Head Office Never Inspected.

Among the other incidents of the day's enquiry was the statement of Mr. Langton that the head office of the bank had never been inspected while he was with the bank, and that the report of the annual meeting of May, 1903, setting forth that there had been inspection, -was, therefore, false. This was also elicited by Mr. Morine, who also laid particular stress upon the items of \$143,000 and \$50,000 that appeared in the statement given to the directors by Mr. McGill as representing sound securities, whereas, he claimed, the former stood for a speculative account, and the latter for a \$50,000 debt to Denny & Co., the New

Sir. Wilfrid Laurier Receives Boundary Claims In Writing

NO POLICY INTIMATED

Ottawa, Nov. 13.—The conference respecting the extension northwards of the boundaries of Ontario, Manitoba of the boundaries of Ontario, Manitoba and Saskatchewan was held yesterday morning and concluded shortly after noon. Representatives of the three provinces submitted their case in writing and Sir Wilfrid Laurier replied that he and his colleagues present were a sub-committee of the Cabinet, to which they would report. He gave no intimation of policy.

Premier Whitney, with Attorney General Foy and Treasurer Matheson, represented Ontario.

Ontario's Approval.
Yesterday Manitoba presented a supplemental report. The report holds that in the Keewatin Act of 1876 the intentional reports and the supplemental reports. London, Nov. 13.—(C. A. P.)—The Canadian Associated Press learns that the Canadian Government has decided to reinstate C. F. Just in the Immigra-

intention was to place the administra-tion of affairs in Manitoba through the medium of the Lieutenant-Governor until the true boundaries of Ontario were ascertained. The memorial then notes the enlargement of the province A great many Americans, both men and women, are thin, pale and puny, with poor circulation, because they have illierated their stomachs by hasty eating or too much eating, by consuming alcoholic beverages, or by too close confinement to home, office or factory, and in consequence the stomach must be treated in a natural way before they can rectify their earlier mistakes. The muscles in many such people, in fact in every weary, thin and thin-blooded person, do their work with great difficulty. As a result fatigue comes early, is extreme and lasts long. The demand for autritive aid is ahead of the supply. To insure perfect health every tissue, bone, nerve and muscle should take from the blood certain materials and return to it certain others. It is necessary to prepare the stomach for the work of taking up from the food what is necessary to make good, rich, red blood. We must go to Nature for the remedy. There were certain roots known to the Indians of this country before the advent of the whites which later came to the knowledge of the settlers and which are now growing rapidly in professional favor for the cure of obstinate stomach and liver troubles. These are: Golden Seal root, Queen's root, Stone root, Bloodroot, Mandrake root, Then there is Black Cherrybark. The medicinal principles residing in thesa native roots when extracted with giverine as a solvent make the most realiable and efficient stomach tonic and liver invigorator, when combined in just the right proportions, as in Dr. Pierce's Golden Medical Discovery. Where there is bankrupt vitaility—such as nervous exhaustion, bad nutrition—and thin blood, the body acquires vigor and the nerves, blood and all the tissues feel the favorable effect of this sovereign remedy. Although some physicians have been aware of the high medicinal value of the above mentioned plants, yet few have used pure glycerine as a solvent and such the facohol.

The "Golden Medical Discovery" is a scientific preparation compounded of the glyceric extracts of the above mentioned veg in 1881, which caused the dispute with Ontario. In this dispute the Government and Legislature of Ontario expressly approved the inclusion of Keewatin within the boundaries of Manitoba. The Ontario Legislature passed a resolution on March 9, 1882, favoring this, and Sir Oliver Mowat on Sept. 29, 1883, endorsed this. The memorial sums up by saying:

"It is stoutly submitted that the

foregoing shows conclusively, first, that the constitution of the formation of the district of Keewatin was for temporary purposes only and with a view of ultimately embracing a large area thereof within the Province of Manitoba.

"Second, that the Province of Ontario, up to the time of the communi-cation to Sir Wilfrid Laurier on March 22, 1905, claiming consideration for Ontario in any division of the Keewatin territory, never made any claim to any part of the said territory, but, on the other hand, heartily approved and rejoiced in the extension of the boundaries of Manitoba in the undisputed areas of Keewatin.

"It is noted that while Ontario and Quebec since confederation have dou-bled their areas, Manitoba is 80,000 square miles smaller than in 1881. It is added that if in 1881, when the popu-lation was 60,000, it was deemed just to extend the areas of Manitoba her claims now are proportionately great-

claims now are proportionately greater."

The memorial quotes a number of official communications from the Ontario Government in 1882, 1884 and 1886, in which it was stated that the arrangement of 1884 would settle forever the western and northern boundaries of Ontario.

The memorial then points out that Keewaitin was the only method of an

The memorial then points out that Keewatin was the only method of approach to Manitoba from the outside development and administration of the world for a long period and that the iterritory can be better secured by Manitoba than by Ontario or Saskatchewan. "Grand Peninsular"

Is an Ornament to the Home.

Popular taste no longer clings to deeply carved, highly ornamental ranges.

People now want rich, yet simple, elegance.

That is the way I make my new Grand Peninsular Range. The "Grand Peninsular" is easy to keep clean, because

there are no deep carvings to collect the dust and dirt. The design is simple but very effective. No fuss or frills. Just smooth surfaces which take a beautiful bright polish. The nickelled castings are detachable, and can be lifted off without loosening a bolt, when the range is to be

brushed or cleaned. Then there is the ALL-STEEL OVEN-the THERMOMETER on the oven door—extra large GRATE BARS—and a dozen other time-and-labor-savings conveniences—that are exclusive with my GRAND PENINSULAR. Have your dealer show you all these points.
