From the True Tablet.

On the 10th inst. a solemn festival was celebrated at Lisbon, in the ancient Convent of Jesus of the third order, in token of thanksgiving for the establishment of the Association for the Propagation of the Faith in Portugal. The Bishop of Cape Verde was the celebrant. The church, which is one of the largest in the metropolis was filled with persons belonging to all grades in society. Several English missionaries assisted in one of the choirs. The utmost devotion was manifested by all present.

An individual named Strubel, residing at Muri, exclaimed, in the hearing of several persons who had just purchased some of the property of the convents at a public sale, "I should like to know which of us the Devil will have first." The jest was relished at the time, but three days after Strubel died in a fit of apoplexy without having received the sacraments of the Church.

MOUSE EYE.—A letter from Catania, after repeating the facts we have previously quoted from other sources respecting the late eruption, says, "On the night of the 26th a

new and wonderful spectacle was presented to our eyes by the centre of the crater, which was at the moment throwing out flames with less violence. We observed therein a new cone of burning matter, which crumbled into pieces by the action of the fire in the crater, at the same time clouds of burning matter were thrown out, followed by rushing flames which seemed to set the heavens on fire. Mr. Walkenshaw, who has been for seven years engaged in making inquiries respecting the natural history of Etna, has gone up since the eruptions ceased. It is said that M. von Wurstenberger, a Swiss in the Austrian service, was the first who observed the eruption, he being at the time on his way to ascend the mountain. A second eruption is expected."—*True Tablet*.

A curious experiment is now being made at the head of the Cham Pier—that of raising fresh water from beneath the body of the ocean by means of an Artesian well. It is intended, we understand, to bore to the extent of 70 feet, at which depth the chalk formation will, it is expected, be penetrated and fresh water be obtained, which will be applied to the formation of a *jet d'eau*. This attempt, if successful, will be a most interesting work of art and science, as well as a great acquisition to the Pier.—*Brighton Herald*.

THE best remedy ever yet discovered for WORMS. It not only destroys them, but invigorates the whole system, and carries off the superabundant slime or mucus so prevalent in the stomach and bowels, especially those in bad health. It is harmless in its effects on the system, and the health of the patient is always improving by its use, even when no worms are discovered. The medicine being palatable, no child will refuse to take it, not even the most delicate. Plain and practical observations upon the diseases resulting from Worms accompany each bottle.
