

- a. where there is an Australian Approved Name the ingredient must be identified by that name;
 - b. where there is no Australian Approved Name the name provided on the label shall be a name approved by the Secretary to the Department of Community Services and Health; and
 - c. where an active ingredient is of herbal origin the internationally recognised botanical name (Latin) shall be stated.
3. The quantity or proportion of all active substances in the product.
 4. The name of the dosage form.
 5. The quantity of the goods in the package.
 6. Warning statements, if any.
 7. The Batch Number of the goods immediately preceded by the words Batch No. or the symbol (B).
 8. Expiry date in approved format.
 9. Storage conditions.
 10. Directions for use.
 11. The name and address of the Australian distributor. This must include street name and street number. Post Box numbers or codes are not acceptable.

ALSO

12. Under the terms of the Commerce (Imports) Regulations labelling must include the name of the country in which the goods were made or produced, in prominent and legible characters.

Applicants should read the above details in conjunction with Therapeutic Goods Order No 22 as there may be other requirements on certain types of goods.

WEIGHTS AND MEASURES

The metric system is the official system of weights and measures in Australia. Substances should be labelled in descending order of weight or volume.
