FARLEY WROTE LETTER

CONVICTING HIMSELF

Detroit, Mich, March 23. - In today's proceedings in the trial of E. E. Farley on the charge of "ringing" the ah Black at the Grosse Pointe track. June 16, 1993, the prosecution sprung what was taken to be one of its best cards by introducing a letter, explaining the entire deal to a friend. The letter was dated New Orleans, March 15, 1902, and is addressed to William O'Hara, of Cincinnati, appealing to O'Hara for an immediate advance of \$500 for a scheme "to get big money quick." "I am scheming to get hold of a bay filly like Sarah Black,' reads the letter, "as I see a chance to make all the money wanted to square up everything and put in a book this summer. You understand what I want is to ring in a good fast filly at Roby in a cheap maiden race and get long price as Sarah Black—100 to 1 or Far Excelled Other Jockeys at The Bunch of Two-Year-Olds more. Sarah Black is out of existence but no one knows it. I have one picked out here that won three races, and that I can buy for \$1.500. Everybody will think she is Sarah Black, and maybe can get 200 to 1." J. A. Winters, of Chicago, testified today that the day following the contested race Farley confided to him that Aimless

The steam or hot water system of heating buildings is the nearest approach-to-the sun's heat in healthfulness, - cleanliness and

even-distribution .-In the hot air system the air is deprived of its necessary moisture, giving a parched, unwholesome heat. Hot air heating cannot be made as effective as

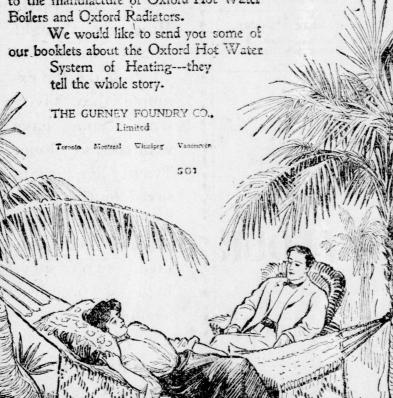

steam or water heating because of the action of the currents induced by extreme temperatures and high

radiated from each radiator and evenly / Oxford Radiators are cast from the best grade of iron in perfectly-made moulds. No diaphragms are used nor are there any complicated passages to retard the free circulation of the water or steam. There is no paper packing used in Oxford Radiators, and to this is greatly due their freedom from leaks.

The Oxford Push Nipple as used on Oxford Radiators is the easiest to adjust or detach when it is necessary to add to or take off any of the loops.

The Oxford Hot Water Boiler is made with a draw-out grate, thus repairs may be made without disturbing the boiler.

The fire-box of the Oxford Boiler is larger at the bottom, thus preventing the clogging of the grate with ashes. The nearness of the first water section to the fire gives a higher and more even temperature to the water. Our entire plant at Toronto Junction, covering many acres of ground, is devoted exclusively to the manufacture of Oxford Hot Water
