The Evening Telegram, St. John's, Newfoundland, August 31, 1911 .- 7 **First Locomotive** ER BUILT IN NEWFOUNDLAND FINISHED AND TESTED YES-TERDAY. Yesterday the first locomotive enne ever built in Newfoundland was riven the finishing touches at the H Co.'s shops, and at 3 p.m. Mr. H Reid in the presence of a number of the workmen, and the sons of Pre sident W. D. Reid set the mechanism

going which submitted the new enrine to a severe hydraulic test. The nachinery of the new locomotive worked smoothly an dwell, and the big fabric went over the rails for about 3 yards. All were delighted at the manner in which the new engine stood the test, and to-day steam will be got up on it and it will be sen out over the rails on a trial trip. Th new engine is known as 11 and is of the same calibre as Nos. 110 and 111, and those who know something about such things and who were present yesterday pronounced it a beauty. This is quite an enoch in the industrial life of the country when it can turn out its own locomotives, and we congratulate the Messrs. Reid on their enterprise. Incidently we must also ongratulate Mr. Turnbull on his enincering ability and the smart local

chanics who worked with him on onstruction in the Reid Co.'s Shops. pathise with me when I tell you that along a lot of tobacco to the old men;
