The Canada Lancet

WRITE FOR OUR SPECIAL CLUB LISTS.

Address—

Business Manager, Canada Lancet,

24 Wellington Street West, TORONTO

UNIMPAIRED BY AGE

We make no criticism against pills made by the **Mass Process** when for **immediate use**.

We do criticise this process, however, where pills are made, then coated with Sugar or Gelatine and kept for an indefinite time.

All mass pill manufacturers claim prompt disintegration for **freshly made** pills, but after they become old, a prominent mass pill maker says with considerable pride :

"Many Mass Pills in our possession made ten years ago, and as **hard as bullets**, we have yet found to disintegrate in less than **twelve hours** when placed in cold water."

Prompt when Fresh. Twelve Hours when Old.

Age has no deteriorating effect upon Upjohn's Friable Pills. Their quality of presenting the drug to the digestive organs in a form offering least resistance to assimilation is one that stands unimpaired by age.

Catalogue with over 600 formulæ, also samples on application to

GILMOUR BROS. & CO., Sole Agents, - - Montreal.

UPJOHN'S FRIABLE PILLS.
