The Salt Sellers - Montreal

BISCUIT EXCELLENCE

There is a wealth of good quality ingredients used in the manufacture of Reception Wafers, and it takes very little persuasion on your part to make your particular customer try them—the thin flaky salted soda cracker with the distinctive flavor. And you will find that the favor with which they are received will surely result in a big demand for them.

Put up in "Aertite" packages—a feature in connection with the excellent quality of Reception Wafers, which makes them a profitable and rapid-selling stock.

**We also make all kinds of
Dainty and High-Grade Biscuits**
