high prices for some time to come, according to a statement issued by members of the board of commerce today.

There will be no relief, the commissioners declare, until international trade conditions return to normal.

"With the high prices of wheat and mill feeds, and the creating of the foreign demand for all products, it is hopeless for some time to expect any relief from present

price conditions," the commissioners assert.

Present conditions "have been seized upon by some dealers to profiteer, the board charges. It is pointed out, however, that all high prices are not the result of profiteering. Many are due to natural increases forced by conditions growing out of the war. That export trade is being fostered to the benefit of manufacturers and producers at the expense of the consumer, is another allegation."
