### City Hall Notes.

The letter from the Walkers notifying the city that negotiations for the extension of the L. and P. S. R. to the L. E. and D. D. R. were off was received by Mayor Beck late on Saturday afternoon. The letter was a brief one, merely saying that owing to the delay in having the lease ratified the Walkers refused to sign under the agreement discussed. Whether they will discuss other terms remain to be seen. The letter will be read at tomorrow's meeting of the shareholders of the L. and P. S. R. This is probably all that will be done at the meeting, as there is no lease to ratify.

The board of hospital trustees meets tomorrow at 2 p.m. The chief business will be the appointments to the three vacant positions on the staff. As there are nearly 80 applications in the making of selections will not be easy. It is understood that Mr. John Drewe, at present a clerk at Hobbs' Hardware Company, and Mr. Wm. Pratt, of Petrolea, are both favored for the position of superintendent, while the name of a former commercial traveler is also mentioned The position of bookkeeper will probably go to Miss Sutherland, daughter of Mr. Thomas Sutherland, of the United States customs office at the G. T. R. depot. For the post of steward an employe at Wolseley Barracks is mentioned. Other business to come before the trust is the letting of tenders for steam tables and smaller supplies.

A special meeting of the city council is being held this afternoon for the purpose of appointing an arbitrator to represent the city in the claim for damages to property, made by Edward Boles, on account of the raising of the level of the sidewalk at Ann and Talbot streets. Mr. Bowles has appointed Mr. R. K. Cowan to represent him.

Up at the stone-pit 42 men are today breaking large stones into small pieces. They sing cheerily as they work, and when they pause for breath they fill in the interval by calling down blessings on the head of Ald. Cooper, at whose instance the council ordered the work to be done. The men work piece-work, and make from \$1 to \$1 50 per day, which, as Ald. Cooper says, "is much better than having them walk around the streets idle all day."

The alterations at the city hall are well under way. The inside of the old Mountjoy store has been torn out, preparatory to fitting it up for the assessment commissioner's office.

Engineer Graydon is so far improved in health that he is to be removed from Victoria Hospital to his home today.

### Untimely Death.

### TO PERPETUATE THE LIFE OF OUR TREES

Efforts of the Forestry Association of Canada-Interesting Reports Presented.

Ottawa, March 10. - At the annual

meeting of the Canadian Forestry As-

sociation the report of the board of directors showed that during the year there had been an increase in membership of 347, of which 117 were from Ontario. The attention of the British Columbia authorities was drawn this year to the extensive forest fires in that province, and a request sent that the penalty clause in the British fire act should be enforced. The system of co-operation with the settlers of the western prairies in forest tree planting adopted by the Dominion Government is developing into large proportions. Upwards of five hundred farmers prepared their land last season under instruction from the agents of the for-estry branch, and will be supplied with seedling trees to plant shelter belts this spring. The work of guarding the for-ests from destruction by fire has, from all reports, been attended during the past year with gratifying results. Mr. R. H. Campbell, assistant sec-

retary, submitted a valuable report on the forest fires of 1901. The forests in every province of the Dominion have been threatened by fire, and only by the determined efforts of the fire-rangers was more serious loss prevented. In the Temiskaming district last June fully 200,000,000 fet of lumber must have been destroyed. In Nova Scotia almost fifteen thousand acres, the timber on which was valued at about \$10 per acre, was burned over. In Northumberland, county, New Brunswick, 42,000 acres of forest was burned over. In British Columbia a considerable area was ravaged by fire. In Ontario there were no serious losses in the districts patrolled by rangers, but a district fully 3,000 square miles in the Missanabie River, Northern Ontario, sufferedy from the ravages of fire. There was a general concurrence of opinion in the discussion which followed in favor of precautionary measures against fire and a rigid enforcement of the law against those whose carelessness led to outbreaks.

The reports from the other provinces of the Dominion are equally gratifying, except Quebec, where the measures taken were not effective in preventing a serious loss in the Temiskaming.

IN ONTARIO. Mr. Thos. Southworth read an instructive paper on forestry in Ontario. He spoke in an interesting manner of the division of the districts and the other measures for reforestization adopted by the Provincial Government. In the central division, extending for about a thousand miles in a straight line from a little west of Ottawa to Rat Portage, the great permanent for-

est of the province is to be maintained. A fairly effective system of fire protection exists in Ontario, and a definite system of forest reserves, to form part of an extensive and permanent crown forest, has been inaugurated. From this forest the province will derive a large annual revenue, and it will also of St. Andrew's Presbyterian Church. large annual revenue, and it will also Miss Heron had been confined to her prove a source of wealth and employ-room for about a week, and yesterday ment to the people. ### THE STRIKES

Newfoundland Sealing Business Comes to a Deadlock-Boston Teamsters' Strike in Full Force.

St. Johns, Nfld., March 10 .- The striking crews of the sealing steamers left their ships at midnight last night, rendering it impossible for the vessels to sail this morning. A complete deadlock prevails. The men are jubilant over the success of their movement, and have telegraphed to other leading centers, appealing to them there not to join their ships. The crews here, with their belongings, line the streets, but there is no disorder. As the weather is fair, the men are not seriously incommoded by being without shelter.

Business is practically suspended. Boston, March 10.-In view of the threatening aspect of the strike, the state board of arbitration early today placed itself in touch with all concerned in the trouble. It was learned this forenoon that the newspapers are exempt from the embargo of the teamsters and their paper will be delivered as usual, the same as supplies to hospitals and public institutions.

### IMPROPER POSTERS

Crusade Started Against Objectionable Classes of Theatrical Show Bills.

Toronto, March 10.-The power which is being sought by the police commissioners from the legislature to enable them to act as censors in the matter more far-reaching than was at first supposed. The illustrations which have raised so much criticism, as showing too much of the human form, are not the only ones likely to be officially disapproved of. Magistrate Denison, who is one of the commissioners, says that he considers the influence of the bills showing murder scenes to be bad. Posters, he explains, have been put up portraying deeds of extreme cruelty, as if such things might be looked for in everyday life. We can keep our children from going to these things in the theaters, he says, but we cannot help their seeing

### Defense of the Flirt.

Ruskin advised every girl to have six sweethearts coincidently. It was excellent advice. That misguided person, the flirt, is most frequently a woman whose heart aches for friendship, but who keeps the richest store hidden for of Shimonoseki, after they had fired her king when he shall come. Those who were never her king, who never could be her king, call her names by way of rejoinder. They overlook the salient fact that all she gave them was friendly interest, and that was all she pretended to give them; for a conscientious flirt, that is, a woman who conspicuously pretends to love-is as impossible as a conscious hypocrite. In fact, the flirt is the only remaining artist in friendship, and a world which knows not what friendship is makes good the deficiency by maligning her. -Macmillan's Magazine

In one of the St. Louis Sunday schools the classrooms are separated by glass partitions. A St. Louis paper says that during a session of the school one of the teachers was much annoyed by loud talking in an adjoining room. At last, unable to bear it any longer, he mounted a chair and looked over the partition. Seeing that one boy who was a little taller than the others was talking a great deal, he leaned over, hoisted him over the partition, and banged him into a chair in his room, saying, "Now be quiet!"

A quarter of an hour later a small

head appeared round the door, and a meek, scared little voice said: "Please, sir, you've got our teacher."

MURDERED BY MAIL. Lowell, Mich., March 8 .- The coroner's jury which has been investigating the mysterious death of Mrs. Wm. Klump here, decided that she was murdered. Mrs. Klump .received a supposed sample of headache powder by mail last Saturday afternoon; Sunday morning she took it, and lived but a few hours. A quantity of strychnine was found in the stomach. A headache powder similar to the one taken by Mrs. Klump, was received by another woman in the village, and this was examined. It was more than 50 per cent strychnine.

## The Father of Modern Japan

The Marquis Ito, who recently completed a tour of the world, has lived through the romantic period of the Japanese awakening, and his career illustrates those virtues of perseverance and patience the practice of which has won for Japan the distinction of being called the Germany of the East.

He was a member of the anti-foreign party in his youth; but when he saw Commodore Perry's squadron in Nagasaki harbor he decided that if his country was to hold its own, it must fight the Caucasians with modern weapons. He determined to learn how to use those weapons, and although it was a capital offense for a Japanese to leave the empire, started for England. In order to learn navigation, he worked his way to London before the mast on a sailing vessel. When the ship arrived the crew went ashore, and Ito, the future adviser of the emperor, spent his first night in England lonely and supperless in the fore-

At once he set himself about mastering the ways of the west. He was not long in winning the confidence of men, for when Europe was preparing to destroy the Japanese forts on the Straits on the foreign war vessels, he persuaded the British Government to delay action until he could return to Japan to advise his master against

continuing his foolish course. From this period his biography becomes the history of the nation. was made governor of Kobe to protect the Europeans; he was the chief of the embassy sent to Europe to ask that Japan be treated as an enlightened power; he studied western governments, and under his guidance the feudal laws were changed, the judicial system was reorganized and a constitution was

drafted The Japan of Ito's youth was, in its relations to the world powers, a bar-barian nation. It was compelled to allow foreign governments the privilege of maintaining in its cities consular courts, before which all cases were tried in which foreigners were concerned. To him more than to any other man is due the release of Japan from the trammels of foreign guardianship, and its conquet of a place among the nations which treat with each other on equal terms.

### Engaged Girls Barred.

"No engaged girls need apply," is the latest phase of the nursing profession. Doctors and matrons have, it appears, been discussing the subject, and have come to the conclusion that damsels who are engaged to be married should not be admitted as probationers to training schools because, in the opinion of those staid, matterof-fact persons, they only dally with nursing until the time come to trip lightly into marriage, and thus stand in the way of those who intend to de-vote themselves whole-heartedly to

their profession. Moreover, doctors and matrons entertain a strong suspicion that not a few of these giddy candidates seek the privilege of wearing a nurse's uniform, with all the attraction it possesses for the purpose primarly of working havoc among the hearts of medical students and others with the view of speedy marriage. An argument used on the who are engaged to be married would derive inestimable advantage from g a year or tw and learning something about how to treat simple maladies such as occur frequently in households. That may be but nursing is now a recognized Gyer—The delicious feeling which profession, and those engaged in it do nakes you want to sit down and not look favorably on those whom they regard as matrimonial interlopers. So the engaged girl probationer is to be shelved.—London Telegraph.

"Who befriended Uncle Sam?" "I," said John Bull, "I used my pull.
I befriended Uncle Sam."

"Who helped him lick Spain?"
"I," said the Kaiser,
"I stood right by, sir.
I helped him lick Spain." "Who stood off the powers?"

said the Czar.

"I was right thar.
"I stood off the powers." "Who's his friend now?" said they all,

"I" said they all, With unanimous bawl. "I'm his real friend now." -Chicago Tribune.

EASILY PARDONED. Impartiality is supposed to be one of the prime requisites of a good school-teacher, and indeed it is a quality which most of them possess. But even the schoolmistress is human, and as a story in the Christian Register shows, may measure out justice with a due regard for extenuating circumstances. A little Cambridge girl was discov-

ered whispering in school, and the teacher asked: "What were you saying to the girl next to you when I caught you whispering?"
The little culprit hung her head for a moment, and then replied: "I was only telling her how nice you looked in your new dress."

ALL. They were sitting in the corner grocery store, exchanging the confidences of the fishing season, and as the conversation progressed the stories steadily increased in size. At last, says the New York Times, the tail, lank man

on the cracker-barrel pulled himself together and began:
"I went down to the river this morning, and although the water was high almost to a flood, I took a ten-foot

"Stop there," exclaimed the fat man with the corn-cob pipe. "Tell us you took and eight-pound trout, and I'll sit idly by. But a ten-foot pike, never!" "I took a ten-foot pike-pole," continued the unruffled man on the cracker-barrel, "and in less than five minutes I hooked out a fifteen-foot

bass-' "See here! See here!" shouted the owner of the grocery, "You'll have to go away from here to finish that story. I haven't any lightning rods on this store yet."
"I hooked out a fifteen-foot basswood log," persisted the tall man; "and I was going to ask how much you think
