THESE BEVERAGES COMPLY WITH THE LAW.

Ready's Beer

These beverages surely satisfy the craving thirst. Drink them for their appetizing, palatable, refreshing flavor. Drink them for their ability as a thirst quencher. Drink them because of their power to refresh, revive and invigorate.

You will be delighted with their unusual qualities.

Buy them from your local dealer or direct from St. John.

Ask for prices.

W. H. GRAY, exclusive agent for this district

READY'S BREWERIES LTD.

Quality, Without Extravagance

has been the foundation stone on which the Fit-Reform tailoring organization has been built.

You cannot find better style, fit and service than what Fit-Reform Suits and Overcoats offer; and the prices are as modest as quality consistently allows.

As a very famous business man said, the recollection of quality remains long after the price is forgotten.

WATER POWER AND LOCATION OF PLANT

Industrial Supremacy Passing From Coal to Hydro-electric Energy.

The presence of coal has been one of the most important factors determining the industrial expansion of various countries during the past hundred years or so. This condition is gradually changing through the electric energy supplies. A recent article by G. H. Ashley, State Geologist of Pennsylvania, emphasizing the necessity of replacing coal by waterpower is particularly significant, coming from one who is well able to judge the situation in this great coal state. His statements are of special interest to Canada in view of the prediction that industrial supremacy will, eventually, pass from coal-depleted regions to areas where large water-powers are available. It is even pointed out that one way of keeping the industries where they are in the United States would be by the importation from Canada of enormous quantities of hydro-electric energy available on the St. Lawrence and at Niagara.

Mr. Ashley holds that: "The industrial East has maintained its supremacy because of cheap fuel and nearness to markets. Because of cheap fuel Pittsburgh affords to haul iron ore from Minnesota. It does not take a seer nor even a scientist to point out that, if our present increase use of power continues, a generation will see the exhaustion of cheap fuel in the East."

A review of the field to day shows that, in several of the districts, practically all of the high coal has been mined out, while in others it is possible to count the years to the time when the supply will be gone. It may be argued that, as the cost of coal increases the manufacturing interests of the East will turn to water-power. That argument leads to the question of the adequacy of the water-power of that region to take over the burden now carried by coal.

"In addition to the powers within United States, there are large powers to the north in Canada. The St. Lawrence below the international boundary is estimated to have a potential horsepower of nearly 1,500,000, and the two provinces of Quebec and Ontario have been estimated to have a maximum of 6,000,000 h.p. each, including that from Niagara and the St. Lawrence. Already 125,000 h.p. is imported into New York from Ontario, and a small amount is imported into New England. If all of the Canadian water-powers were developed and Canada would allow the exportation of, say, one half the power, or 6,000,000 h.p., it is probable that the northeastern corner of the United States could look forward to an ultimate utilization of not less than 10,000,000 to 12,000,000 water horsepower."

It need hardly be pointed out that the benefits accruing to Canada from the exportation of 6,000,000 horsepower would be relatively negligible. One large manufacturing plant using, say, 1,200 h.p., would employ more men than the water-power plants generating 6,000,000 h.p. Conservation.

PASSING OF THE SEASON.

It seems as though we had but just ceased to grumble about the late spring with its excessive rains and lack of sun, and now summer is upon us and signals of approaching autumn are in view.

The hay fields, but yesterday thick standing and green, are now brown under the hot sun. Where on the verge of the woods a deer might have lain hidden, not a score of feet from town, and within an hour's walk of Lake Beauport, robin and grouse are plentiful. Over much of the land the yellow grain is commencing to show at the head of the stalk. The streamers of the occasional patches of corn, rustle with a creaking sound as the wind steals over the field and stirs the pale green leaves.

The birds hatched in spring and early summer are abroad taking their first lessons of life. Robins and chipmunks and song sparrows and other familiar friends, have more than doubled in number; the crows are more noisy than ever and from each company of the black rascals encountered is heard the call for food of the ever hungry young. In swamp or woodland the mother grouse practises her successful arts to lure away from her tender brood, more numerous now than many years past, man or dog that unexpectedly approaches them. The deep dark green of mature frondage has overgrown woodland and swamp and the leafy curtain hides all beyond. Where in winter one could see for fifty yards through gray stems and branches, now the vision is limited to arm's length.

So the season has marched along. Yet now appear signs more tangible and more sure. Swallows are mounting on the telegraph wires, sure evidence of approaching departure for the south. Blackbirds are gathering in flocks and resorting to the wet meadows where wild plants will soon mature their seeds.

Ever since the end of last winter all things have been growing. Now comes the season of ripening; to end in maturity, to be followed by the season of rest, and so the annual cycle repeats itself.

Colds Common Sense

You have a cold, or your child has a cold; a cough, a tight feeling across the chest; a soreness in the breathing tubes. In the past how have you treated such? You have bought some cough mixture, and swallowed this down into your stomach. Now, why? Your stomach was not ailing, and there is no direct connection between your chest (where the trouble is) and your stomach! Then why swallow into your stomach any mixture when the trouble is in your lungs and bronchial tubes?

It's a mistake; and Peps is the remedy provided to correct this un-commonsense treatment. Peps are little tablets, which contain highly beneficial Pine essences, combined with other medicinal extracts. These healing extracts are so prepared that as soon as you put a Peps into your mouth they are liberated in the form of healing vapors. You breathe these vapors down to the throat and lungs, and thus treat the organs that are inflamed, direct. In a way, it is like breathing from a vaporizer or bronchitis kettle, except that there is no apparatus needed, the little Peps providing everything needed for the treatment! The very small portion of Peps which you swallow has a slightly tonic effect upon the stomach and does you good, but the use of Peps is not for stomach troubles, but for lung, throat and bronchial troubles. Peps relieve these as no ordinary treatment can. Children like Peps and they are best for the little ones because Peps contain no morphine, laudanum or other poison found in so many of the old cough mixtures. Druggists and stores everywhere sell Peps 50c. box or from Peps Co., Toronto, for price. Remember the name—Peps only.

Peps

GENUINE ASPIRIN HAS "BAYER CROSS"

Tablets without "Bayer Cross" are not Aspirin at all

Get genuine "Bayer Tablets of Aspirin" in a "Bayer" package, plainly marked with the safe "Bayer Cross." The "Bayer Cross" is your only way of knowing that you are getting genuine Aspirin, prescribed by physicians for nineteen years and proved safe by millions for Headache, Neuralgia, Colds, Rheumatism, Lumbago, Neuritis, and Pain generally. Made in Canada. Handy in boxes of 12 tablets—also larger sizes of 24 and 48 tablets. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monocresolide of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

Keep Horses Working

A lame horse or a sick horse is a useless expense. You have got to keep the horses working these busy days in order to make them show a profit on the investment. All you need to keep your stock in prime condition is

DR. J. WOODBURY'S
Horse Liniment and Condition Powders

They are standard specifics, used regularly by hundreds of farmers and horsemen for such common ailments as Coughs, Colds, Colic, Distemper, Pink Eye, Glanders, Founders, Spavin, Splint, Curb, Cracked Hoof, Enlargements, Kidney Trouble, Fever, Cuts, Sores and Bunches.

There is no telling when a horse will fall sick or meet with an accident. Keep Dr. Woodbury's Liniment and Powders on hand so you will have the right remedy to relieve your horse and put him back to work again.

"Diamond Dyes" Make Shabby Apparel Just Like New—So Easy!

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, children's coats, draperies, everything. A Direction Book is in package. To match any material, have dealer show you "Diamond Dye" Color Card.

WHAT CONSTITUTES A LOAD OF WOOD?

Standardization of Delivery Boxes Would Promote Confidence.

The fact that, on cut-over lands, hardwoods are becoming the predominant species and that a very limited market exists for this timber demonstrates the desirability of the greater use of hardwood for fuel. The shortage could be largely offset by using the fuel which our forests provide. One drawback to the more extensive use of hardwood for fuel has been the method of marketing. Prices are quoted per load, and a load may consist of any quantity, depending upon the dealer. Naturally the public is reluctant to purchase an unknown quantity.

The experience of one consumer with what is known as "millwood" emphasizes this point. The dealer refused to sell it by the cord but quoted it at \$3.00 per load. Measurement of the load disclosed the fact that \$3.00 per load was equivalent to \$28 per cord. On the basis of heat values, this was equivalent to \$56.00 per ton of anthracite. This class of wood was later sold by the municipality at \$7.50 per cord and hardwood (one cord equal to one ton of anthracite) at \$13.50.

One Canadian city has standardized the size of wood delivery wagon boxes. A by-law provides that the capacity of a "double load" box must be 163 cubic feet, which is considered to be equal to one cord of wood as ordinarily thrown in. The box for a "single load" must have a capacity of 84 cubic feet. The by-law also requires that the driver of the wood delivery wagon shall before unloading, advise inspection of the load by the purchaser or his representative. This regulation might well be adopted by all municipalities; it would undoubtedly enlarge the market for wood fuel, as the consumer would no longer be compelled to purchase a load without knowing what quantity he was getting—Conservation.

PORT DANIEL, QUE.

There has just been launched from the shipyard of Charles H. Nadeau, Port Daniel P. Que., a three masted schooner of 350 tons called "Mina Nadeau." This schooner is considered by all who have seen it, one of the finest pieces of shipbuilding, ever seen on the Gaspé Coast.

No expense was spared in making this ship first class in every particular. Masks from British Columbia, all beams and heavy timber Douglas Fir. All iron work galvanized, patent, anchors and chains imported direct from England. Power Engine for hoisting sails and anchors, and for loading and unloading cargo. Cabins furnished in clear birch sheathing and all fittings (rigging and sails of the very best quality, put together by real Nova Scotia shipbuilders. All ship hardware was supplied by The Lunenburg Foundry Co. of Lunenburg N. S. The final touches are being put to the ship and the sails, the Capt. and the crew have arrived from Halifax N. S. and the vessel is being loaded with lumber from the mills of Chas. H. Nadeau for shipment to Havana, Cuba. The last wishes of the whole coast are extended to all who have taken part in the enterprise.

Fishermen

YOU men who spend your days in the bitter cold and your nights in the howling gale — you know the solid comfort and health protection you get by wearing

It keeps out the cold because it is wool underwear—extra good, extra heavy, extra strong, extra warm, and made extra well to give extra long wear.

And the Eureka Trademark means extra value for your money. Look for it on every garment you buy.
