## PRESERVATION OF

SOME ACTION MUST BE TAKEN IMMEDIATELY

American Members of International Waterways Commission Have Presented Their Findings.

Washington, D. C., March 24.-If Niagara Falls are to be preserved as ed. The object of such legislation would one of the wonders of the world, im- be to put a stop to the further depletion mediate action by the United States of the falls and at the same time inflict and Canada is required, according to the findings of the American members of the international waterways commission which has for the past year been studying the conditions at the falls and in the tributary great lakes. This report is signed by General O. H. Ernest, chairman, and the other American members of the commission. After a brief description of the physical condition, the report gives a detailed account of all the corporations

now engaged in the Development of Power,

with the quantities of water which they are actually using, the amounts which they are preparing to use and the amounts which they are authorized under their charters to use. It includes directly from the Niagara river, but not only corporations taking water also those drawing water for power purposes from the Erie canal and the Welland canal, also the Chicago drainage canal and also furnishes a list of all franchises granted and not perfected. The report says:

The total quantity of water to be taken from the river by works now authorized is 60,900 cubic feet per second. Of this amount 26,700 cubic feet is to be taken on the American side, and the remainder, 34,200 cubic feet, on the Canadian side. That is 27 per cent. of the average discharge, and 33 per cent. of the low water discharge of the Niagara river will cease to pass over the falls when these works are completed and in full operation. quantity to be diverted is more than double the quantity which now passes over the American falls, which at the average stage is about 27,800 cubic feet That this will in general have

An Injurious Effect

volume of water to be diverted is about Marie. The amount thus far actually its valuable contents. diverted is but 17,800 cubic feet per second, and has had an appreciable effect upon the falls.

"To foretell with accuracy the effects in detail of the full diversion authorized would require a more complete the American side should affect the ings Company, to an abrupt end. American fall alone it would practically leave it dry, but it seems probable

A Part of This Diversion

cannot be stated with precision, but will commence business in Toronto might bring that situation about. so far as they are known a reasonable estimate is that the water will come from the two arms in about the propor tion of one-sixth from the American Murray, I. C. R. bridgeman belonging falls and five-sixths from the Horse- to Newcastle was cut to pieces yester-

"Exactly what form the changes in the way of cars being shunted, the two cataracts will take, whether they will be narrower or will be broker up into a great number of streams or simply be reduced in volume, retaining general their present form, cannot be foretoid for the reason that there is carrying a bucket of coal along the top no accurate knowledge of the forms of of the parapet of the wall at the works and depths of water on the crests. If during a snowstorm, missed his footing 60,900 cubic feet per second be diverted and fell thirty feet, breaking both legs

Loss Will Be Important,

but if the diversion be limited to this amount or reduced as hereafter indicated it may not prove disastrous. This cannot be definitely defined until the works now under construction have been completed and put into opera-'If it happens that the falls have not

suffered seriously as a scenic spectacle, it does not follow that additional water may be diverted with impunity. Additional diversion would be an experiment even more dangerous than now being tried, and, in our opinion, should not be permitted. In return for the impairment of the falls thus far authorized the state of New York will receive practically nothing for the 242,000 horse power authorized on that side, and the Queen Victoria nual rental of \$270,000, or an average of 65 cents per horse power for 415,000 horse power authorized on the Canadian side These figures do not include the 8,000 by the Hamilton Co. with water from the

"Charters have been granted to cor-

porations which propose to Divert Additional Amounts

in quantities not now limited. The sums of money invested or being invested in the works now in operation or under construction and in the industries dependent the water power at Niagara Falls is very great, but if compared with values set | ing steam into the holds was unsuc-The place is visited annually by about 800,000 people.

"If the falls are to be preserved it must be by mutual agreement between the two countries. As a step in that direction we recommended that legislation be enacted which shall contain the following provisions, viz.: The secretary of war 'o Johnson and George Small, both colorbe authorized to grant permits for the ed, were hanged here to-day for the Japanese merchants were arrested todiversion of 28,500 cubic feet per second murder of Miss Florence Allinson, day in one of the forts here. In their

& Manufacturing Co., 9,500; Niagara Fails Power Co., 8,600; Erie canal or its tenants (in addition to lock service), 400; hicago Drainage Canal, 10,000; all other diversions of water which is naturally tributary to Niagara Falls to be prohib ted except as such as may be required for domestic use or for the service of locks in navigation canals; suitable pen alties for violation of the law to be pre scribed

"The foregoing prohibition to remain in force two years and then to become the permanent law of the land, if in the meantime the Canadian government shall have enacted

Legislation Prohibiting

the diversion of water which is naturally tributary to Niagara Falls in excess of 36,000 cubic feet per second, not including the amounts required for domestic use or for the service of locks in navigation

"It is assumed, however, that an under standing on this subject would be reachthe least possible injury on the important interests now opened by this water power. The amount to be diverted on the Canadian side, 36,000 feet, has been fixed into effect on April 1st than they were with a view of allowing to the companies on this side the amounts for which they journed in disagreement on February now have works under construction. 2nd. Such legislation would give to Canada generated on the Canadian side will be of treaty, however, the points should be considered.

"The substance of this report was submitted to our Canadian colleagues before afternoon, to meet Monday, when a the passage of the joint resolution, with motion to a view to uniting in

A Joint Report

under general law providing for the commission. There was a substantial agreement in the statement of fact and such differences as developed with respect to their accommodations which ought to be made did not seem insuperable, but our colleagues desired time for further consideration. We have no doubt if their sympathy in carrying out that part of the instruction contained in the resolutions which requires us to exert in conjunction with the members of said commission representing the Dominion Canada, if practicable, all possible effort for the preservation of Niagara Falls and the natural conditions."

Indian Territory. The joint scale committee of the central competitive district adjourned this

Report a Disagreement

will be offered with the probability that it will be carried. The session of the joint conference to receive this committee report will, according to the present programme, be called to meet

During the four days the committee have been in session, most every proposal offered by either side on the wage scale has been refused. The operators have been confronted with serious dissensions in their own ranks. F. L. Robbins of the Western Pennsylvania operators has agreed to pay an advance of 5.55 per cent., which is the demand made by the miners; but the operators of Illinois, Indiana and Ohio have firmly refused to pay any advance. Under the rules of the joint committee, the votes of both the operators and miners must be recorded as units, and the division of the operators has resulted in the defeat of every motion not favorable to all of them. In the meetings of the joint scale amittee Mr. Robbins has announced that he intends to pay the increase in wages demanded by the miners, not

only in the mines of the Pittsburg Coal Company, of which he is president, but also in his own mines in Western Pennsylvania, Ohio and Illinois. Independent operators in Western Pennsylvania, represented by G. A. Magoon, have announced that they will pay the advance if F. L. Robbins does. President Mitchell of the Mine Work-

No Settlement Will Be Made nless the advance in wages is given Whether the officers of the Mine the rapids will affect the Horseshoe acy case against Joseph Phillips, presi- Workers will allow the miners to sign the scale and to work in districts where the advance is allowed, while other members strike, is a question that the operators have tried in vain to get President Mitchell to answer.
