The Negro on the Fence.

A wagoner, with grist for mill, Was stalled at bottom of a hill. Was stalled at bottom of a hill. A brawny negro passed that way, So stout he might a lion slay. "I'll put my shoulder to the wheels If you'll bestir your horse's heels!" So said the African, and made As if to render timely aid. "No," cried the wagoner, "stand back ! I'll take no help from one that's black ;" And, to the negro's great surprise, Flourished his whip before his eyes. Our "darkey" quick "skedaddled" thence And sat upon the wayside fence. Then went the wagoner to work, And lashed his horses to a jerk; But all his efforts were in vain, With shout, and oath, and whip, and rei The wheels budged not a single inch, And tighter grew the wagoner's pinch. Directly there came by a child With toiling step and vision wild--"Father," said she, with hunger dread, "We famish for the want of bread." Then spake the negro : "If you will, I'll help your horses to the mill.' The wagoner, in grievous plight, Now swore and raved with all his might Because the negro wasn't white ; And plainly ordered him to go To a certain place that's down below. Then rushing came the wagoner's wife, To save her own and infant's life. By robbers was their homestead sacked, And smoke and blood their pillage tracked

Here stops our tale. When last observed The wagoner was still "conserved" In mud at bottom of the hill, But bent on getting to the mill. And hard by, not a rod from thence, The negro sat upon the fence. -N. V. Evening Post.

Curiosities of Water.

Water exists around us to an extent and under conditions which escape the notice of inquiry. They may or may not be now in cursory observers. When the dryer buys of the dry salter, one hundred each of alum this city any means of unravelling the mystery, but it would be well indeed and greatly to the public satisfaction, if this recarbonate of Soda, and soap, he obtains in exchange for his money, not less than forty-five pounds of water in the first lot, sixty sult could in any way be brought about. The police authorities have now the bones four pounds in the second, and a variable in their possession, and Coroner Jones has quantity, sometimes amounting to seventy-three and a half pounds in the third. Even been notified of all the circumstances. We learn that the above house was, at the time the transparent air we breathe contains in ordinary weather, about five grains of water diffused through each cubic foot of its bulk and this rarified water no more wets the is than the solidified water wets the lime Gazette.and this rarified water no more wets the Gazette. air than the solidified water wets the lime

or opal in which it is absorbed .--- Of a plaster of Paris statute weighing five pounds more than one good pound is solidified water Even the precious opal is but a mass of flint and water, combined in the proportion of nine grains of the earth ingredient to one of the finid. Of an acre of clay land a foot ty is capable of withstanding the attacks of deep, weighing about one thousand two hundred tons fat least four hundred tons are water : and even of the mountain chains with which the globe is ribbed, many milthrough it. lions of tons are water solfied in the earth. No man prospered in the world without

Mysterious Discovery of Hu- A Rolling Stone Gathers no

man Remain On Friday afternoon last a singular dis-covery of human remains was made by a man engaged in digging out the cellar of an old house in Brock street. At first the laborer thought the large quantity of bones which he disinterred were those of some animals that might have been burried there formerly, and therefore parties were allowed to take them away and dispose of them to the proprietor of a sugar refinery; but when, afterwards, three human skulls were found, all doubt was dispelled as to the nature of the bones, the remainder of which, together with the skulls, were carefully placed in an empty barrel to await further inquiry. The bones were subsequently conveyed to the Central Police Station by a man named John Morri-son, who was the finder. As is usual when Well, what of that ?. Who wants to

Police Station by a man named John Morri-son, who was the finder. As is usual when discoveries of this kind are made in populous cities, the most intense excitement prevailed in the neighbordood where the matter was

in the neighbordood where the matter was first brought to light, and many and curious were the speculations indulged in with re-spect to the remains in question—whose they were and how their presence in that unusual resting-place was to be accounted for. Nothing certain, however, could be known, as the lot, we understand, has been a vacant unusual feeting of the specific any of the old

Nothing certain, nowever, has been a vacant as the lot, we understand, has been a vacant one since 1851, and few if any of the old inhabitants remain in the neighborhood who inhabitants remain in the neighborhood who can remember the character of the house Dr. Shew names some eighty diseases. which stood here before the ravages of the

description might have been committed with Bocarme, of Belgium, was murdered in description might have been committed with secrecy and impunity. Some who remember the evil reputation the house once enjoyed, express their belief, with what correctness it two minutes and a half by a little nicotine. or alkali of tobacco.

Dr. Twitchell believed that sudden deaths is impossible to say, that the death of the and tobacco, among men, were usually found beings whose bones now come to light for together and sustained this opinion by an the first time was as extraordinary as their burial, while many think the subject demands array of facts altogether conclusive.

Hanging a Spy.

To-day has been further signalized by the hanging of a spy, a man named Charles Mason, of Perrysville, Pennsylvania, It appears that as one of the couriers of Gen. Longstreet was carrying an order, he was met by this man, who inquired "whose diviof its destruction by fire, about 100 years old. The skeleton of one of the bodies The courier then asked, "whose division the two travelled together the courier ob-

Lord Palmerston's Gallantry.

An incident occurred in the neighborhood of Walmer on the 17th, which proved that the gallantry which distinguished the Pre-mier in the days of his youth, has not de parted, spite of the weight of years and the activities of public life. A party of ladies and gentlemen were walking on their return from Walmer Church, when a dogcart driven by some careless, ill-mannered clown, rushed by and caught a ladies dress in the wheel, bringing its beauts in rans to the dust, and

by and caught a ladies dress in the wheel, bringing its beauty in rags to the dust, and reducing its wearer to a state of desperate millinery distress in the highest degree mor-tifying. The degeart went on and was quickly out of sight. A carriage came up immediately after the accident, was prompt-ly pulled up, and an elderly gentleman step-ped out and insisted on the lady, although a perfect stranger to him, taking a seat by his wife. The courteous offer was accepted, and the lady was conveyed to her home in the carriage, although this caused a consid-erable detour to the intended course of the

erable detour to the intended course of the owner. The doer of this very graceful act --this polite as well as good Samaritan-was Lord Palmerston.
