

Excellent School Suits

Every school boy must be outfitted now for the fall term. Boys—the right kind of boys—boys with plenty of life in them—need Suits of cast iron to withstand the service given them.

Here's where we have a word to say. Boys' clothing to wear must be well made, of good materials, but all the superb fabrics in the world won't give service if the places where the strain comes are not reinforced and properly sewed.

Because our boys' clothing is so made, we say it is

ROGERS NOT PLEASED WITH INDORSATION GIVEN TO BORDEN

Speaks of Caucus at Ottawa to Friends—Fusion Dying Out.

(Special to The Advertiser.) WINNIPEG, Aug. 30.—The party fusion movement is dying a natural death in this city and province. South Winnipeg electors, who took the lead and formed two committees, have made no progress lately, and no date has been set for the joint meeting to select a candidate. It looks as if all was "in the air." Selkirk and Morris are the only two seats where the idea has any strength. Indications are that it will summer down to a straight party fight at the elections. That is what W. J. Bulman, president of the Manitoba Conservative Association, predicts. Hon. Robert Rogers is pleased at the

way fusion is dying out. He returns to Ottawa Sunday. To friends he stated he was not pleased at the outcome of the Conservative caucus in Ottawa. There are rumors here that there is considerable dismay at Ottawa over the mysterious disappearance of the Conservative campaign fund.

NEW YORK, Aug. 30.—A Swedish ship, outward bound for a Swedish port, was boarded by Government officials today and, according to reports, two hundred tons of copper were found in the hold. The vessel was ordered to return to her dock, and it is said the entire cargo will be searched before she is again allowed to proceed.

SUBSTANTIAL DROP IN PRICE OF FLOUR FOR UNITED STATES

Government Names \$2.20 As Figure for No. 1 Spring Wheat.

Minneapolis, Aug. 31.—Substantial reductions in the price of flour, and fair returns to the producers of wheat, will result from the fixing of \$2.20 as the price for No. 1 northern spring wheat at Chicago, in the opinion of local millers and grain men.

The price of \$2.20 for the best grade of spring wheat at Chicago means that the price in Minneapolis will be \$2.14 or \$2.15 a bushel, according to the grain men here. General satisfaction with the grain trade in general.

"The price fixed will naturally mean some reduction in the price of flour," said John Crosby of Washburn-Crosby Company. "We cannot say how much flour will be reduced in price. It all depends on the Government. The government will determine finally how much we are to be allowed for cost of manufacture, the price we are to receive."

Millers will be satisfied with whatever the Government determines is right. A. C. Loring, president of the Pillsbury Flour Mills Company, said that a reduction in the price of flour was the logical result to be expected.

A cable message to the owners reports all the members of her crew have been saved except six. The message indicates, the owners said, the vessel was sunk about three days ago.

WEARING FOE DOWN FOR DECISIVE BLOW, MAURICE ASSERTS

British Recorder Looks Confidently for "Second Phase of War."

LONDON, Aug. 30.—"The last week has been marked by a pause on all the western fronts—a pause which was inevitable after the great successes of the previous week, a pause accentuated by the bad weather, which affected the operations all the way from the North Sea to the Italian seacoast," said Major-Gen. F. B. Maurice, chief director of military operations at the war office, in his weekly talk to the Associated Press today.

"At the moment it is the Italian front where the situation is the most interesting. Here, also, after a really important advance, there now comes a pause, pending the readjustment of the artillery positions. There is much work to be done during these pauses. The problem is whether Gen. Cadorna will be able to get his guns posted for the renewal of the operations before the Austrians get up adequate reserves, some of which are being brought from the Russo-Rumanian front. That is the problem in the pauses in all these battles—the race between the preparations of offence and defence."

Wearing Down Germans.
"In Flanders the process of wearing down the Germans by continuous bombardment, continuous fighting and continuous infantry raids, is being kept up, and is having a far greater effect than the man in the street realizes. This effect is shown in the constant necessity imposed on the Germans of withdrawing and replacing units. This is to refer to the battles of former times, in which, as the textbooks tell us, the first part of the day's battle was an attempt to break the German line, and later on will come the second phase, to which we are all looking forward with interest."

Looking to "Second Phase."
"So we are now in the second phase of the war, the phase of the German reserves, and later on will come the second phase, to which we are all looking forward with interest."

"On the Russian front there has been another 'regrettable incident,' namely, the voluntary withdrawal of certain Russian units near Czernowitz. The result was negligible, but it serves to show, in conjunction with Gen. Korniloff's speech, the state to which the Russian army has come and makes it even more remarkable that the Germans have been unable to achieve more."

"On the Rumanian front Field Marshal von Mackensen's attack failed, owing to the giant Italian stand, and the necessity of Austrian withdrawals to the threatened Italian front."

"In the last month I have received a remarkable number of letters from the United States, showing how widespread is the belief that the British have let the Allied and colonial troops do most of their fighting. This is the part of the German propaganda in the United States. I have prepared for you a few statistics to show how far this is untrue."

The price in Minneapolis will be \$2.14 or \$2.15 a bushel, according to the grain men here. General satisfaction with the grain trade in general.

BACON, BUTTER, HAM BARRED BY BRITAIN EXCEPT BY LICENSE

King Signs Proclamation Against Imports.

LONDON, Aug. 30.—The King today signed a proclamation prohibiting the importation of bacon, butter, hams and lard, except under license.

The object of the action is to enable the Government to take over the entire purchase of the import articles enumerated, and concentrate the purchase in various countries into a single agency, and will make all purchases through this agency, beginning September 2.

All holders at the present time of cash and cash contracts in bacon and lard with American shippers are required to furnish to the food ministry full information immediately.

Canada Restricted.
Pending further arrangements licenses will be granted certain importers of bacon, ham and lard from other countries, over which the food ministry has no control, and that they must be maintained at a figure as to importation of the regular supply to this country of adequate supplies.

"It should be borne in mind that importers' prices are mainly determined by the market prices ruling in foreign countries, over which the food ministry has no control, and that they must be maintained at a figure as to importation of the regular supply to this country of adequate supplies."

The food ministry is also fixing maximum prices limiting the profits on cheese and butter from September 3.

Loganger of Montreal is likely to be added to it.

The board reviewed the draft of the regulations of exemption, which Mr. Newcomb had prepared, and suggested a number of changes in them. The work of locating the local exemption tribunals is proceeding rapidly, and in the case of some provinces the work has been completed.

In cities there is to be a tribunal for each 7,500 of the population. The province of Quebec will have about a thousand of the local exemption tribunals, and they will be provided in proportion for the rest of the provinces.
