Halifax, N. S.

THE SECRET OF CRISP PASTRY.

Keep three things in view, if you want unvarying success with your pastry—cold water, good shorten-ing, and Blended Flour. Ice water and butter are preferable, but it may be more convenient to use cold water and some other good shortening. But stick to the Blended Flour. It will never fail to give a light, flaky crust-so tender it will break with a breath, and as easy to digest as it is de-

depends on the lightness of the flour-that is, the crispy flakiness percentage of starch. Ontario fall wheat contains all the requisites for light pastry, cake and biscuits, while Manitoba wheat has the heavier properties required in a strictly bread flour. Combine the two, and you will get a perfect flour, that has the full rich flavor and delicacy of Ontario fall wheat, and the strength of Manitoba spring wheat—an ideal

With ordinary care in mixing and rolling the dough, Blended Flour will give you the most delicious pastry you ever ate. Many millers are now blending these two grades of flour scientifically, so do not attempt to do the blending get just the right proportions. 23
