

9. In addition to the annual review meeting, special technical meetings may be arranged as required for carrying out the objectives of the programme. Information meetings may also be held to assist in the consideration of future Canada-United States co-operation in crop evaluation programmes.

10. Consistent with applicable laws and regulations, materials exchanged under items 4 and 6 in support of this joint programme will be disseminated to third countries only with the agreement of the furnishing agency.

11. Recognizing the historical commitments of both countries to share the benefits of space research, and consistent with respective national regulations as referred to in item 7, and as limited by item 10, the participants will share the results of this joint programme with the international community. Each country may provide the FAO, WMO, World Bank and other interested agencies with periodic reports on the results of its respective experiments.
