

PROFESSOR MACOON.

His Return From Exploring in the North-West.

FAVOURABLE REPORT OF A NEW DISTRICT.

(From Our Own Correspondent.)

OTTAWA, Oct. 29.—Professor Macoon, of the Dominion Exploratory Survey, who recently returned to this city from his summer's exploration trip, was fortunate enough to discover evidence of the richness and fertility of some regions not hitherto explored. It will be remembered that hitherto for several years Professor Macoon has examined the prairie country to the southwest in the Canadian North-West. This year he was commissioned to explore the Porcupine and Mack Mountains, the Red Deer, and Swan Rivers, and generally the country north of Fort Polly. For this purpose he left Winnipeg on June 1st, travelling by way of Lakes Manitoba and Winnipegosis and the Deer River to Fort Livingstone. He explored the country on the banks of the Deer River, crossed the head waters of the Swan River, and thence on Livingston to Fort Livingstone from which point he descended the Assiniboine by boat to Winnipeg, where his place was reached on 30th October, after an absence of four months.

STANDPOINT OF THE OBSERVATION. As is well-known Professor Macoon's examination is made from a natural history point of view, determining the soil and climate from its fauna and flora. In this season's exploration the district traversed was almost entirely a thick forest, with trees of large size, much superior to those before seen in the North-West. The exception to this rule was in the marshy districts along the base of the Mack and Porcupine Mountains. He found a rich soil, and the climate equal, if not superior, to any part of the North-West before explored by him, and he believes that up to latitude 55 in the direction of his explorations everything that will grow in Manitoba may be expected to grow in this district.

WATER AND SOIL. The Red Deer River was found to flow through a fertile valley, though the dry land along it available for agricultural purposes was not of very great extent. In the district of Fort Polly, Prof. Macoon is of opinion that the climate is well suited for agricultural purposes. Crops this year are of a superior character, and include all kinds of grain and the usual field and garden vegetables. Even Indian corn was reaped this season. Good crops of wheat, rye, and barley were raised, and the soil was found to be very rich. In the district of Fort Polly, Prof. Macoon is of opinion that the climate is well suited for agricultural purposes. Crops this year are of a superior character, and include all kinds of grain and the usual field and garden vegetables. Even Indian corn was reaped this season. Good crops of wheat, rye, and barley were raised, and the soil was found to be very rich.

INCIDENT. An incident of his trip, Prof. Macoon observed the unusual height of water in Lake Manitoba and the overflow of the marshes along its shores. This he attributes simply to the unusual rainfall of the past four or five years. The water in Lake Winnipegosis was found to be equally above its former level, and Mr. Macoon believes that a series of years come round which would give only the average amount of rainfall these lakes would shortly reach their former levels. It has been known for a good many years that great deposits of alluvial sand, gravel, and pebbles were scattered along the shores of Lake Winnipegosis, and Prof. Macoon during his recent trip met with many salt springs that he was led to believe that for a distance probably of 150 miles along the lakes in a north and south direction.

IMMENSE QUANTITIES OF SALT exist. The salt obtained by evaporation from the water of three of the springs, like that which he obtained from the Athabasca some six years ago, was remarkably pure. Some of the salt and specimen fossils obtained during the summer's exploration are placed in the Geological Museum here.

HOW TO ESCAPE SUMMER FEVERS. Mr. Macoon gives the following hints on this point: "My delibated opinion is, after having many years in the country, and having watched the climate carefully, that if farmers could be prevailed upon to sow their wheat some time after the 15th of October, so that it would not germinate that fall, that throughout the whole length and breadth of the North-West complaints as regards summer fevers would cease, as the grain would be past injury before frost came. It should be hard enough by the 15th or 20th of August at the latest to resist injury by frost, and would in every case if farmers could only resist the idea of early sowing. At the time above mentioned there is always a sufficient frost to keep the soil temperature, and the average never rises so high again for the season, or, in other words, the average temperature falls about 10 degrees, and as soon as that takes place quick ripening ceases, and farmers must then wait a long time before their grain is fit to cut, and severe frosts come down in the meantime their crops are destroyed."

RESULTS OF THE EXPLORATION. The party travelled chiefly by water, and explorations on land had to be made on foot, riding, considerable hardships and exposure, often walking through swamps, favouring the flocks, with frequent exposures to storms and constant annoyance from mosquitoes. Nevertheless the party maintained good health and capital appetite, the latter almost never being on a new danger by exhausting their supplies of provisions before they had reached Fort Livingstone. Fortunately the entire trip was made without serious sickness or accident, except the accidental shooting off of a portion of Professor Macoon's thumb by the accidental discharge of a gun, as before mentioned in this Globe. There is reason to believe that the full report of the exploration, with the usualy interesting and valuable.

THE FORT POLLY DISTRICT.

A Highly Favourable Report upon it by a Bureau.

OTTAWA, Oct. 31.—Mr. George C. Rainbolt, D.L.S., has just returned from the North West Territory, where he was engaged in surveying township outlines east of Fort Polly. The survey extends from range 10 to range 3 west of the second principal meridian, commencing about 1,150 square miles. He reports that some of the best lands in the North West Territories are in ranges 1, 2, 3, and 4. The rest will be very valuable for grazing lands. This season being an extraordinarily wet one, it would hardly be proper to form an estimate of the value of the country. Timber is plentiful for settlement purposes, and no one of communication is easy. By the adoption of a route through this district the Syndicate will section their line very sensibly. The route from the case the main line will in all probability run through the Polly district.

On Thirty Days' Trial.

We will send Dr. Dye's celebrated Electro-Voltaic Belt and other electric appliances for thirty days' trial to young men and older persons who are afflicted with nervous debility, but vitality, etc., guaranteeing speedy relief and complete restoration of vigor and manhood. Also for rheumatism, neuritis, paralysis, liver and kidney diseases, rickets, and many other diseases. Illustrated pamphlet free. Address: Voltaic Belt Co., Marshall, Minn.

FINANCE AND TRADE.

Canadian Stocks Active and Higher.

NEW YORK STOCKS UNSETTLED.

All the Grain Markets Lower.

Toronto, Oct. 31, 7 p.m. STOCK MARKETS. The stock market this morning was fairly active, and with the usual fluctuations, closing bids of banks who from 10 to 12 1/2, and of Saturday. Montreal rose to 120 1/2, an advance of 1/2, and Toronto was 119 1/2, without transactions in either. Ontario fairly active and easier, with sales at 93 and 93 1/2, the stock closing at 93 1/2, a decline of 1/2 per cent. Merchants advanced 1/2, Commerce was lower, with sales of eighty two shares at 143, and closing at that price bid. Dominion was the most active stock and prices show another advance; sales of seventy shares in two lots were made at 141, 139 1/2, and 140, and for a 100, 139 1/2, and 140, the stock closing at 141 1/2, higher than at 141, and higher after a sale of twenty shares at 142, the stock closing at 142 1/2, but holders asked 144. Commerce steady, with a sale of twenty shares at 112 and closing at that price bid. Mechanics was held at 115 1/2, without bids. Insurance stocks dull and unchanged, with the exception of British American, which offered at 113 1/2, a decline of 1/2, with buyers at 113. Dominion Telegraph offered at 97, and Montreal was 123 1/2, without transactions. Loan companies successful and firm generally. Canada Permanent was 100 1/2, without bids. Canadian Loan was 100 1/2, without bids. Dominion was 100 1/2, without bids. Loan companies successful and firm generally. Canada Permanent was 100 1/2, without bids. Canadian Loan was 100 1/2, without bids. Dominion was 100 1/2, without bids.
