OLD HOMES MADE NEW.

This design, which is taken from a work entitled "Old Homes Made New," published by J. BICKNELL & Co., New York, is here illustrated to show how the old style of suburban and country houses can be modernized. The roof it will be seen is the principal figure in the alteration, and upon the taste and adaptation of it to the style or form of the old building, will depend the architectural effect produced after the alteration has been made.
