DIMINUTION IN ATTACK.

PARIS, To-day.

Along the battle front of the Oise, there has been a notable diminution in the fighting to-day, according to a War Office statement to-night. During the course of to-day, offensive activity of the enemy was manifested only in local attacks against a few points along the front. The statement says: Along the battle front of the Oise there has been a notable diminution in the fighting to-day the offensive activity of the enemy was manifest only by local attack on a few points. Along our front we are being strengthened every day by the constant arrival of reinforcements and all these attacks are being stopped by our troops with losses for the assailants. Raids over positions in the region of Baden Viler forest were completely broken down.

NOT QUITE CLEAR. Responding to a demand from the military authorities, the Military Service Council has decided to call up for service men in the Medical Category. Under the Military Service Act, Category B men are liable for overseas, but not for combatant service, and they are being called out because of the necessity for securing more men for railway construction and similar work which has arisen, and it has therefore become necessary to draft all men in medical category B in respect of whom no other grounds for exemption exist. The Military Service Council is, therefore, issuing instructions to registrars to take immediate steps to call up such men under
