ 1918.

Issued by authority of \_\_\_\_\_ Deputy Registrar

REGISTRATION IS LAW—  
Don't Fail to Register.

This Certificate is YOUR Protection.  
Get it and Carry it

## CANADIAN WATER POWERS

By H. P. TIMMERMAN, Industrial Commissioner, Canadian Pacific Railway.

The following estimate is given by the Dominion Water Power Branch of the water power available in each province, showing to what extent this already has been developed.

The pitch at Grand Falls, N.B.

Provinces	Power Available	Power Developed			Total
		Electrical	Paper and Pulp	Other Industries	
Ontario	5,800,000	632,083	83,375	74,008	789,466
Quebec	6,000,000	370,000	100,000	50,000	520,000
Nova-Scotia	100,000	2,962	12,550	5,100	21,412
New Brunswick	300,000	5,830	3,050	4,450	13,330
Prince Edward Island	3,000				500
Manitoba	3,500,000	76,200		50	76,250
Saskatchewan				100	100
Alberta		32,866			32,866
British Columbia	3,000,000	216,345	49,000	4,275	269,620
Yukon	100,000	12,000			12,000
<b>Total</b>	<b>18,800,000</b>	<b>1,348,490</b>	<b>248,075</b>	<b>139,033</b>	<b>1,735,598</b>

It will be seen from the above that of some eighteen million horse-power available, and which further exploration will enlarge, less than ten per cent has so far been developed. Nevertheless, with but few exceptions all our principal cities, and by far the greater number of our towns and villages are supplied with hydro-electric energy, and the surplus production permits of the exportation of considerable power from New Brunswick to the State of Maine, from Quebec to New York, from Ontario to New York and Minnesota, and from British Columbia to Washington. The bearing which this exportation of power has upon the imports of coal, especially into the provinces of Ontario and Quebec, the source of two-thirds of the available current, may be surmised. Since the war resulted in a scarcity of vessels for transportation of Nova Scotia coal up the St. Lawrence River to the industries of Montreal, there have been converted to the use of electrical energy in that vicinity no less than one hundred and fifty private steam plants, with a demand load of about as many thousand horse-power; while many others are considering a like transformation.

Having mentioned Montreal, it may further be said that with a population approximating three-quarters of a million that city and vicinity, according to one of the principal power companies, was supplied by it alone last year with slightly under a billion kw-hrs., the equivalent of the amount available to the city of New

York, with a population of five millions, and to have set all lit up on one-fifth or less, providing also for traction purposes, indicates that the manufacturing enterprises of that great city must have gone somewhat shy on power, excepting such as may have been produced from coals that would otherwise have been available for heating.

A similar comparison doubtless might be made between Toronto and Chicago, or any other Canadian and American city of relative position, a comparison sure to become more striking as time passes and the upward tendency in the cost of coal is contrasted with the lowering cost of hydro-power.

The relative cost of steam and hydro-power being subject in the case of coal to labor, transportation and other variable expense is at present rather difficult to estimate, but admittedly the advantage in economy is with the latter source of energy, while in many cases for the mere ease of distribution and control, the electric current is secondarily made use of, being first generated by steam produced from coal. Hydro-power being the one necessary commodity which paradoxically decreases in cost in inverse ratio to the demand for it, this clearly is to be the manufacturing force of the future, and as coal is not at all likely ever to revert to pre-war prices, many industries supplying the world's markets will take advantage of this fact by locating in Canada where also raw materials are plentiful, and whence the same are

now, to some extent impeded. In fact, some of the larger users of heat and power, such as the electro-chemical and metallurgical plants, already have divined the coming situation and are looking to the vicinity of potential sources capable of providing adequately for not only their present needs but for all possible future developments. In this they are not forestalled nor inconvenienced by the enormous expansion of the pulp and paper industry, which finds its requisite timberlands themselves to be the means of the conservation of immense supplies of water, affording adequate footage as well as such mechanical force as is necessary to their development as other favorable conditions arise.

The same current of water having turned the wheels of one industry, in many cases passes along to drive still another, and on its further course to the sea-bears the burden its own restless energy has helped to produce. No natural resource useful to the future or to any other purpose is sacrificed and no accretion of human toil destroyed.

Canada is gifted by providence in almost every form of the basic elements of manufacture and the natural powers by which these may be developed, having at the same time the lands suited to diversified agriculture, by which a greatly increased industrial population may be sustained. Her products already are in demand wherever known around the world, and geographically she is on the trade routes of the world.

Minard's Liniment Cures Diphtheria. The crops throughout the County are growing nicely. Minard's Liniment For Sale Everywhere.

**KENTVILLE.**  
Hon H.H. Wickwire has been sworn into office with portfolio, being now minister in charge of public Highways etc.

Wanted for the summer months two furnished rooms for light house-keeping. Write Lieut. F. Lauzanne Aldershot Camp. 2ins. x.

Rev. T. C. Mellor of Annapolis has been seen frequently here of late and greeted by his many friends.

Mrs George Chipman was in Middleton a week ago taking with her, her nephews Douglas and Bob Woodworth for treatment by Dr. Fales.

Dr. Barry H. Burgess, recently of the Brooklyn Hospital New York, has been appointed to the Medical Staff of Camp Hill Hospital, Halifax.

Mr Lyman Parker who has been so ill since last March is now able to get out again and has been in Kentville twice during the past week. He is looking well after his trying illness but is unable to do any work as yet.

Mr and Mrs George Dumphy have rented the Webster house lately occupied by J.A. McKay.

**MARRIAGES.**  
At the Baptist parsonage Kentville, June 17th by Rev. A. W. West, Frank Calvin Brown, of Walbrook, to Lorna Olive Schofield, Black River.

**MARRIED**—At the home of the brides parents Mr and Mrs Dexter Davison, Canning, in the presence of a large number of near relatives, on Wednesday evening June 12th by Rev. A. J. Prosser Allen Roy Melvin, of Peregé to Havilah Amy Davison, Canning.

**NOTICE TO MEMBERS OF NAVY LEAGUE**  
On account of the great delay in receiving the Navy Magazine from England the Dominion Council has arranged to have this magazine published in Toronto commencing with July number. Members will then have this magazine mailed direct from publisher.
