**Business**.

bollers. They are running a six-drill com-pressor and are adding six drills, and have three hoists. In Shaft No. 6 they are down 135 feet; at the first level have 80 feet of cross-cutting, and at the second level have dome 298 feet of drifting. No. 4 and o shafts are down 85 feet, with connecting duft. Last year the Bifalo ranked as the second shipper in Cobait. Their output was 920 tons. At the Amalgamted they have been sink-ing off their vein. The intention is to crosscut at the 100-foot level and catch the vein. This crosscut was started yesterday, and they will probably have to go between 80 and 40 feet to reach the vein. When this is done it will only be a matter of a few weeks before the Amalgamated will join the shippers. **New Bollers at Conlagas.** At the Conlagas, the new bollers are on Camps Not Only Busy, But Other Centres Are Doing a Hustling

THE TORONTO WORLD

New Bollers at Coniagas, At the Conlagas, the new bollers are on the ground and have steam up, and are only awaiting the arrival of the compressor to get to work. They have been working by hand-work for the past three weeks, as their air-line from the Trethewey com-pressor has been shut off. The Cobait Lake is erecting derricks and steam hoists on their shafts. At the Rightof-Way, the shaft on the Timmins vein is down 40 feet, and No. 2 shaft, which will be one of the largest in the camp, is down 50 feet. When they reach the 100-foot level they will crosscut to the vein beneath the railroad track, and expect to prove the continuation of the Cobalt. March 3 .- (From the Man on the Spot.)-"One five-stamp mill - (complete), one 20 h p engine one 25 h.p. locomotive type boiler"-the above machinery has been ordered by Messrs. Marskey & Ulrey for their Larder Lake properties, which, to the

mining world in the future, will be known as the "Larder Lake Proprietary Mines." These gentlemen are determined that, not only in point of date of discovery, but in-

At the higheory way, the shart on the Three portients are determined that, not only in point of date of discovery, but in plant, they will be in the lead. In discovery, but in plant, they will be in the lead. In discovery, but in the possibilities, it must not be forgot ten that two years ago claims were staked out on Larder Lake, but they were not recorded. In April and May of 1906 a Stadburg bunch of prospectors was on the gold ridges that overlook this beautiful norther the stake, and two wanted Rhinaldo McDonnell is discrict, having been brought here they were closely followed by Russell Cryder Mines, was the first of the south out carlous as the summer in the worked this property to be developed by the shore of the ears study of the formation, and staked and did they were closely followed by Russell Cryder Mines, and who had charge of a party of property for the expanse of taking out as the first log they making a careful examination and they followed by Russell Cryder and who had charge of a party of property for the boddings of the formation, and staked and did they for the formation, and staked and did they for the fold Ridge. Map showing location of the Silver Mountain Mine beside the University Mine.

The Property of the Cobait Silver Mountain Mining Company, Limited, is located in the heart of the richest silver belt in the world, and consists of twenty acres.

It is surrounded by five of the best and richest shipping Mines in the Cobalt Camp, viz., The University, Balley, Pig Pete (or Cobalt-Central), McKinley-Darragh-Savage and Silver Bar Mines, and it is also adjacent to the famous Gillies Timber Limit and only a few hundred feet from the Nipissing and Foster Mines, as shown on the map.

The Silver Mountain Co. has the best located and most promising undeveloped property in the Cobalt camp to-day and the men most largely interested in the company comprising some of Cobalt's largest mine owners and some of the best-known and most influential men throughout Canada, including over a dozen members of parliament, confidently expect that

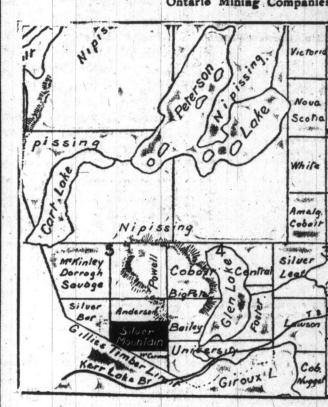

## THE SILVER MOUNTAIN CO.

## Will Be Just as Large a Shipper as the Mines Adjacent to it in a few Months

Mr. C. E. Kingswell, one of the best engineers in the Cobalt camp has made an extensive report on the property, and the company will gladly send a copy of same to anyone interested, upon request. He says in his report among other things:

ragh-Savage Mines and within two lots of the Nipissing, all of which are among the most famo mines in the camp. The property lies wholly in Diabase, and has thirty-eight veins so far discovered, and these veins form a perfect network all over the property. I carefully assayed this property some time ago, and never failed to get silver in any assay I took. The famous timber limit lies immediately southeast of this property, and borders it, and upon this limit the government are now working a very good mine, and this mine lies only a short distance from your property. Near your property and the timber limit a good smaltite ledge was discovered last June by the foreman of the Silver Bar Company, and this lead runs directly into your property. I know veins on your property that carry very much better ore than ever the Big Pete did at the start and no attempt has been made to follow these leads down. One ledge on your property has been explored for four hundred feet, and this ledge in places is quite four inches wide and it carries nine ounces of silver to the ton. Every ledge upon your property has good true walls, and they are all free from the walls and have every sign of permanency and value; and my humble opinion is, that if a shaft was put down to a reasonable depth good paying ore would be found, and you could cross-cut to strike other ledges. I have explored and reported upon most of the good mines here and also upon a large number of prospects, and have never yet inspected one with as many leads as yours has and I consider that it would be a freak of nature if your claim does not prove a good payable one. The fact that the Balley Mine, which adjoins your property, and the Big Pete Mine, which is within one lot, are both located on this same Diabase hill on which your property is, and the fact that they are two of the best mines in the camp, is one of the greatest proofs to my mind that your lot will be found to contain the same kind of ore as is being shipped from these mines." -C. E. Kingswell, M.E.

### THIS IS A CHANCE OF A LIFETIME.

THE PROPERTY OF THE SILVER MOUNTAIN CO., HAS NEVER BEEN DEVELOPED. THOUGH SOME

## Thirty-eight Veins Carrying Silver Have Been Discovered on the Surface

And all the property should need to bring it to the shipping point is some development work.

## The property has been completely paid for with stock of the company, and not one dollar is required except for development purposes.

Just about a year ago, as you know, a block of stock of the Foster Mine, a close neighbor to The Silver Mountain, was offered to the public for 80 cents per share in order to raise money for development work. You know also that this stock has sold since for over \$4.00 per share and can be sold to-day to vield an immense profit to the original purchasers.

BUT REMEMBER it is the man who bought the stock when first offered who made the most money. NOT the man who waited until it reached somewhere near its real value. Please remember the above and read the following offer:

THE SILVER MOUNTAIN CO. IS PREPARING TO COMMENCE OPERATIONS ON ITS PROPERTY ON A LARGE SCALE

And needs some working capital, consequently the directors have decided to offer for public subscription a small block of stock at

## A SPECIAL PRICE OF **SIXTY CENTS PER SHARE**

Cash with subscription. This is the first and only allotment which will be offered to the public at this price SUBSCRIPTIONS FOR ANY NUMBER OF SHARES WILL BE RECEIVED UP UNTIL NOON ON THE 15TH DAY OF MARCH, 1907, and the directors reserve the right to refund all over-subscriptions as soon as the necessary amount has been subscribed. Subscription will be accepted according to the order in which they are received, whether by wire or letter, and may be sent direct to the secretary of the company, 95 Sparks Street, Ottawa.

If you have any faith in Cobalt you will get some of this stock and get it at once, for to-morrow may he too late. Opportunities like this only come once. We believe if you know anything about Cobalt, we have said enough, and if you want to learn more, we will be glad to tell you all we can. Send in your wire for reservation of stock, and your subscription to
