

FOUR CENTS MORE

For No. 1 Cream than for No. 2

The creameries of the country have become so convinced of the increased value of thick cream over thin cream that many of them are paying a premium on cream containing 30 per cent or more butter fat over that containing under 30 per cent.

One of the largest buyers of cream in the West, the Hanford Produce Co. of Sioux City, Iowa, issued this year the following statement to its cream shippers.

"We are going to offer a premium of **4 cents per pound** butter fat for what we term No. 1 Cream.

FIRST GRADE cream shall consist of all hand separator cream which is delivered at least twice a week in winter and three times per week in summer, this cream to be delivered reasonably sweet and testing **30 per cent or more.**

SECOND GRADE cream shall consist of all hand separator cream delivered in good condition not less than once a week or testing **less than 30 per cent.**

Under these conditions creamery patrons should buy only the Cream Separator that can skim a heavy cream. The

United States Cream Separator

can skim a heavier cream than any other and do it **without clogging.** The U. S. has the record of skimming a cream testing **65 per cent.** And remember also that the U. S. holds the World's Record for clean skimming.

It gets the most cream and will deliver as heavy a cream as you want.

Write for a copy of our fine new 1906 Separator Catalogue No. 143. It tells **why** the U. S. can skim the **first-grade** cream; how it made the world's record for clean skimming, and many other things you should know before you put any money into a cream separator. Write for a copy to-day—do it **now** while you think of it, addressing

Vermont Farm Machine Company

Bellows Falls, Vt.

We probably have a selling agent in your vicinity, and if so, will give you his name when we send you the catalogue. It is his business to show you a United States Separator if you want to see one.
