HARDWARE. HARDWARG. There has been some improvement in trade since, our last, but it cannot be said to be up to the average activity of the season. Still heavy goods have been selling of intersther freely. Nails have been active, as have also tin plates and timned iron. Galvanized iron has been in active demand. Glass is becoming scarce, but as spring shipments will shortly arrive there is no reason to fear an insuf-ficient supply. Prices in all cases remain un-charged ; they have got so low that it is thought they can go ne lower, and no sign of reaction is yot visible. The-Block, per Ib., 19 to 20c; Grain, 22 to 23c. THE EASTREN QUESTION.—The news this morning bears a decidedly bellicose aspect. In the lobbies of Parliament yesterday runours were circulating that the tone in oficial circles was decidedly warlike, and the North German Gazette, of Berlin, a semi-official journal, says Russia evidently regards war with England inevitable, and rels she was never better prepared to wage t than at the present moment. At St. Petersburg runours yesterday were ersburg rumours yesterday were oad that Russia has demanded that the British fleet quit the he Sea of Marmora immediately. The reourt is believed to be not entirely without oundation, and it is regarded as certain hat Russia has either made, or is about to bat Russia has either made, or is about to make, representations regarding the fleet. Further, Mr. Layard's objection to the mbarkation of the Russian troops at Bujukdere has caused great irritation at St. Petersburg. An article believed o be inspired appears in the *Journal de St. Petersburg*, declaring he time has arrived that England should be asked what she wants, *i* and that she ught to be arraigned by Europe and summoned to re-enter the sphere if international law, outside which, it is alleged, she has placed her-elf by her action regarding the fleet. The article concludes by asserting that if England will not participate the Congress an and will meet without her. France ppears to be the only Power who thoroughly endorses England's de-nand for the submission of the whole reaty, and her people and journals of all iews seem to be of the same opinion. taly, according to a Rome correspond-int, although determined to remain petral, is resolved to oppose to the utmost, t the Congress Russian are donition. ral, is resolved to oppose to the utmost the Congress, Russian predominance in Surope by extension of territory or con-tituting new Kingdoms under her sway. Paris correspondent affirms that Insia has forced the Porte into a secret reaty, holding out conditions which would ertainly prove advantageous to Turkey are they kept. At St. Petersburg yester-ay it was reported that a revolution ad broken out in Roumania ad Prince Charles had fied. MONDAY, March 25. THE EASTERN QUESTION.—Still the dif-ulty between Russia and England re-ains unsettled. Lord Derby, while ad-baring to the demand that the whole resty shall be submitted to the Congress we Russia an opportunity of coming an understanding by asking the communication of the runs to the several Powers was equiva-int to their submission to the Congress he reply was that it was not, and the image says with that answer vanishes the by condition on which England can be presented at Berlin. The Russian paper e seriously discussing the assem presented at Berlin. The Russian paper escionally discussing the assem ing of the Congress without Britain, but is extremely doubtful whether France d. Italy would consent to be a party to ch a course. The alternative would en be, according to the Journal de Si tereburg, that Russia would have to talone, which means that ahe must hav town way, or again fight for it.
