

trustworthy. The difficulty in ascertaining the facts has been an obstacle in the way of the conscientious historian, while the historian whose prejudices were invincible might arrange the facts to suit his purpose without fear of detection. By publishing facsimiles of the original documents in the archives of England, France, Holland, and Spain, Mr. Stevens has enabled any intelligent reader to understand the manner in which the struggle for independence was begun, continued, and concluded."

THE CRITIC, NEW YORK:—"We have given but a slight idea of the richness of the contents . . . much of which has never been printed. We need hardly refer again to its undoubted value to students of history."

THE CRITIC:—"The seventeenth volume of Mr. Stevens's 'Facsimiles of Documents in European Archives Relating to America' is the most interesting single volume yet published, and, as it is complete in itself, it will doubtless attract the attention of many who may thus be led to subscribe for the whole work, and in so doing aid the most important enterprise now on foot relating to American history."

THE CRITIC:—"Mr. Stevens's work grows more interesting with each volume, for not only are these facsimiles of high importance to the American historian, but they will be found fascinating and instructive reading by all who take an interest in that history which is 'past politics.'"

THE NATION, NEW YORK:—"There can be no question of accuracy in copying or proof-reading, and the student has the advantage of seeing the exact handwriting, erasures, interlineations, and signatures."

THE NATION:—"The entire frankness [of these documents] and want of the least savour of international ethics are cynically destructive of some of the illusions which still hover about an American idealization of the Revolution."

THE NATION, Notice of vol. xxi:—"It seems a fitting moment to speak once more in praise of the performance as it advances towards completion. Not only is the interesting character of the documents fully maintained . . . but there is no discernible falling-off in the quality of the paper, or in the well-nigh faultless execution (in facsimiles) of the originals, and of the clear and beautifully written translations. The technical effect is brilliant and stately—a thorough and careful piece of workmanship."

THE CHURCHMAN, NEW YORK:—"A phenomenal work . . . a library of our revolutionary annals in itself."
