## NEWS OF THE INTERIOR

**Finds and Rumors of Finds, Deals and Rumors of Deals, in the Mineral Districts.**

**Crop Prospects in the Okanagan and Boundary Creek Districts—Floods.**

(Rossland Miner.)  
There is no smoke without fire. Persistent rumors have been floating around for a week past about the erection of a smelter to handle the ores of Trail creek. Three men have been mentioned as the builders and four places designated as the site, and two separate contracts with the Le Roi mine, one of 37,500 tons, another of 75,000 tons, have been reported. All this is a little confusing. Something definite and authentic will probably emerge in due time.

Ore has been found on the Cliff mine assaying \$72 in gold to the ton and 10 per cent. copper. This discovery was made in prospecting the surface of the claim. It is said that no great distance will have to be run to catch the rich ore in the tunnel. The discovery of a big chute of pay ore on the Cliff would do a great deal for the development of Trail Creek, as it would prove the possibilities of the big vein on which the Jumbo, Nevada, Mountain View, St. Elmo Consolidated, Cliff, Eddie J., Monte Cristo and Evening Star are located.

J. B. MacArthur returned from a visit to Nelson and Kaslo this week. He reports a remarkable revival in the outlook round Kootenay lake and particularly at Kaslo.

The mail service is rotten. Sending all letters from eastern points through Nelson is causing insufferable delays. A letter mailed in Chicago on the 8th of May arrived in Nelson on the 14th and in Rossland on the 20th. Another letter mailed in Chicago on the 6th had no Nelson mark and arrived in Rossland on the 20th. This is ridiculous and the sooner J. A. Mara draws the attention and keeps on drawing the attention of the postoffice department to these anomalies the better.

S. M. Wharton arrived in town this week to take another look at his \$100,000 prospect.

The Nelson Miner.  
Hugh Ross left for Victoria last Saturday, where he expects to meet A. H. Harrison; they will go together to Cassiar and stay several months. Mr. Ross was there at a former time, and intends now to thoroughly prove some placer ground which promised well at that time. Wm. Bastill passed through Revelstoke Friday morning with ten cars of cattle and one car of horses, going from Okanagan Valley to Red Deer country near Edmonton. After crossing the Rockies the cattle will be unloaded and driven the balance of the way. There were 250 cattle, many of them being calves.

Last Tuesday night by train from Spokane a number of men and a quantity of supplies arrived for Mr. Porter, one of the sub-contractors on the Kaslo-Slocan railway. The Nelson took up that evening 175 men, 22 horses and several carloads of camp fittings, tools, wagons, and plant of various kinds.

The Rev. Geo. H. Morden returned from Victoria, where he has been attending the Methodist conference on Friday evening. Services will therefore be held as usual in Hume's Hall tomorrow.

Sir Joseph Trutch, chairman of the Hall Mining Company, arrived from England on Tuesday.

Dan O'Brien, one of the owners of the Union, was in town a few nights ago and brought with him some samples of rock for assay; the results of the assay were most satisfactory, being 70 ounces in silver and \$9.75 in gold. The Grand Prize No. 2 also gives good results. Both claims are on the same lead and lie about two miles northeast from Rossland.

The Little May is looming up, late assays calling for 280 ounces of silver and \$15 in gold. It looks as if the camp will be able to supply large quantities of both the precious metals in the future to say nothing of copper and lead. All we want now is a smelter or a railroad company with some "get up" about it. The Corbin outfit is still "footing" along in the usual "overall and tobacco" style and it seems doubtful if they really intend to build the Red Mountain road at all. Indeed, some of "those who know" say that the fact of their making so much fuss about it is good reason for supposing that the road will not be built for a long time.

The Kootenay, Tip-Top and Copper Jack have been bonded to Mr. Humphries for \$75,000, and a force of men are already at work on the Kootenay. The body of ore is well worth the climb up the hill to see.

Above a hundred men, comprising railroad laborers and others, arrived by Wednesday's boat.

Midway Advance.  
Mr. L. Wiseman has made a rich location some three miles up the north fork of Kettle river, the assay returns being \$100 in gold to the ton.

Hamlin Bros., with J. Lynch and Pete Helstab, started last week for the west fork of Kettle river, where the two latter have lately made locations.

The Hidden Treasure, Providence camp, was located May 14th by Hamlin Bros. The ledge is about 4½ feet wide, and contains iron and copper sulphates. The Gold Prop, Greenwood camp, has been bonded by Mr. J. Hetu to Messrs.

Reid & King. This claim is an extension of the Monarch, and the ledge is over 100 feet wide.

A north extension of the Jewel, Gold Drop camp, was located on the 12th of May by Mr. Peterson. The Black Diamond, one mile north of Gold Drop, was located on the 16th by the same fortunate finder.

Boschart and Dittmer are down seven feet on the Gold Drop, sacking the ore as they take it out. The vein is 2½ feet wide with no foot wall. The hanging wall is not yet struck. It is expected that the vein is very much wider, as only 100 yards away it appears to be nearly 300 feet wide. The Idaho, on the same ledge as the Gold Drop, Gold Drop camp, and north of the Golden Eagle, was located May 8th by Mr. J. Lucy.

Hydraulic mining is being engaged in on Salmon river at a point near Rose lake, in the Salmon river valley. The parties expect to make a good clean-up, and whilst the water is being used to make a thorough prospect of their ground, with a view to very extensive operations next year. Placer mining in the province is engaging a great amount of attention at present, and it is reasonable to suppose some at least will be successful.

There can be no doubt but that the rains of the last few days will materially assist the growth of the crops, particularly where irrigation is not practised. Vegetables are beginning to show above the ground, and hay crops look decidedly promising.

The Kettle river last Wednesday rose to within two or three feet of the height reached during the unprecedented flood of last year. This large volume of water flowing at the present time is all the more extraordinary, as the winter was extremely mild, and therefore the snow on the hills not so great as usual.

Vernon News.  
Mr. A. Muir has completed the assessment roll for the current year, and it shows the value of assessed real estate in the city to be \$478,138, and improvements \$117,468, making the available taxable property for the year total up to \$595,606.

Mr. L. W. Shatford, of Fairview, was a visitor to the city this week. He is more than ever convinced of the future prosperity of that camp, which he regards as one of the best in the lower country. He is making arrangements to open up a branch store at Camp McKinney.

Among those who have suffered from the recent overflow of the Mission creek was Mr. W. D. Hobson, whose crop was almost completely destroyed by the flood. A jam of logs and driftwood in the creek was the cause of the outbreak, the dam, built last year, having stood the strain in a manner that shows it to be a thoroughly substantial structure.

Several prospectors are at work on the west side of the Okanagan lake, in the neighborhood of Bear and Lambly creeks. A considerable amount of gold has been taken from the creek, and mineral bearing quartz is plentiful in the district. It is not at all improbable that a rich strike may yet be made in this section.

The recent period of wet weather which has been experienced in this district is without a parallel in the memory of the oldest inhabitants. For ten days it has been rainy and cloudy and the strain in a manner that shows it to be a thoroughly substantial structure. at Quesnelle, taking a few pack animals from this point.

The hydraulic lift pump which is going to Willow river was made at the Walls Iron Works and is similar to the pumps in use in the State of Washington for irrigation purposes. Willow river, where it is destined to do its work, is a slow, sluggish stream that has very little fall for twenty miles. Numerous tributary creeks proved very rich in gold in the early days and wherever the miners could compete with the water in Willow river much gold was produced. But the slow, sluggish nature of the stream precluded only casual diggings and the richest ground, of course, being beneath the water level, was never touched. The big pump is of size to lift nearly whole water, being twenty inches in diameter. It is proposed to sink a shaft, set the pump in the shaft and let it go down with the work, and it is said that no matter how fast the water comes in the pump will keep the shaft and works clear. The plan is perfectly feasible and much is hoped for its operation.

**BRIEF LOCALS.**  
Cleanings of City and Provincial News in a Condensed Form.

From Friday's Daily.  
—Henry Thomas, aged 37, died suddenly of hemorrhage of the brain. Mr. Thomas was for many years employed by Bessinger & Co. Deceased has relatives in Seattle.

—J. E. Chilberg, one of the best known, most popular and most energetic young business men of Seattle, was lost on the ill-fated steamer Colima which foundered off the Mexican coast.

—The funeral of the late Mrs. Mary Millington took place yesterday from the Beaulieu conducted the services. The pallbearers were A. A. McNeil, Thos. Saunders, Wm. White, Wm. Flewin, Alex. Trainer and Wm. Brown.

—The Victoria Hydraulic Mining Co. have 60 men at work on their claim at the Forks of the Quesnelle. The men are under Mr. John Hepburn and are said to be moving earth at a great rate. Mr. Holt, president of the company, is also up there.

—The sealing schooner Shelby will be given a chance to prove her innocence in the admiralty court. The customs say that she will be prosecuted, but they know nothing further. Collector of Customs Mining is authority for this statement. The Hon. C. E. Pooley will prosecute for the Dominion government. That gentleman was asked when the action would come up. He replied that all depended on the defence. To the answer when the writ would be issued the answer was given as soon as he could.

—An unusually large number of whisky cases have been disposed of in the city police court, during the month, due principally to the Indian potluch on the reserve. Twenty drunks, many of them Indians, faced the magistrate; fifteen white men and Chinamen were charged with supplying liquor to Indians, one Indian attempting to do so and seventeen Indians were found with liquor in their possession. The other charges are enumerated as follows: Infraction of revenue by-law, 1; health by-law, 1; sewerage by-law, 2; fire protection by-law, 2; street by-law, 10; park by-law, 1; contraband as necessary witnesses, 6; assault, 7; nuisance, 1; infraction of liquor regulation act, 1; larceny, 4; vagrancy, 4; aggravated assault, 1; malicious injury to property, 1, and housebreaking, 2.

From Saturday's Daily.  
—Owing to the increased shipping at Union the E. & N. R.R. Co. have decided to build a new pier there for the use of the Joas. George McLaughlin has secured the contract.

—The examination for entrance to the High School begins in the High School building on Tuesday next. There will be over one hundred candidates from the city schools and surrounding district.

—The Rev. Mr. Tait was duly inducted into his charge at Comox on Thursday afternoon. Rev. Mr. Rogers of Wellington, addressed the pastor and the people. The Rev. Mr. McIntyre, of Union, preached the regular sermon.

—Customs returns for May at the port of Victoria follow: Duties, \$53,179.06; other revenues, \$7,963.06; total receipts, \$61,142.12. The imports for the month were: Dutiable goods, \$159,766; free goods, \$41,415; total, \$201,181. Exports, produce of Canada, \$119,040; other exports, \$15,656; total exports, \$134,696.

—The collections of inland revenue for May in Victoria division were:  
Spirits ..... \$5,672.45  
Malt ..... 2,534.00  
Tobacco ..... 3,633.75  
Cigars ..... 717.90  
Inspection of Petroleum ..... 79.15  
Salt Liquor ..... 72.50  
Total ..... \$12,710.35

—A. Cunningham and Frank Coombs left this morning for their home at Great Falls, Montana, after a two weeks' sojourn in Victoria and vicinity, combining business with pleasure. Last week they visited Comox in company with Mr. James Dunsen to try a process for removing dirt from coal, for which they have a patent. It is understood that Mr. Dunsen will shortly go east to look into the matter.

—The Wild Swan arrived in port Sunday afternoon. She came up under easy sail, calling in at Monterey and San Diego en route to Victoria.

## WASHED UP BY THE SEA

**J. E. Chilberg, of Seattle, and Three Others Drift Ashore on a Raft.**

**Two Steamers Scouring the Mexican Coast Searching for Survivors.**

Mazatlan, June 2.—Five more survivors drifted ashore at Coahuayana, 60 miles south from here, yesterday. They are: J. E. Chilberg, Louis H. Peters and Enrique Vider, cabin passengers; Fred Johnson, a seaman, and Robert Gonzales, a messboy. They were 30 hours on a life raft, without food or water. They saw the steamer San Juan, but were not seen by the lookouts. Captain Pitts was first attracted by seeing the sea covered with wreckage in which were found the survivors, all of which were nearly naked. Their account was heartrending. Every attention was given them.

A peculiar circumstance in connection with the disaster is the fact that Prof. Whiting, before starting with his family on the Colima, drew up two wills. In one he provided that in case the steamer went down and he was drowned, his estate should revert to the surviving members of the family. In the other he provided that in the event of the death of his entire family his property should revert to his surviving relatives in the east. After executing the two wills, and but a few days before starting on his sea voyage, the professor mailed the testaments to Attorney Brewster of Cambridge, who was a classmate at Harvard with both Professors Whiting and Stringham.

City of Mexico, June 3.—The Mexican government will henceforth take strict cognizance of the manner in which all ships touching at all Mexican ports are loaded. The following dispatch was received to-day at the war department from the captain of the port of Acapulco: "Secretary of War and Navy, Mexico.—The Colima disaster was caused by her heavy deck cargo. As all ships of the Pacific Mail are loaded in this manner and other Mexican boats have the same custom, I beg of you for future incidents on this point. (Signed) M. Isrey, captain of port." Orders will be accordingly issued, probably to-day, to all the principal ports on both coasts to detain in future all national or foreign boats touching at Mexican ports in which the cargo is not properly loaded entirely in the hold.

San Francisco, Cal., June 3.—The Examiner's special from the City of Mexico says rescuing parties are still in search of survivors of the Colima disaster in hopes of encountering more still living who have found shelter in some principal villages. It is believed that many passengers went mad from their terrible experiences and keen bewilderments on reaching land and have gone wandering about the country. As many passengers were unable to speak Spanish they could not make known their position and would be helplessly helpless among simple but kindly Indians along the coast country. It would not be strange if some inland rescues are made during the early part of the present week. Survivors who have reached Manzanillo say Captain Pitts of the steamer San Juan should be discovered at least two days longer on discovery of the wreck, and believe that a good many others that could have been picked up have since perished. There are hopes that others may have reached shore at Point San Selo. The steamer Mazatlan returned to Manzanillo from the wreck yesterday. She discovered a party of survivors on the beach from the second life raft and sent a boat to bring them off. It was captured in the high surf. The men are supposed to have reached the shore.

The wires are down between here and Coahuayana, and a man has been sent on horseback 90 miles down the beach for news. The first of the raft survivors reported seeing a woman's head with long black hair ashore. The body had been cut off by wreckage or eaten by sharks. Steamers Rubico and Barracota are still searching for survivors. If any more are found they will be brought to Manzanillo or taken to Acapulco.

San Francisco, June 3.—The Chronicle's City of Mexico dispatch says the five men who were seen yesterday on Black Point by the steamer Mazatlan have been rescued by an overland party. Their names are Antonio Ramirez, J. O'Neill, J. A. Selig, Joseph Morrill and C. H. Cushing.

**Law Intelligence.**  
Ah White, a Chinaman, charged with unlawfully wounding a Greek named Karpert, pleaded guilty this morning before Mr. Justice Drake and was sentenced to one year's imprisonment. The deputy attorney-general appeared for the prosecution and J. A. Aikman for the defence.

Justice Drake heard the following applications in the supreme court chambers this morning: A. L. Aikman applied for speedy judgment. A. L. Aikman contra. Order refused. Costs in the cause.

Denny vs. Sayward—Crease (Bodwell & Irving) applied for delivery of a bond given by Walter Chambers and W. P. Sayward as security for the plaintiff's claim. The plaintiffs now have judgment and intend to sue on the bond.

## DANGEROUS TO MARINERS.

**Captain Walbran Will Report on Hidden Obstructions in the North.**

The Quadra brings back an interesting budget of news. She arrived in port this morning from Alaska. On the way she called in at Port Simpson, Juneau and Sitka, and on May 13th landed at Yakutat the Canadian survey party, headed by Mr. Brabazon. The party will make a survey this season of Yakutat and Disenchantment Arm. The weather at Yakutat was very bad. The Quadra put in at Port Conclusion, the furthest northern point reached by Vancouver in his last voyage in Northern Pacific waters. At Ship's Cove in Port Conclusion Captain Walbran nailed on the trees a sign of interest to every lover of travel and history. The sign read: "Captain George Vancouver, R. N., H. M. S. Discovery and Chatham, finished the survey of these waters at this (Ship's) Cove Aug. 22, 1794."

The Quadra left Yakutat on May 17 and made Port Simpson on May 19 and worked on buoy relief. Two large steel can buoys were placed at Hodgson reef, near Simpson, and at Alford reef, near Metlakatla, in lieu of the two spar buoys Captain Walbran inspected the hidden rocks at Plummer Bay anchorage, Ky-numpt harbor, Hidalgo Point and Hornada. He has prepared an extensive report which will be forwarded to the marine department. The obstructions at Kynumpt harbor and Hidalgo Point are the most dangerous. The Kynumpt rock is 9½ feet deep at low water, and is not where it is shown in the admiralty chart. At Hidalgo Point there is a wash at low water and the chart marks it deep water. The trip, on the whole, was a pleasant one, though some bad weather was experienced.

## MDICAL.

**Consumption.**  
Valuable treatise and two bottles of medicine sent Free on Receipt of Name and Address to: DR. J. C. BROWN, 150, Toronto, Ont.

**SEE THAT OFF HORSE?**

Only three weeks ago we began mixing a little of **Dick's Blood Purifier** in his feed and now look at him. I tell you there is no **Condition Powder** equal to **Dick's**.—Am going to try it on the high one now.

**Dick's Blood Purifier, 50c. Dick's Blisters, 50c. Dick's Liniment, 25c. Dick's Ointment, 25c.**  
Mailed on receipt of price.  
**DICK & CO., P.O. Box 482 Montreal.**
