

## INVESTIGATION OF ALL SEPARATORS EMPHASIZES IHC SUPERIORITY

You cannot afford to buy any separator before comparing it with others. You should not take chances. The closer you investigate all separators, the more you will be impressed with IHC superiority. You will then know how much closer the IHC skims, how much longer it lasts, how much easier it is to clean, and how much easier it is to turn. There are no weak spots in an IHC Cream Harvester.

IHC Cream Harvesters are the only separators with dust-proof and milk-proof gears, which are at the same time easily accessible. The frame of an IHC Cream Harvester is entirely protected from wear by phosphor bronze bushings. The IHC has large shafts, bushings, and bearings; it has a perfect oiling system; the flexible top-bearing of

### IHC Cream Harvesters

is the strongest and most effective found in any separator; it has only one spring. IHC Cream Harvesters always run steady—without vibration. IHC Cream Harvesters are equipped with a patented dirt-arrester which removes the finest particles of dirt from the milk before the milk is separated. The crank is at the right height for easy turning, and the tank is at an easy height to fill.

The IHC local dealer will be glad to point out the above features and many others. Made in two styles—Dairymaid and Bluebell—in four sizes. Write direct for catalogue, or nearest branch house.

CANADIAN BRANCHES—International Harvester Company of America at Brandon, Calgary, Edmonton, Hamilton, Lethbridge, London, Montreal, North Battleford, Ottawa, Regina, Saskatoon, St. John, Weyburn, Winnipeg, Yorkton. International Harvester Company of America Chicago (Incorporated) USA

#### IHC Service Bureau

The Bureau is a clearing house of agricultural data. It aims to learn the best ways of doing things on the farm, and then distribute the information. Your individual experience may help others. Send your problems to the IHC Service Bureau.

**Buy Direct from  
my Factory—Save  
the Big Profits**

Usually paid to the middlemen—the jobbers—the salesmen—the agents and dealers. I charge you only for the actual cost of the material and labor that goes into my Separators with just one very small profit added.

### The Wonderful Galloway BATH-IN-OIL CREAM SEPARATOR

Absolutely the lightest running, closest skimming and best built machine ever devised. Automatically oils itself. No oil holes to clog up or bother with. All gears run in bath of oil and all working parts enclosed in dust-proof case. This feature alone is worth \$25.00 on any cream separator. The low tank and high crank make work easy and save backache. The Swing Supply Tank is another great feature found only in the Galloway, and will prove a great convenience. Galloway Cream Separators are made in all sizes, ranging from 200 lbs. to 1,200 lbs. capacity, and are sold with the positive guarantee of absolute satisfaction or your money back at the end of thirty days. Just think of it! A standard, high-grade Galloway Cream Separator for only \$27.50! At this price there isn't a farmer or dairyman anywhere who can afford to be without one.

#### Send for My Free Cream Separator Catalog

It tells all about how to make the most money from your cows—how to increase your profit—15.00 annually from every cow you own, and many other things you will be glad to know about if you are interested in increasing your profits. Remember, there is no duty on Cream Separators and there is no reason why you should pay more than our prices for a machine of any kind. Write me this very day and let me send you my free Catalog and other printed matter that will surely interest you.

**\$27.50**

—And your money back if not satisfied in 30 Days

LOW SWINGING TANK

Old hoss, I can't! It ain't no use  
For me to talk o' killin' you;  
I just can't give you that abuse,  
Account o' things you used to do.  
That leg o' your'n has run its race,  
But right here now is where we jine;  
I'll keep you hobblin' 'round the place  
If I must loan you both o' mine!

#### The Colt in Harness.

The first step toward getting a colt going successfully in harness is to properly bit and mouth him. In the old countries a common practice is to back the colt into a slip stall and hold him there by cross-ties snapped in the bit rings. He thus works against the iron, first bearing, then yielding, until he becomes accustomed to its presence and the pressure exerted by it. The dumb jockey, or more simple biting rig, commonly used here, serves much the same purpose, but no mechanical device is as effective as the pressure of the hand on the rein; better mouths are made in this way. Inasmuch as the conveyance of the master's thought to the horse's mind, for execution is via hands, reins, bit and mouth, no progress can be made and none should be attempted until this fundamental means of communication has been established. Simple physical power is a poor means of control when applied to the horse. On the contrary, control is a matter which involves to a greater extent the mental faculties of both horse and master. If he has been inspired from colthood with the idea of man's dominance, obedience will receive a great deal more consideration from him than rebellion will.

While teaching the horse subordination by leading him to underestimate certain of his powers, it is also essential that he be made to believe that there is no limit to certain others. For instance, the first time the colt is tied up by the head, see to it that the halter will hold him in case he pulls. If it does and he fails in the first few attempts, a string will probably serve as well as a chain to keep him in place thereafter, while if he succeeds in freeing himself at the first few attempts he will never cease trying to repeat what he has once accomplished. In the breaking process the kick strap should not be left off until the habit has been acquired, nor should any pains be spared to prevent an initial performance at either rearing, backing, wheeling or running. On the other hand, it is just as important not to overload a pair of draft colts, with a view of creating in them the notion that they can pull anything with two ends loose. Thus by exaggerating our equine servant's notion of those of his powers which are most useful to us and at the same time deceiving him as to those attributes, which, if realized, might impair his usefulness, we promote his serviceability.

The superiority of brain over brawn as concerned with the control of horses is well demonstrated in the admirable performance which occasionally good women drivers can get from horses which were unmanageable to most men. A light hand and a steady nerve are the requisites. The word, like the whip, should be well chosen, as to kind and time of application, and used with a definite meaning; but the fewer the better.

It is not necessary here to discuss the various systems of breaking, nor the art of driving. The idea is simply to impress upon the breeder the importance of properly handling the colts and fillies which he has bred. At all events give them a liberal education and begin early. Then, when the buyer comes along, the colt so handled is more likely to sell well for three reasons: i. e. that he is worth more; the owner has a better opportunity to show the colt off to his own advantage, presenting him with the best foot forward, as it were; and the buyer has a much better chance to observe the real merit that he possesses.

#### THE TIRE THAT ALWAYS LEADS.

Dunlop Detachable Bicycle Tires are in a class by themselves—first-class. They hold that position against all comers.

**Oak Grove Poultry Yards**  
Eggs for hatching from pure bred Buff and White Orpingtons, Rhode Island Reds, White Leghorns, White Rocks, Barred Rocks, White Wyandottes, Golden Wyandottes, Mammouth Bronze Turkeys, and Imperial Pekin Ducks. Write for catalogue. Address: G. C. Mallory, Box 1482, Winnipeg, Man.

Write to-day for a free trial bottle of this wonderful Eczema Cure to the D. D. D. Laboratories, Dept. "M," 49 Colborne Street, Toronto. It will give you instant relief.

## Eat and Get Thin

This is turning an old phrase face about, but modern methods of reducing fat have made this revision possible.

If you are overfat and also averse to physical exertion and likewise fond of the table and still want to reduce your excess flesh several pounds do this: Go to your druggist (or write the Marmola Co., 1412 Farmer Bldg., Detroit, Mich.) and give him (or send them) 75 cents. For this modest amount of money the druggist will put you in the way of satisfying your ambition for a nice, trim, slim figure. He will hand you a large case of Marmola Prescription Tablets (compounded in accordance with the famous Marmola Prescription), one of which you must take after each meal and at bedtime until you begin to lose your fat at the rate of 12 to 16 ounces a day. That is all. Just go on eating what you like, leave exercising to the athletes, but take your little tablet faithfully and without a doubt that flabby flesh will quickly take unto itself wings, leaving behind it your natural self, neatly clothed in firm flesh and trim muscles.

## Order this Bargain Today—Only \$5.50

Receive a nice tailored suit made from melton cloth in black, navy, cardinal, dark brown and dark green. It's a soft, smooth finished cloth and wears like iron.
