THE present popularity of many colored beads has created a growing demand for peridot jewellery and our designers have produced some exceptionally beautiful pieces.

The peridot is a soft, olive-tinted semi-precious stone that is capable of taking an extra high polish. When combined with pearls its brilliancy shows to still greater advantage. It also harmonizes with other jewellery and with almost any costume.

No. C214503 lavalliere and No. C214512 necklace are two of our newest creations and would make particularly pleasing gifts.
