continued from page 3
which are of immense interest to the West." However, he feels that it is a mistake to claim Clark as a Western interest because, despite his view of federalism, he is "essentially a simple Canadian from High River."

Continued Engleman: "I think it's important that a woman has an important position (in parliament). I think Flora Macdonald will be a very concerned Minister of Employment."

When asked whether the government is planning to implement a new defence policy, Stevenson affirmed that he thinks "there will be considerable increase in military spending because I see it as some degree of solving some economic problems."

Professor Engleman agreed, suggesting that the possibility of doubling NATO contingents will reward Canada with "brownie points all over Europe."

With respect to the future of the Liberal Party of Canada, Stevenson stressed that it is "rather bleak."

"Mulroney has shown that he's in charge of the situation. I think

the Liberals lost national unity with the Conservative victory in Quebec." Stevenson added, "I find it very difficult to see any role of the Liberal party, and I think that the NDP will give the Liberals a run for the money (to form the official

opposition party)."
Professor Stevenson concluded, "Things could get worse, so I'll wait and see what happens."

The PSUA will be having elections next Friday, so no forum scheduled.

U of A student wins

by Marie Clifford

Second year University of Alberta psychology student Gillian Moody became the first Miss Black Alberta in seven years this month.

"I think the pageant went really well," said Moody. "Hopefully, it will be bigger next year."

Moody triumphed over 13 other contestants in the bathing suit and evening gown competitions to advance to the semi-finals. She then won the talent competition and eventually went on to capture the crown.

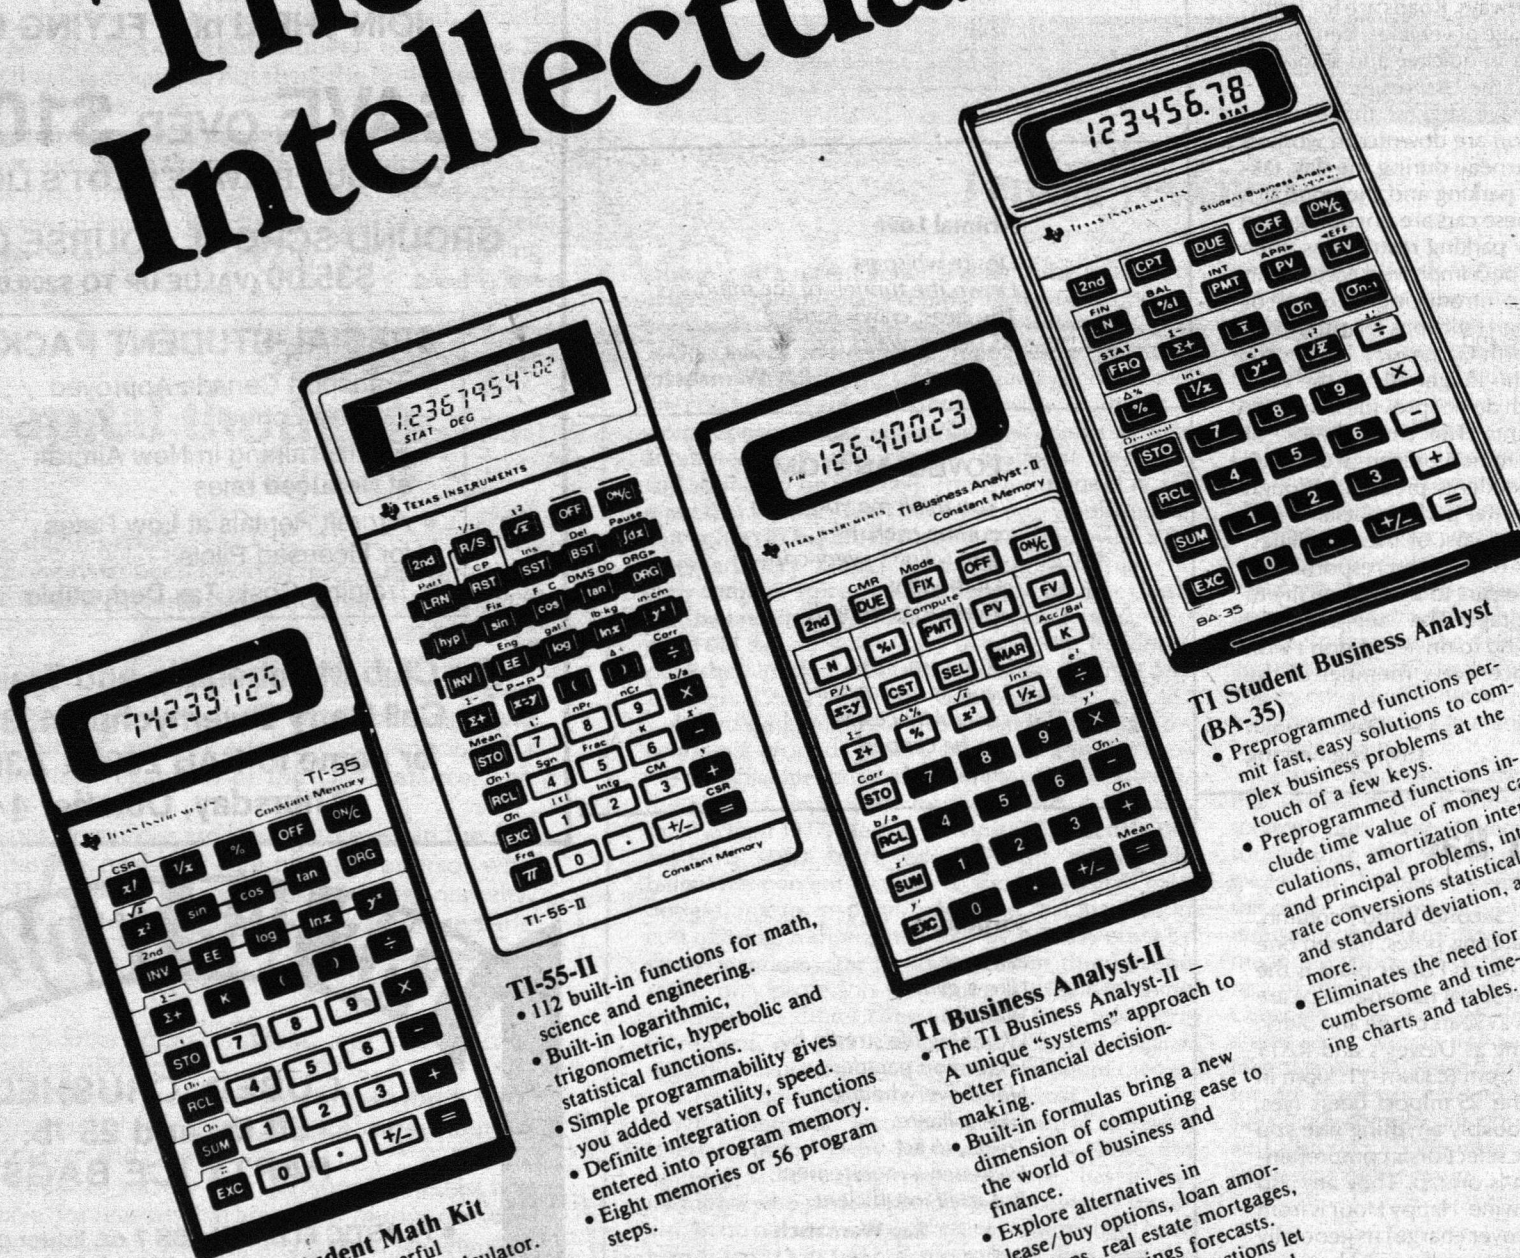

Though at present a national pageant for Miss Black Canada does not exist, Moody believes such a pageant could be co-ordinated as early as next year.

When asked why a pageant was set up especially for black Alberta women, Moody replied: "You have a better chance (to win) than in the Miss Edmonton contest. Hopefully, the publicity will open people's eyes."

The new Miss Black Alberta is pleased with the pageant over all and hopes that the speech she gave at the pageant on the importance of knowledge "rubbed off on someone."

Moody plans to continue with her studies at the U of A and is currently pushing for a scholarship to be made available as one of the prizes in the future Miss Black Alberta pageants.

The Intellectuals

TI-35 Student Math Kit

- Contains the powerful 54-function slide rule calculator.
- Performs Roots. Powers. Reciprocals. Common and natural logarithms.
- A "systems" approach to math and science problem-solving.
- Automatic conversions for degrees/radians/grads.
- Special functions such as pi, factorial and automatic constant help you calculate faster.

TI-55-II

- 112 built-in functions for math, science and engineering.
- Built-in logarithmic, trigonometric, hyperbolic and statistical functions.
- Simple programmability gives you added versatility, speed.
- Definite integration of functions entered into program memory.
- Eight memories or 56 program steps.

TI Business Analyst-II

- The TI Business Analyst-II — A unique "systems" approach to better financial decision-making.
- Built-in formulas bring a new dimension of computing ease to the world of business and finance.
- Explore alternatives in lease/buy options, loan amortizations, real estate mortgages, sales and earnings forecasts.
- Built-in statistical functions let you compute mean, standard deviation for sample and population data, linear regressions and trend line analysis.

TI Student Business Analyst (BA-35)

- Preprogrammed functions permit fast, easy solutions to complex business problems at the touch of a few keys.
- Preprogrammed functions include time value of money calculations, amortization interest and principal problems, interest rate conversions, statistical mean and standard deviation, and more.
- Eliminates the need for many cumbersome and time-consuming charts and tables.
