CANADIAN FUEL SITUATION ACUTE

Sir Robert Borden Explains the Situation in House in Asking for Legislation

(Special despatch to The Daily Gleaner.) Ottawa, June 29.—Very wide powers are granted to the Board of Railway Commissioners in dealing with the fuel situation, which has assumed a somewhat alarming attitude within the past week, under a bill introduced by the Prime Minister in the House yesterday and given its third reading. Under the bill, authority is granted the Commission to regulate importation, exportation, production and manufacture of coal, or other fuel supplies. Regulations made under the legislation are to be considered as law without being passed by the Governor General in Council, a power which the Board also has in regard to transportation matters.

In the House last week, Hon. Mr. Lemieux called attention to the seriousness of the situation, but the government stated that it was not particularly alarming. A sub-committee of the Cabinet, composed of Dr. Reid and Senator Robertson, was appointed to look into the matter, and their report was delivered on Saturday. It showed that the position was quite as grave as Mr. Lemieux had suggested, and the present legislation is the result.

The report shows that while more anthracite and bituminous coal had been imported between Jan. 1 and June 1 of the present year, the coal reserves in Canada were less than a year ago. The situation in the United States is grave, chiefly because of transportation strikes. Industries there have been obliged to close down. The Interstate Commerce Commission has placed an embargo on coal exports from the United States, and imposed other restrictions. From Jan. 1 to June 1 there had been exported from Nova Scotia mines one hundred and sixty thousand tons of coal for Europe. Prior to the war about two million tons came up the St. Lawrence from the Maritime Provinces, but that supply had almost stopped.

The Premier said: "In view of the United States having embargoed the export of coal to foreign countries because of the serious shortage at home, it will be difficult for Canada to contend for an increased supply from the United States, unless an embargo is also placed upon the exportation of Canadian coal overseas." The Premier said he did not want it to be thought that this was the only action the government had under consideration. It is perfectly obvious, he said, that some efforts must be made, if possible, to insure greater supplies from the sources within our own country being secured. When the United States exercises control and establishes priorities in their country, it is absolutely futile for us to expect that they will send coal to this country, unless we adopt in Canada some authority with powers corresponding to those exercised in the United States by the Interstate Commerce Commission. Something must be done, said Sir Robert, in conclusion. Wide powers must be conferred on some authority to deal with the matter while Parliament is not in session. There were two courses which the government could adopt. Either to take control, as it did under the War Measures Act, or invest it in some other authority. As the Railway Commissioners are not working, the problem has been handed to them to deal with.

LEG AMPUTATED

St. John, June 29.—Frederick McCain, the C. N. R. brakeman, who was injured last Thursday at the Union Depot, having been jammed while riding on the footboard of a locomotive, was operated on at the General Public Hospital at noon yesterday and had the left leg amputated.

Begin with an umbrella when you day to lay up something for a rainy day.

UNSELFISHNESS

WILL WIN JULY 10

The Votes of Men Who Are Willing to Sacrifice Their Own Preferences That the Province May Be a Better Place in Which to Live Will Ensure Victory for Prohibition.

A large number of the voters of this province will have an opportunity on July 10 to display their patriotism and their unselfishness. Many men who are not averse to beer and liquor will vote for prohibition and against the sale of wine and beer, because they know that total prohibition will make this province a better place in which to live. They are willing to forget their own preferences for the sake of the general good. They know that social and economic conditions are improved by the absence of liquor. They know that prohibition is good for every business but the liquor business. They know that a dry province is the best in which to bring up a family. They know that prohibition lessens crime and reduces taxes. These are only a few of the reasons which will influence many men who have been accustomed to take a drink in the past to vote for more stringent prohibition, rather than for a backward step. Sound common sense and practical business reasons are responsible for a great part of the modern trend towards prohibition, and the voters of New Brunswick are not behind other thinking people in their recognition of the value of prohibition. Every vote will count; every thinking man and woman should vote for prohibition. Think it over.—Adv.

TAX LIMIT ON ALL TAILORED SUITS

No Tax on Suit or Overcoat Sold at a Lower Price Than \$60

Ottawa, June 28.—Men's clothing made to measure is not taxable at a lower price than \$60 for suit or overcoat, under a new ruling of the Minister of Inland Revenue today. This tax is retroactive to June 17, on clothing delivered since that date and not paid for. Clothes that have been paid for are not subject to a refund of any taxation paid.

Consideration was given the fact that tailors cannot make up men's clothing at the same prices charged for ready to wear factory goods. The absence of a distinction between the two on taxable price therefore worked a hardship on tailors, and the government accordingly made a new basis of taxation for tailored clothes.

The tax on ready to wear men's clothing is 15 per cent of the purchase price in excess of \$45. On made to measure suits or overcoats the tax will be 15 per cent on the purchase price in excess of \$60.

CHATHAM TO HAVE BIG CELEBRATION

Chatham, June 28.—Preparations are almost completed for the big labor demonstration, Dominion Day. The monster parade in which 2,500 men are expected to take part, will be held in the morning. Numerous splendid trade and other floats are being put in readiness for this main feature. In the afternoon an attractive programme of sports will be run off and a ball game will be played between Moncton and Chatham's best. Band concerts and a grand dance in the exhibition building will be the main attractions for the evening. Three outside organizations, including Perry's Peerless Band of thirty pieces, Moncton, have been engaged for the big celebration.

Vote FOR Prohibition Saturday, July 10th

ELECTION INFORMATION

The Act in Brief
The present Prohibition Act legislates against the sale of intoxicating liquors for beverage purposes, and only allows it for manufacturing, sacramental and medicinal purposes. The Act also provides for enforcement of the law and penalties for violation.

Further Legislation Depends on You
Application has already been made by the Temperance people to have the Act amended in regard to recognized weaknesses and the Government is sympathetic—BUT NOTE THIS—the Government put off the granting of these improvements to make the Act more effective, until the result of this election PROVES that the people want Prohibition, and by the majority of the vote the Government will know just how badly the electors do want it.

Are You Aware of This?
In 1919 an Act Passed the House, providing that the Government shall take over the entire liquor business within the Province, for the three purposes contained in the Act, and also giving them more stringent control over the sale of extracts, essences and tinctures—BUT Hark You, the Government has refused to take action on this amendment, until the voice of the people has been heard at the coming election.

Stop Importation Our Next Move
Authority to Prevent the Importation of Liquor into the Province does not rest with the Provincial, but with our Dominion Government, which has already stated that a vote may be taken on the question in New Brunswick, on the recommendation of the Legislature. If the result at the coming election satisfies them that the people actually want Prohibition—we are sure to get it.

Your Vote
at this Election may have very important influence on the future action of the Government.

We Know Its Faults
The Act is weak in that it allows too much latitude in the case of doctors, druggists and vendors who have practically the dispensing of liquors within their own hands.

WHAT YOUR BALLOT CAN DO JULY 10th

FIRST—Provide the way for necessary Amendments to the Act that will make it really effective. SECOND—Show the Government that the people demand Prohibition, and want the laws enforced. THIRD—Hasten the election that can shut out the importation of liquor into the Province.

REMEMBER You are Voting for Prohibition as Against a Return to the Bars
