

The Bissell Out-Throw Disk Harrow

To settle all doubt about which is the BEST OUT-THROW DISK HARROW, we ask you to test the "Bissell" Out-Throw in a field competition with other Out-Throw Harrows.

The "Bissell" Out-Throw has many features that have made the name "Bissell" famous in connection with Disk Harrows. It has plates of the correct shape. One gang is set slightly ahead of the other. The gangs cannot crowd or bump together and cause the Harrow to rock when you come to hard soil—a new feature in Out-Throw Harrows. The hitch is well back, the draught is light and there is no neck weight.

The machine in actual use is our best advertisement. No need to send special travellers to sell the "Bissell." We put our name on every Harrow. If you would like to learn more about Disk Harrows, send to Dept. R for free booklet of both out-throw and in-throw styles. 73

"Use My New 'George' 100 Year Metal Shingle on the Roof and My Zinc Covered Corrugated Iron on the Walls of your Barn"

"THE conditions behind barn building have changed immensely of late years. Labor and lumber cost very high prices. Barns are getting bigger. These new, big barns will cost less if you buy ready-made roofs and walls in metal. Metal and lumber cost so nearly alike that the labor saved by using metal actually brings the cost of a metal barn below that of a wood barn."

"This is so, if you use my big galvanized 'George' Shingle and my Galvanized Corrugated Iron in big sheets. They save so much in labor that they pay to use in barns. At one stroke they save erecting cost and they make a barn lightning-proof, fire-proof, strong, warm and independent of repairs or painting. Fire insurance costs less. Upkeep cost is nothing. Use my 'George' metal

Shingle and Pedlar Corrugated Iron, and you build economically and wisely." "My 'George' Shingle is made in 100-year non-corroding metal. Each shingle is 24 x 24 inches in size. Your roof only lays 25 of them, where he would have to lay 600 cedar shingles. See what you save in the labor cost! See how you get a roof that will not leak, rust or burn, like cedar." "My Corrugated Iron is nailed on your walls in big 8-ft. sheets that brace the barn framing on your barn. There is actual money saved by putting fire-proof walls in metal on your barn." "Get my new book. It shows how to build a modern barn and get a good barn at little cost. I have spent a lifetime in making Pedlar goods perfect

The Call of the North

Do you know of the many advantages that New Ontario, with the Millions of Fertile Acres, offers to the prospective settler? Do you know that these rich agricultural lands, obtainable free and at a nominal cost, are already producing grain and vegetables second to none in the world?

For literature descriptive of this great territory, and for information as to terms, homestead regulations, settlers' rates, etc. write to

H. A. MACDONELL,
Director of Colonization,
Parliament Buildings,
Toronto, Ontario

This Engine Runs on Coal Oil

Every farmer can afford an Ellis Coal Oil Engine. They give far more power from coal oil than other engines do from gasoline. They are safe, as well as cheap; no danger of explosion or fire.

The strongest and simplest farm engine made; only three moving parts; nothing to get out of repair. Assembled customers use these engines to grind feed, saw wood, pump, thresh, run cream separators, and do dozens of other jobs. Cheaper than horses or hired men. Fill up the tanks and start it running, and no further attention is necessary; it will run till you stop it.

FREE TRIAL FOR 30 DAYS. You don't have to take our word for it. We'll send an engine anywhere in Canada on "Thirty Days' Free Trial." We furnish full instructions for testing on your work. If it does not suit you send it back at our expense. We pay freight and duty to get it to you and we'll pay it if you don't want it.

Absolutely guaranteed for 10 years. Write for free catalog and opinions of satisfied users. Special offer in new territory.
