

# Arrowroot . . .

## "Montserrat."

---

This article is of particularly fine quality—being quite equal to the choicest Bermuda. It is packed in 7 lb., 1 lb.,  $\frac{1}{2}$  lb. and  $\frac{1}{4}$  lb. tins, ensuring entire freedom from contamination. Notwithstanding the superior quality of "Montserrat," it is sold at a much lower price than the older established grades, and is an excellent line for druggists to push.

## British Lanolin

ANHYDROUS AND HYDROUS

(Adeps Lanæ P.B.)

( " " Hydrosus P.B.)

---

Hitherto **LANOLIN** has been imported from Germany, and at a cost rather high for general use. The firm of **Lanosoap Limited, Bradford**, being in the centre of the wool trade of Great Britain, have recently erected a special plant for the treatment of raw wool-fat by a patent process, one of the products of which is a refined **LANOLIN**. It is, therefore, no longer necessary to draw supplies from Germany now that a quality strictly B.P. is being produced by **BRITISH ENTERPRISE AND LABOR ONLY**.

**LANOLIN** possesses valuable remedial properties in all skin affections, not only in itself but as a vehicle for other preparations, and a much more extended sale is to be looked for with reasonable prices and a better acquaintance with its merits.

We beg to announce that we have been appointed **SOLE AGENTS** for the United Kingdom, the British Possessions, and South America.
