LIMESTONE.

The statistics given here with do not include the value of the stone burned into lime by the quarry operators nor that of the stone used in the manufacture of cement, a record of lime and cement production being separately given. With these exceptions the total value of the production of limestone in Canada in 1910 was \$2,249,576, as compared with a value of \$2,139,691 in 1909, or an increase of about 5 per cent.

There was a decrease in the production of limestone for building and ornamental purposes and for curbstone and paving, but an increased production of crushed stone, rubble, and furnace flux.
