

WBB A. The house is to scale, the location of the bullets are approximately.

Q. Did you put any lines on those drawings indicating the direction the bullets were fired?

A. Yes sir.

Q. That cannot be correct - you didn't know that - that is just your opinion?

A. This is not an opinion, it is where the bullet has hit two places, you can tell the direction and the final location of the bullet hole give you the true direction that the bullet was fired from, sir.

Q. Are you an expert on criminology or the firing of weapons?

A. No sir, just.....

Q. Just your opinion as a layman?

A. As a layman, sir.

THE PROSECUTOR DECLINED TO RE-EXAMINE

JA: Any questions by the Court Mr. President?

QUESTIONED BY THE COURT

Q. On your sketch you say that two bullet holes - Exhibit "J" - " 2 bullet holes in door, 5 other bullets must have passed through glass, since replaced, account for 7 bullets in the closet door". What reason have you to believe that the 5 other bullets did pass through the glass - did anyone tell you the glass had been replaced?

A. They all seemed to come from one burst, sir, and what I could see of the bullets there is two in the door, they were coming over and they finished there and I could see that the glass had been replaced.

WBB Q. Could you actually say the bullets ~~had~~ passed through the space the glass had been put in?

A. That is impossible.

Q. You cannot say it then?

A. It is impossible, sir.

Court: I would suggest that the notes on the sketch be deleted?

WBB JA: I think the Court realizes sir, ^{from} this witnesses' evidence that the path of the bullets was his opinion and speculation.

Def: There has been nothing put in as to how the witness is qualified to put in a scale drawing?

QUESTIONED BY JA

Q. What is your unit Spr Koch?

A. 4th Field Coy.

Q. How are you employed there?

A. Draughtsman sir.

WBB Q. And how long have you been there?
