*William Cookson*  
Vice-President, Marketing

Caledon Laboratories Ltd., a Canadian company founded in 1971, specializes in the purification of solvents.

Caledon uses a variety of batch and semi-continuous distillation units constructed of glass and glass-lined steel for the purification of approximately 50 different solvents. Azeotropic distillation, together with several unique physical and chemical purification techniques are utilized to produce ultra high purity solvents that are individually lot analyzed in batches of up to 2,000 litres. As well, Caledon's production process can accommodate special customer requirements.

*Dr. Jeremy Clapp*  
President

Canadian Bioclinical Ltd. was originally incorporated in 1976 as Radio Immuno Assay Inc. The company manufactures products used in diagnostic laboratories. Although the main product line is liquid and coated tube radioimmunoassays, Canadian Bioclinical now produces enzyme-based immunological tests for both the medical and veterinary laboratories.

*The biological containment hoods manufactured by Canadian Cabinets Company Limited ensure a high degree of user/product protection for the handling of low to moderate risk biological agents.*

Canadian Bioclinical also supplies highly purified proteins that are used by scientists to mix their own diagnostic reagents. In addition, the firm offers custom iodinations and enzyme coupling to proteins.
