WORLD'S RECORD BROKEN BY TANLAC

Over One Million Bottles Sold First Ten Weeks of This Year

Tanlac has brought a new romance to the commercial world. It is the story of an acceptance and appreciation of merit never before attained by a proprietary medicine. Staid business men to whom the actual figures of the production of Tanlac have been presented have scouted them until the proof was shown. The production of Tanlac now stands at the rate of almost four million bottles per year. The exact figures are 3,992,800. The sale of a million bottles in the first nine months, which far exceeded any record ever made by a proprietary medicine, now seems insignificant.

OVER 17,000 BOTTLES A DAY

Sales this year bid fair to smash all previous records, as the sale for the first ten weeks of this year amounted to over One Million bottles, an average of over one hundred thousand bottles per week, which is at the rate of more than seventeen thousand bottles per day. It seems almost incredible, but these are actual figures and such is the record established by this wonderful medicine. "One firm alone", said Mr. G. F. Willis, the international distributor of Tanlac, "has given orders for a total of 150,000 bottles within eighteen months' time. The firm I refer to is the Spurlock Neal Co. of Nashville, Tenn. Mr. C. S. Martin, president of this great firm, who is also the Southern Drug Jobbers' association, will verify this statement.

"Tanlac is the result of many years of arduous study Mr. Cooper and his principal chemist. In fact, the two of them have carefully watched its development from the beginning of the experimental stage to its present state of efficiency. So remarkable have been the results obtained from this medicine that I doubt seriously if either of these men realize the immensity of their success. Like many other great discoveries, it has required time to prove its far reaching effects."

JACOBS PHARMACY CO.

Tanlac, the Celebrated Medicine Which Has Been Accomplishing Remarkable Results in the United States and Canada, Will Now Be Sold in Bridgetown and throughout the Province. Remarkable Sales Record of Twelve Million Bottles Phenominal and Unprecedented.

Tanlac, the celebrated medicine which has been accomplishing such remarkable results throughout the United States and Canada, and which has been having a phenomenal sale wherever it has been introduced, will now be sold in Bridgetown, the exclusive agency having been awarded to S. N. Wear. The amazing success achieved by this medicine in only four years' time is not only phenomenal, but unprecedented.

The discovery of Tanlac, the beginning of its manufacture, the establishment of the large and modern laboratories at Dayton, Ohio, occupying more than 60,000 feet of floor space, reads more like fiction than facts from latter-day commercial history.

Twelve Million Bottles Sold in Four Years

Although placed on the market but little more than four years ago, over twelve million bottles have been sold, and its sales record has never been equalled in the history of the drug trade in America. From coast to coast and from the Gulf to the Great Lakes, Tanlac is known and honored. Millions have taken it and have pronounced it the greatest medicine of all time. No matter where you go throughout the United States, whether East, West, North or South, Tanlac is a household word and is now unquestionably the most widely talked of medicine in the world today.

Briefly, this is the record of the truly marvelous medicine which will now be placed within the reach of every one. In only a few weeks' time it will be placed on sale in practically every large city, town, village and hamlet throughout the entire section.

U. S. To Build Gigantic Ship

WASHINGTON, D. C., July 24—Two gigantic ocean liners larger than any ships now afloat and designed to cross the Atlantic in four days, are to be built by the Shipping Board. They will be one thousand feet long and of thirty knots speed, and will be equipped for use as commerce destroyers in the event of war.

Announcement was made today by the Board that plans for the ships had been completed and that work on them would be started in the near future. It is proposed to provide a special terminal for them at Ford Pond Bay, Long Island.

The ships, which are built under the supervision of the Navy Department, will be fifty feet longer than the *Lesvianthian*, now the largest ship afloat and will have a gross tonnage of 35,000. Their draft will be 35 feet depth 74 feet, beam 102 feet, and accommodations will be provided for one thousand saloon passengers, eight hundred second cabin passengers, and twelve hundred steerage passengers, with the crew, which will number 1,600 officers and men, and the ships will be of the oil burning type, with a cruising radius of seven thousand miles, which will enable them to complete a round trip on the Atlantic without loading fuel overseas. They will be driven by four propellers, on which will be thrown the strength of 170,000 horse power.

Is Government To Take Over Flour Control?

Winnipeg, July 30—The Tribune, today, published the following: "Following its action Tuesday in taking over control of the 1919 wheat crop, the Dominion government is to take over control of flour, grain exchange firms learned today from their Ottawa agents. They expect official confirmation of the private messages at any moment.

"The government intends to establish a minimum price for flour and to buy and sell both commodities by a similar arrangement. Members of grain companies believe the government's action will reduce the cost of flour to consumers and lead the way towards a general reduction in the cost of living."

RECORD MAIL LOAD ON THE ADRIATIC

Sixty Eight Hundred Sacks of Which 4200 Are for Halifax

NEW YORK, July 30—According to cable advices received here today the steamship *Adriatic* of the White Star Line left Liverpool July 28 for New York via Halifax, with 6,853 sacks of mail, said to be a record number for one ship.

The *Adriatic*, which is the first trans Atlantic passenger ship to leave Liverpool since the settlement of the strike of 20,000 dock workers there will call at Halifax and leave 4,200 sacks of mail at that port before coming to New York.

Baby's Great Danger During Hot Weather

More little ones die during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach troubles come without warning, and when a medicine is not at hand to give promptly the child's delay too frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the house where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes suddenly the prompt use of the Tablets will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Keeping It For His Funeral

He was not a good card player. He admitted it. But there was no reason why his partner should be so disagreeable whenever he made mistakes. After a particularly glaring error the pestering partner turned on him.

"Why didn't you follow my lead?" he asked.

"If I followed anybody's, sir," exclaimed the novice, hotly, "it certainly wouldn't be yours"

"His partner snorted and subsided. But in the next hand he threw down his cards in desperation.

"Look here!" he cried. "Didn't you see me call for a spade or club? Have you no black suit?"

"Yes, I have," cried the novice with warmth. "But I'm keeping it for your funeral."

Tons of Eggs and Fish Destroyed

WINNIPEG, July 23—Winnipeg housewives are paying 55c. a dozen for eggs, but the City Health Inspectors dumped today into the incinerator four and a half tons of eggs, and over a ton of fish, seized in three cold storage warehouses, found unfit for food.

The Quickaction Chemical Fire Extinguisher

THE GREATEST "SAFETY FIRST" INVENTION OF THE AGE

The Quickaction Chemical Fire Extinguisher is the result of years of study, and while being the product of a master inventor's mind, is so simple to operate that a child can use it. This new scientific method fights fire in a manner that water has never been able to do. Its method is altogether different and much more effective. The Quickaction, which is charged with a powerful chemical, does its work by chemical action entirely. By air pressure applied through a single stroke of the powerful force pump a strong, swift stream aimed directly at the fire goes straight to the base of the flame. Chemical action then gets in its deadly work of extinguishing the blaze by choking off the supply of oxygen from the surrounding air. Life cannot exist without oxygen, neither can fire burn.

The Powerful Chemical used is Safe, Harmless, Positive. Having secured the agency for this wonderful invention described above, I am prepared to take orders immediately. Goods delivered from two to three weeks after order is taken. The price of the Extinguisher is \$1.50. My plan is to accept 75 cents, or half of the total price, with order, and the balance on delivery of Extinguisher. In this way we both give some security. Those ordering by mail must enclose \$1.00 with order to help pay postage, etc., and remaining 50 cents on delivery.

Hoping the public will see the wisdom of having one of more of these wonderful Chemical Fire Extinguishers in their homes, shops, offices, etc., I will be expecting a fair share of your patronage. Sample shown on request.
