POPULAR SCIENCE.
THE SCIENTIFIC AMERICAN
TO BE GREATLY ENLARGED.

THIS widely circulated and Popular Journal of the
Industrial Arts and Sciences enters its twenty-
second year on the 1st of January next, and the
Publishers propose to signalize the occasion by en-
larging it to the size of the most costly Scientific
Journals of Great Britain, without, however, in-
creasing the subscription price.
It is almost superfluous to speak of the great value
of this Popular and Useful Journal to all classes, and
especially to Mechanics, Manufacturers, Inventors,
Engineers, Chemists, Agriculturists, and all who love to
read of the wondrous progress which now marks
every department of Mechanical Engineering and the
Industrial Arts and Sciences generally.
The Editorial department is ver. ably conducted,
and many of the best writers in his country and
Europe are contributors to its pages. Many of the
articles have the charm of romance about them, and
inspire the mind with noble ideas.

The Scientific American has the largest circulation
of any similar journal in existence but it ought to
have a million of readers in this growing country.
The engravings of New Inventions, Tools, Imple-
ments for the Farm, Workshop and Household are
very numerous and are splendidly executed by the
best artists in the world. This feature of the paper is
very striking, and has won the praise of the united
press of this country and Europe.
Another feature peculiar to the Scientific American
is the official publication of every Patent granted by
the Government Patent Office. Each number con-
tains the weekly issue of Patent Claims, with copious
notices of new inventions, together with Reviews of
Foreign Inventions and Discoveries in every depart-
ment of Science.

Whoever reads the Scientific American is instructed
and entertained, without being bothered with hard
words and dry details.
The American and European Patent Offices in con-
nection with the Scientific American form an immense
Museum of Mechanical Novelties which furnish con-
stant employment to a large corps of Scientific
Examiners who prepare drawings and specifications
for Patents.

Now is the time to send in subscriptions to the
Scientific American, so as to begin with the new
volume.
The numbers for a year make up a splendidly
illustrated volume of 832 pages. Terms.—\$3 per
annum. \$1 60 for six months, \$1 for four months.
Clubs of ten and upward, \$2 00 each; Canadian sub-
scribers, \$3 26 per annum, always in advance. Spec-
imen numbers sent free, also, a pamphlet of advice to
inventors. Address

MUNN & CO.,
