

of vision acutely. At that age no glasses will enable them to keep their heads in one position in front of both cases and see *all* parts of the field with anything approaching distinct vision. They are obliged to approach and withdraw the head from time to time in their search for diphthongs and other unusual characters. For them more than for any others should spectacles, illumination, shades, manuscript, etc., be so arranged as to conserve the failing visual power.

*(To be continued.)*
