Rev. George Wasson was the guest of Mr. and Mrs. F. D. Vandine for dinner on Sunday.

George Giberson took a sudden ill turn on Saturday. Dr. Earle was summoned and pronounced his trouble appendicitis.

"SPEECH BY BEAM OF LIGHT."

Scientific Instrument by Which One Can Talk With Secrecy.

A light ray which actually carried speech on its dazzling narrow ribbon of radiance fluctuated and blinked across the Central square of Liverpool, England, the other afternoon.

It was the talking ray of the wonderful photophone, the secret telephone that cannot be tapped. Speech was transmitted along the beam of light from a quiet room in St. George's Hall to a listening assembly in another building a considerable distance away.

Prof. A. G. Rankine, the inventor of the photophone, was at one end of the ray. He spoke in ordinary conversational tones, and his words could be heard with complete distinctness at the reception end of the photophone.

The demonstration was given in connection with the Scientific Exhibition at Liverpool as part of the annual assembly of the British Association.

Prof. Rankine's photophone is the great feature of the exhibition. The mechanism utilizes a ray of light reflected from an electric lamp.

The vibrations of the human voice cause the light ray to tremble and oscillate slightly. These tremblings are captured at the receiving end of the photophone by selenium cells, and translated back again, through a telephone receiver or a loud speaking-trumpet, into intelligible sounds.

The great value of the photophone is its secrecy. Only the person on whom the light ray is directed can receive the messages. It is especially designed for service between ships at sea.

"The range of the light-phone," said Prof. Rankine, "is limited only by the curvature of the earth. The source of the light must be in a direct line with the person who is at the reception end."

Another selenium cell instrument, the optophone, which enables blind persons to read by sound, is displayed in the exhibition.

This is accomplished by producing in a telephone receiver a series of musical notes which take their sound-character from the shape of the letters in a page of printing as it passes through the apparatus. Each letter has a different and distinct sound value.

Bells and Bell Music.

Following the gift of new bells which Mr. George Cadbury, Jr., has made to the village of Bournville, England, in memory of his father, comes the announcement that the bells and bell music are being included in the musical course of the University of Birmingham, where bell music is also being published.

The only other school for carillon playing at present in existence was started at Mairnes in the autumn of 1922, but the Birmingham University does not aim at so complete a course as may be taken there. It is hoped that the course will be sufficiently useful if organists and others who have charge of carillons are able to come and learn the history and practice of playing. This will undoubtedly fill a useful place in the musical world, in view of the number of carillons that are now being installed. It is said that carillon playing will probably be included in the future in the competition at the Midland Musical Festival.

Patron of Navigation.

Between seventeen and eighteen hundred years ago there was a very holy bishop in Italy named Elmo. He was canonized long after his death, and became very popular among the sailors on the Mediterranean, especially during storms. Eventually he was known as the special patron of navigation.

His name lives, nowadays chiefly because of an electrical appearance called St. Elmo's Fire, or St. Elmo's Light. This is either a ball of fire or a brush or star of light, sometimes seen, especially in southern climates, during thunderstorms, at the tops of masts, spires or other pointed objects. It is often accompanied by a rushing, hissing noise, and is of the same nature as the light caused by electricity streaming from points connected with an electrical machine.

Winchester's Women.

Winchester Cathedral, where a memorial to Joan of Arc was dedicated recently, possesses several other memorials to women. In the north aisle, behind the font, is the tomb of Jane Austen, and above it a brass, and a stained-glass window to her memory.

Close to Jane Austen's tomb is that of Mrs. Montagu, laundress of the Blue-Stocking Club. The reredos in the beautiful Lady Chapel, carved at Ober Ammergau, is a memorial to Mrs. Charlotte Yonge, the authoress, and the glass in the east window was presented by the city in remembrance of Queen Victoria's Jubilee.

A Strange Find.

A strange find was made while an old house in North Wiltshire, England, was being demolished. Digging up the foundations, the housebreakers found a curious stone, sculptured in a style not unlike that of a church gargoyle, but more crudely worked. Only the head was found buried right in the foundation work of the house, and there was little to identify its origin.

Didn't Care.

Rastus Jackson, a thoroughly married darky, was one day approached by a life insurance agent.

"Better let me write you a policy, Rastus," suggested the agent.

"No, sah," declared Rastus emphatically, "Ah ain't any too safe at home."

Here and There

The Canadian Pacific coastwise steamer "Ena" has carried from the seven plants operating on Barclay Sound over 12,000 tons of salt herring since the present season opened in November. This represents almost half the season's output, which will approximate 25,000 tons.

The heaviest immigration to Canada experienced during the last ten years is looked for this year. Already the arrivals are running ahead of those for the same months in 1923, those from European countries being especially large. The enquiries from prospective settlers in the United States are numerous.

Canada exported 6,532 pairs of leather footwears during January 1924, according to a report of the Bureau of Statistics. Of these 2,179 went to the United States, 2,038 to New Zealand and 2,031 to China and Japan. Bermuda, the Straits Settlements and Newfoundland took the rest. The value was \$21,301.

Canadians imported 5,326,567 pounds of tea last month, or about three-fifths of a pound per head of population. The value of last month's tea imports was \$1,661,176, and for the twelve months ending January 31, the value of the 43,223,119 pounds imported into Canada was \$13,253,642. The bulk of it came from India.

IN MEMORIAM

In loving memory of Vera S. Walton, who passed away April 8, 1923.

A dear one is from us gone
A voice forever stilled
A place is vacated in our home
That never can be filled.
The Family.

NOTICE OF SALE

TO Ellsworth McDougall of the Parish of Kent in the County of Carleton and Province of New Brunswick, Farmer, and Hazel Vera McDougall, his wife, and to the Executors of the Last Will and Testament of John W. Bohan, late of the Parish of Kent in the County of Carleton, in the Province of New Brunswick and all others whom it may in anywise concern:

NOTICE IS HEREBY GIVEN that under and by virtue of a Power of Sale contained in a certain Indenture of Mortgage bearing date the Twenty-fifth day of November A. D. 1920 registered in Carleton County Records in Book 121 on pages 698 and 699 the Nineteenth day of May A. D. 1924 at two o'clock in the afternoon, the lands and premises described in the said Indenture of Mortgage as follows:

"ALL that certain piece or parcel of land situate, lying and being in the Parish of Kent, in the County of Carleton of Carleton and Province of New Brunswick, and bounded as follows, to wit:—Northerly by land owned by Daniel Higgins, Easterly by land owned by Peter McCollough, Southerly by land owned by Stephen Kinney, and Westerly by land owned by the aforesaid Ellsworth McDougall, containing FIFTY ACRES, more or less, and being the same land conveyed from Abram Ruff to the late Lucious McDougall."

"ALSO ALL that certain other piece or parcel of land, known as the Southern half of Lot Number Fifty-eight, in Range three Moose Mountain Settlement, situate in the said Parish of Kent, and granted to John Higgins on the first day of December A. D. 1884, and bounded as follows:—On the North by the Northern half of the said lot, on the East by the Southern half of Lot Number Fifty-nine granted to Amos Cox, on the South by a reserved road which separates Range Three from Range Two of said settlement; on the West by the Southern half of Lot Number Fifty-seven granted to James Holden and now occupied by Jeremiah Higgins, containing FIFTY ACRES more or less, and being part of land conveyed to Abram Ruff from Daniel Higgins."

Together with all the buildings and improvements thereon and the appurtenances thereto belonging.

DATED this Fourteenth day of April A.D. 1924.

MICHAEL DOHERTY, Mortgagee.

FRED SQUIRES, Solicitor for Mortgagee.

NEW LAMP BURNS 94 PER CENT AIR

Beats Electric or Gas

A new oil lamp that gives an amazing brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent air and 6 per cent common kerosene (coal oil).

"I Suffered Terribly With Sore, Aching Back"

Mrs. Roland Ferguson, 194 Lake St., Peterboro, Ont., writes:

"For over two years I suffered terribly with sore back. I was almost mad with the pain, and had doctored with it until I was discouraged. Then my father, who is a firm believer in Dr. Chase's Kidney-Liver Pills, advised me to try Dr. Chase's Kidney-Liver Pills. I followed his advice, and am glad to say I was completely relieved of that torturing pain in my back. It is over a year since I used these pills, and I have had no return of the trouble, but always keep them in the house."
