I have seen this occur with many of our most experienced ocators. When it happens they repeat a few vague generalizations until their thoughts come back to them and then they fall back again into their speech, their temporary wool gathering escapes detection, except by those whe watch them very closely. An inexperienced apeaker, instead of doing this, passes, gets confused and sits down in "Gate Receipts, \$51,000," is the brief bead-line to a departe about the three say, particular office bians for the adian for the adian for the adian for what has to for what has been supported by the say of th ABSTRACT EFFECTS. they let him lie have.
