#### THE FARMER'S ADVOCATE.

# Men Try my Cure Free!

I ask not one penny in advance or on deposit. I accept your word to pay me when cured.

> I know the terrible mental torture of the nervous debility sufferer, but I also know his gratefulness when restored, and that is the basis for my free treatment until cured. Can any such sufferer come to me and be made a man among men, and then refuse to pay a few dollars for aiding him to become so? I say, no, and my wonderful success backs up my judgment. I wish that every sufferer knew that the effect of Electricity upon the weak, debilitated man is the same as rain upon the parched field in summer. He may be debilitated from varicocele, losses, impotency; may have confusion of ideas; fear to act and decide; gloomy forbodings; timid and fretful; avoid friends and company; without confidence in himself to face the slightest responsibility, and let him properly apply Electricity for but a few hours and all these symptoms vanishgiving way to glowing, soothing vigor through every weak part. A few weeks' to a couple months' use of this treatment banish them forever, and make strong, confident, manly men out of the puniest weaklings. For nearly 40 years I have treated

and restored weak men through my world-famed invention, and am still doing so with greater success than ever. In fact, I do not expect to fail in any case of this kind, and therefore as men are more or less skeptical I will continue to give my Herculex

### Dr. Sanden Electric Belt Free Until Cured

and as said not one cent is to be paid in advance or on deposit. Call or write and get the belt and use, say for 60 days, and if cured pay me price of belt o 11y-many cases low as \$4-if not cured return the belt and the deal is ended. But I know what the belt will do, and will take the risk of my pay when you are cured. I also give my belts on same terms in Rheumatism, Lame Back, Stomach, Kidney and Liver complaints, etc. Think of a remedy that has stood every possible test for nearly 40 years-the only one ever successfully given to sufferers on its own merits !

As the originator and founder of the electric belt system of treatment my 40 years' success is the envy of many, and my belts of course are imitated. (What good thing is not?) But my great knowledge to advise and direct my patients is mine alone, and free to all who use my belt until cure is complete.

Call or send to-day for my belt. Or if you want to look into the matter further, I have the two best little books ever written upon Electricity and its medical uses, and send them free, sealed, upon request.

## Dr.C. F. Sanden, 140 Yonge St., Toronto, Ont.

Office Hours: 9 to 6. Saturdays until 9 p.m. Largest Electric Belt Establishment in the World. FOUNDED 1866

#### COSSIP.

#### THE BIGGEST DITCH IN AMERICA.

"I stopped at Calgary, just in the eastern shadow of the Canadian Rockies. to see the digging of the biggest irrigation project in America, excelled only by one in India and one in Egypt," writes Mark Sullivan in "The Boston Transcript." "I expected to see an army of men with shovels, and saw not one shovel. Instead, three colossal steam giants, with monstrous arms, which dipped down, took a huge bite out of the earth, rose slowly and dropped the earth to one side. Dipping and biting, these three machines advance just about 106 feet a day, leaving in their wake a ditch which is the size of a small river, sixty feet wide and from twelve to twenty feet deep. This ditch begins at the river, and crawls in a curving course something over a score of miles into the country. The biggest irrigation ditch on the continent is simplicity itself. There is nothing complicated about an irrigation plant. It's just an old-fashioned mill race on a big scale. You tap the river at a high level, run your ditch along that level, with just the slightest drop that will make the water flow at all. Then from the big ditch you run smaller lateral ditches, and from these still smaller ones, till every few acres has its little rivulet. The ditch at Calgary will supply an area of about 150 by 50 miles, and water nearly 2,000,000 acres-more territory than is included in some Eastern States. When the work is done-but what irrigation will do for a semi-arid country, is an old story. And yet, just the elements of it may bear retelling. Farming with irrigation is, as different from ordinary farming as hothouse gardening is from raising wheat. Farming with irrigation comes very close to being an operation in chemistry. You have your sunlight, you have your soil, in fixed quantities and of known chemical constituents. You add your water in quantities as needed. And if you wish, you can put fertilizing elements, salts of potash, for example, in your water, and then farming is a matter of chemistry, indeed. And the results to the farmer are as different as a chemist's operations must be from the results to a farmer who lets the caprices of the weather govern the supply of one of his principal ingredients. If a piece of ground which depends for water on rain will raise a hundred bushels, the same piece irrigated will raise five hundred. Twenty acres irrigated will support a family in ample comfort, and forty acres irrigated is as large a farm as one man can well manage.

When one seeks for the broader significance of this big irrigation project here on the western plains of Canada, one wonders at first why such

will be gladly supplied for a test.

be done at all. Canada has literally millions of acres of fertile land which does not need irrigation. Canada is so rich and prodigal with fertile land that she gives it away-160 acres to any man who will merely settle upon it and improve it. The Canadian Pacific Railway is almost equally rich in land. It has millions of acres which it sells at \$4 and \$6 an acre. Why, then, this costly irrigation of waste land, as if land were scarce? It suggests, instead of the very sparse population, a country that teems with people-a land like India-where every square inch must be utilized, that life may be kept in the people. The explanation made by people here, which may be true, is this : The Canadian Government and the Canadian Pacific Railroad are absolutely sure of Canada's future. They are laying the foundations broad and deep for a population as dense as our own. They are preparing for the time when their free land will be all gone. The situation is like this : Winnipeg, with about eighty thousand, is Canada's Chicago ; Vancouver, with about half as many, is Canada's San Francisco. In all the vast country between these two-it takes three days to cover on a railroad train-in all that country there is but one town of over ten thousand people. It is as if we were at home, had no Denver, no Omaha, no Minneapolis, no one of a score of cities. That, in a few decades Canada will have its Denver, its Omaha, its Kansas City, is as certain as the co-operation of Government, railroad and a tremendous stream of eager immigrants that jostle each other for an early chance can make it.
