

## Printing and Publishing

We wish to draw the attention of mining, metallurgical, and development corporations to our excellent facilities for compiling, arranging, illustrating, printing and distributing Annual Statements, Special Reports, Descriptive Pamphlets, etc.

We guarantee our work in all respects. In letter-press, half-tone engravings and reproductions in colour, we are prepared to give entire satisfaction.

We shall be glad to furnish estimates to enquirers.

## Sullivan Diamond Drilling Service

(Established 1884)

We are contractors for core drilling—the oldest and most reliable in the business. If you employ us to core drill your mines or ore lands, you can depend absolutely on the accuracy of the records thus secured. Cores taken with Sullivan Drills by Sullivan Contracting Crews, are accepted by mining engineers and mineral land owners the country over as **FINAL AUTHORITY** on the deposits from which they were taken, whether secured last month, last year or last century.

Shall we have one of our drilling experts call?

Ask for our booklet "Core Drilling by Contract," No. 6113.
