

## More 3c Wall Paper

Saturday and Monday,  
May 2nd and 4th

We still have another lot of 3c Wall Paper for Saturday and Monday, nearly 500 rolls, 6 different designs, perhaps the last of this cheap paper we will get this season. These all have 9 inch borders matching, but are without ceiling with one exception.

1,200 Rolls 7c Paper at 4 1/2c a Roll

We offer Saturday and Monday only, 6 good designs of our regular 7c papers for 4 1/2c a roll to clear them out. Each paper has a 9 inch border and a good ceiling to match. There are several rooms in each kind. We have considered these papers extra good value at 7c a roll.

### Fine Wall Papers

We are leaders in fine Wall Papers. Our large stock and tremendous assortment of fashionable papers put us in a class far ahead of our competitors. A look through our samples will convince you that this is correct. If you intend to cover your walls this spring we want the pleasure of showing you our designs.

### FORTUNES FOR TWO.

The Way Russell Sage Paid a Doctor Who Refused a Fee.  
A former Baltimorean who was a close friend of a Philadelphia physician whose specialty was kidney diseases relates the following as the method by which Russell Sage paid the doctor a bill:

The physician was on a visit to a friend in New York. Mr. Sage was very ill at his home from a diseased kidney. Hearing that the Philadelphia doctor was in New York, Mr. Sage requested him to call. The doctor did so, and within ten days Mr. Sage was a well man. A check, signed by Mr. Sage, with the amount left blank, was handed the doctor, who declined it, stating that he could not break his inviolable rule of confining his practice strictly to office work. When he visited people who were too poor or physically unable to get to his office he never accepted pay for his services.

During his visits to Mr. Sage's home the doctor was accompanied by his daughter, a wise and true miss of ten years. About a month after the occurrence the doctor's little daughter received a telegram from a Wall street broker which read: "By order of Mr. Russell Sage, I have bought for your account — shares of — stock." As soon as the doctor read the dispatch he hurried to a Philadelphia friend, who was a broker, and ordered him to buy — shares of the stock mentioned for his (the doctor's) account. The stock fluctuated, and when it was selling at a price which would pay a good profit the broker advised the doctor to sell, but the doctor did not take the advice. Later a dispatch came from the New York broker to the little girl. It read: "Have sold for your account — shares of — stock." The doctor immediately unloaded his holdings. These transactions were repeated several times and not only made the doctor a small fortune, but won for him a reputation as a shrewd financier. A final telegram came from New York for the little girl: "Have closed out your holdings and mail you a check for — thousands." The doctor unloaded and dropped out of the stock market as suddenly as he had entered it, much to the mystification of his broker and friends, who had heard of his successes, but never knew whether to attribute them to a "Henrietta" luck or to careful study of the stock deal in.

### CARRARA QUARRIES.

How the Men Set About to Lower the Fragments of Marble.

As soon as a great fragment of marble detached by the blast has stopped rolling it is more or less roughly squared into a block weighing, say, forty tons.

Then the men set about getting it down. Along certain lines of descent offering the least resistance to a body descending by force of gravitation a succession of stout posts has been firmly driven into the loose stones and marble waste. The men by means of crowbars and screw jacks raise the block on to a soaped skid of hard beech wood, of which they have several at hand. Before doing this they secure the block by means of three long three to five inch hempen cables, with which they take turns around the posts and pay out sufficient rope only to allow of the ponderous mass sliding over the soaped skids by its own weight and the angle of the incline, but not to allow of its gaining too much momentum.

During this descent, besides the men tugging on to the ropes, two or more men are seated on the block. A man following closely in its wake hands them up the skid just passed over, which they resoap and hand down to a man, who keeps just in front of the moving mass, to put down in its path and so provide a continuous slipway. This last mentioned worker has the most perilous task. If one of the cables part at a critical moment or if a mistake be made in paying out or slackening them, he must inevitably be crushed.

It is a fine sight to see the men at the last pinch, near the railroad, hand levering the marble over rollers on to the truck. At this stage all hands are yelling like demons at their work, but the moment their burden is safely entrained every man flings down his tool, and all bolt for the osteria, or wine-shop.

### Baldness Not Due to Modern Flour.

The human race was afflicted with baldness and toothlessness centuries before white flour was known. It is possible that both these afflictions are less prevalent now than in the olden times. All the olden time pictures and statues of the dead races showed up a good percentage of bald heads, and tooth pulling and filling and even artificial toothmaking were practiced away back in history. Out of the ruins of Pompeii and Herculaneum are taken whole sets of false teeth along with loaves of bran bread.

### The Ideal and the Real.

Uncle Joe—This is a queer world. City Man—What makes you think so? Uncle Joe—Well, a painter feller came down to my place last summer and while he was loafing about painted a picture of my dog. I heard afterward that he sold it for \$50, so I brought up the dog, thinking I could get at least a cool \$100 for him; but, by jingo, I can't even give him away!

### Strenuous Society Life.

Dorothy—Six luncheons in one week! Did your gowns hold out? Isabel—Yes, indeed. But I hadn't any conversation for the last two days. —Puck.

In the course of a century an acre of constantly cultivated land loses no less than 12,000 pounds of alkali.
