

Recent mitigation of punishment says:

P. Blampson. N. 20830 was in No. 1000 hospital in June/41 with an acute pneumonia. I still suffer from headaches, and various spells.

I have been on my own since I was 14 yrs of age. I have always had a job. This is my first opportunity

I have not been happy in the units I have been in and hope to be given a chance at M.T. work, where I could be kept busy at all times. If possible in a unit where there would be some men of my own nationality. I do not get along well with men of British nationality due to my own fault to be sure. I certainly gave a complete confession to my name.

C.2.

P. Blampson

N. 20830 P. Blampson
