MINARD'S LINIMENT USED BY
PHYSICIANS.

"Wheel" And Woe.

The mayor of the town, riding on his new bicycle, found himself at dusk a long way from his house, and needing water for his acetylene lamp. He rode on in momentary dread of the village constable, till at last he saw a labourer standing at the door of his cottage.

"I say, would you be kind enough to give me some water for my lamp?" he asked, dismounting.
"Water?" repeated the man. "I s'pose you mean oil?"
"No, I don't; I want water."
The labourer looked searchingly at the prosperous cyclist for a moment.
"Take my advice and get along 'ome," he said impressively. "You ought to be ashamed of yourself, at your age—and you the mayor, too."

Paid at Once.

Mr. Slowpay. "Let me see. Your face seems familiar. Yes, now I remember seeing your picture in a sporting paper. Ain't you 'Fishy Mike,' the prize-fighter?"
Caller: "That's me."
"Well, well! What business can you possibly have with me?"
"Well, sor, it's this way. Prize-fightin' is rather dull now, an' I'm tryin' ter earn a respectable livin'." See?"
"I am delighted to hear of your reformation."

"Yes, sor. You see, I'm now the bill collector for Long, Wait, and Co., an' I'm paid a commission on what I collect, an' on what I don't collect, too, if I bring back an ear, or piece of a nose, or somethin' ter show I did me best ter git the money."
"Um—yes; wait a moment and I'll give you a cheque."

Salvation Army Officers Arrive.

TO ATTEND CONGRESS.

Commissioner and Mrs. Sowton, accompanied by Lieut.-Col. Adby, arrived in town by to-day's express. A large crowd assembled at the station to bid the Commissioner and party welcome, the Army uniform figuring prominently. Col. and Mrs. Martin and Staff were there, also the life-saving guards in full uniform. The Commissioner and his wife are looking well after their somewhat arduous journey, and feel full of faith for a successful congress. Col. Adby still wears the sunny smile so well known to many in the city and is apparently delighted to be back again. Commissioner Sowton is a man of outstanding personality and an orator of no mean ability.

HIS CAREER.

Commissioner Sowton is a Londoner by birth and was converted to the Salvation Army at Brighton where he spent fifteen months as a soldier. In Sept. 1883, he entered the International Training College and received his first appointment as Lieut. to Bath in April, 1884. The Commissioner's first foreign appointment was Norway, to the command of which territory the General appointed him when the country had only been opened nine months. There he was united in marriage to Captain Shimmin, whom he learned to know in Scotland. Having made very considerable progress, Commissioner Sowton was next appointed to Sweden as Chief Secretary, first under Commissioner Rideout and then under Commissioner Oliphant. In Sweden Commissioner and Mrs. Sowton made themselves much loved by the people, and when the rapidly developed work among the Scandinavians in the United States of America made it necessary to appoint officers to take charge of the same Commissioner and Mrs. Sowton were chosen by the General for that position. Appointments to India, and Ceylon followed, then a term in Canada, East and West, in the former as Chief Secretary, and the latter as Territorial Commander. Then back to Sweden from where he received the present appointment as Territorial Leader for Canada East and Newfoundland.

PROGRAMME OF CONGRESS.

To-night there will be a meeting for officers, local officers and soldiers in the No. 1 Citadel, New Gower St., the three city Corps uniting. Sunday morning there will be a monster parade of all the city Salvationists and visiting officers. Starting from the Citadel, New Gower Street, the procession will proceed via Hamilton St., Le Marchant Rd., Long's Hill, Theatre Hill and New Gower Street, back to the Citadel, where a united Holiness Meeting will be conducted by the Commissioner. At 3 p.m. a public reception will be given the Commissioner in the Majestic Theatre, presided over by his Honor Mayor Cook, supported by a number of prominent citizens. At 7 p.m. the Commissioner will preach in New Gower Street Citadel.

Our Dumb Animals.

REPORT OF THE CHIEF AGENT OF S.P.A. FOR WEEK ENDING AUG. 12.

Attended 2 sales of cattle, sheep, and horses, at New's Wharf, saw that they were well treated. Received a phone message from Sup. O'Neill on Saturday night to go to the South Side and see about a dog that was lying by the side of the road. Investigated the matter and found nothing seriously wrong. Sent in three horses for treatment for sores. Warned drivers not to take them out again, until cured. Received word from the police to shoot a dog suffering from mange near Mundy's Pond. Also humanely destroyed a collie dog, which had its fore paws cut off in a mowing machine. The animal was owned by Mr. Duder. Destroyed a diseased dog on Carnell Street, also another in the West End, which had been scalped. Received report of a dog having been put in a small bag and thrown in a gully behind the Girls' Industrial Home. There was not water enough to drown the dog, and it was taken out by some men in the morning. Investigated and found that the man who had put it there thought the water was deep enough to drown it. The animal in question had been an annoyance to the neighbourhood. Received report of a horse on the Cove Road, on pasture, with a very bad hoof. Found the owner, who wants another chance to cure it, as the animal cost him over \$200. Waiting the decision of the Veterinary Surgeon.

Attended to the shipping by rail of 21 horses owned by Chas. Lester, also three owned by Mr. Judge, and one by Mr. Ryan. Saw them all put aboard the train, after having been watered, and everything done for them.

A DANGEROUS DOG.—A terrier dog which may yet be the cause of serious injury to passers-by is kept by some person in the vicinity of Livingston Street. This morning the tradesman coming over Long's Hill to his work was attacked and bitten in the leg by this dog. The owner should keep it muzzled or have it shot.

TRUCKMAN COMPLAINS.—Mr. John Diamond, truckman, of the east end, complains of the bridge over the water place on the Logy Bay Road. Yesterday evening, he says, his horse got his legs entangled in the planking of this structure, and tore off two shoes.

Bus Traffic Should Be Regulated.

Editor Evening Telegram

Dear Sir.—I would like through your columns, to call the attention of Inspector General Hutchings to the condition which prevails at the bus terminals at Bowring Park and the Railway Station, on the arrival and departure of buses. The buses have hardly come to a standstill, when there is a mad rush to board them, without first giving time for the inward bound passengers to alight; the result is confusion, in which children are crushed or practically walked over, and women with children in arms do not get a chance to alight, or board the buses without risk of having the children knocked out of their arms, and themselves being injured. I myself, with an infant in arms, had to wait and watch whilst five buses unloaded and departed in this manner at the Park, on Wednesday evening, before I had an opportunity of getting aboard without too much risk to the infant. May I be pardoned for making a suggestion: "That the police be empowered to insist that people wanting to board the buses be made form a 'queue' or line, so no person be allowed on board until all passengers have alighted; also if any preference be given, let women with small children be seated first, without the risk of being pushed aside by so called 'men' in the mad scramble, which, up to now, occurs daily. Thanking you for space, I remain,

yours truly,

Aug. 12th, 1922.

PARENT.

McMurdo's Store News.

SATURDAY, AUGUST 12, 1922.

The Prophylactic Tooth Brush is so well known and so well liked that there is no particular need for us in this column to stress its many good qualities; but it is not so well known, we fancy, that the makers of the Prophylactic, manufacture a special Dental Plate Brush under their trade mark, which is on its own ground as noteworthy for excellence as the regular Prophylactic Brush itself. Simple in construction, but well adapted for its own purpose, strong both in bristles and in handles, it appears to be an ideal brush for cleaning artificial teeth, and as such we commend it to our customers. Price 70c.

Wedding Bells.

GOSSE—WADDEN.

A very pretty wedding took place on the 10th inst at St. Patrick's church by the Rev. Dr. Kitchen, when Mr. Charles Wadden and Miss Annie Goss were united in the Holy Bonds of matrimony. The bride looked charming in a dress of Georgette and was attended by her sister, Miss Mary Goss, while the groom was ably supported by Mr. James Gibbons. After the ceremony the happy couple motored with their friends around Bowring Park, afterwards to the home of the bride's parents, Mr. and Mrs. John Goss, Brazil's Square, where a reception was held and the health of the bride and groom duly honoured. Mr. and Mrs. Wadden will take up their future residence on Mundy Pond Rd.

The Last Resource.

The bazaar was in full swing when a young man strolled round the various stalls, with no intention of purchasing anything. As he passed a large, beautiful decorated stall the young lady seller detained him.

"Won't you buy a cigarette-holder?" she asked.

"No, thank you; I don't smoke," was the curt reply.

"Oh, a pen-wiper worked by my own hands?"

"I don't write."

"Then do have this nice box of chocolates."

"I don't eat sweets."

"The young lady's patience was exhausted."

"Sir," she said grimly, "will you buy this box of soap?"

The young man said up.

Poultry Wisdom.

An actress who had abandoned the footlights and sought the actor's oft-dreamed-of paradise, a little home in the country, decided to start a poultry farm, which she did with a barnyard hen and thirteen eggs. Not having the most elementary knowledge of poultry, she inquired of a neighbor how long eggs generally took to hatch. She received the reply: "Three weeks for chickens and four for ducks."

The neighbor met her some time afterwards, and on being asked how the poultry farming was going on, she replied: "Oh, I've finished with it. At the end of three weeks there were no chickens, so I let the hen off, as I didn't want ducks."

After Twenty Seven years

REV. R. E. LAITE VISITS LAND OF HIS BIRTH.

After an absence of twenty-seven years Rev. Robert E. Laite, Pastor of the Congregational Church of Bangor, Maine, is now visiting his native land, renewing old acquaintances and making a host of new friends. Before coming to the city he spent ten days at Bay Roberts, the native town of many of the parishioners through whose kindness he is enabled to make this trip. Mr. Laite speaks highly of the hospitality afforded him, and is charmed with all that he has seen. The progress made by the country along material and spiritual paths, the absence of religious bigotry, the broadmindedness of the people make a strong appeal to him. After a few days in town the reverend gentleman intends to spend some time in his native town of Trinity, where he first saw the light about forty years ago. Many of the older generation will remember the father of Mr. Laite, who was William Laite, a famous ship-builer of his day. Rev. Laite has four brothers, all in the ministry. One labors in Somerville, Mass., another in Cornish, Maine, another in Lowell, Mass., while another is now studying at the North West University, Chicago. This is a proud record for a family, to say that five of its sons have been given to the noblest of callings—the Pastorate of souls. It argues wonderfully for the high resolves, the spirited determination which is in them, to say that they succeeded whilst earning a living for themselves in giving themselves an education fitting them for their high calling. The Telegram wishes the reverend gentleman a most pleasant vacation in his native land. Mr. Laite is staying at Mrs. Mugford's, 172 Pleasant St., City.

Too Flighty.

"I tell you what," said Mrs. Umson, "it won't be long before women are in many of the public offices."

"Well," said Umson, in reply, "I don't care so much what they do as long as they keep out of the weather department."

"Why should they keep out of the weather department?"

"The weather is changeable enough now,"—Youngstown Telegram.

Dog's Hotel Bedroom.

AMERICANS AND THEIR PETS. Hotels in London are perplexed to know what to do with the pets brought by American visitors.

They include dogs, cats, and rabbits. A kangaroo was brought into a Strand hotel with instructions that it was to have plenty of milk and as much food as it wanted.

A woman took a room in the Savoy Hotel for a pet dog with a bed for the dog to sleep on.

A Printer's Blunder.

A Paris newspaper on one occasion made a blunder which excited no small amount of merriment at the expense of a man of real talent. The following paragraphs, intended to have been printed separately, were by some error so arranged that they were read consecutively: "Dr. X. has been appointed head physician to the Hospital de la Charite. Orders have been issued by the authorities for the immediate extension of the cemetery of Mont Parnasse. The works are being executed with the utmost despatch."

Esperanto As "Red" Danger.

A stir has been caused in France by a circular issued by M. Berard, Minister of Education, to the heads of all French universities, academies, and colleges, calling on them not to help in any way in the teaching of Esperanto on the ground that Bolsheviks use it as one of their dangerous forms of propaganda.

Till Crack of Doom.

It was the first match of the season, and the Splurge-furrow stonewallers were at the wickets. They had been at the wickets, indeed, for three hours, and they had scored three runs. The umpire was yawning, the spectators were whistling the "Dead March in Saul."

The bowlers bowled slow full-tosses, slow long-hops. All to no purpose. The Splurge-furrow stonewallers would not be tempted.

At last one of them made a stroke which very nearly resulted in a run. Then the local wit woke up.

"Don't lost your 'ead, Bill—don't lose your 'ead," he cried, in a hoarse voice. "If you git so bloom'n' reckless we shall 'ave ter wake the score!"

MINARD'S LINIMENT USED BY VETERINARIES.

TO-DAY'S MESSAGES.

POST OFFICE RECAPTURED.

LONDON, Aug. 11. A late telephone message received by the Exchange telegraphs said National Troops had recaptured Dublin post office. Some instruments in the building were damaged.

FIVE KILLED, FOUR INJURED.

S.S. ADRIATIC, OFF NEW ENGLAND, Aug. 11.—An explosion occurred to-day aboard S.S. Adriatic on a reserve coal hatch, which killed five members of the crew and injured four others. The explosion took place at 1.30 a.m. caused by spontaneous combustion.

ACCEPTED HARDING'S PROPOSAL.

NEW YORK, Aug. 11.

Executive heads of one hundred and forty-eight American railways, tonight, conditionally accepted President Harding's second proposal for a settlement of the nation wide rail strike. The conditions, which went into acceptance, according to unofficial sources were: First, that President's request that strikers be taken back be interpreted, that as many strikers should be rehired as would be needed by the roads to bring their shop forces to normal. Second, that such strikers should be taken back unconditionally, and that a Railroad Labor Board, later, should determine whether they were to regain their seniority privileges.

CUNARD SETS NEW RECORD.

NEW YORK, Aug. 12.

A new record for a voyage from Cherbourg to New York was set by S.S. Mauretania arriving here yesterday in five days, nine hours, twenty minutes after leaving France. The previous record was ten minutes slower.

TRAINS STALLED.

LOS ANGELES, Aug. 12.

Twelve transcontinental trains on the Santa Fe railroad were stalled at points in the desert at noon on Friday, following refusal of trainmen to proceed. Approximately twenty-five hundred passengers are involved.

CAPTURED HUGE TURTLE.

BOSTON, Aug. 12.

The Gloucester schooner Gorilla nearly overturned, when the crew harpooned and fought a fifteen hundred pound turtle of the black diver type. It measured ten feet across from flipper to flipper and is of a species usually found in the Gulf of Mexico.

PERMISSION GRANTED.

WASHINGTON, Aug. 12.

It is officially announced from the White House that the Western Union Telegraph Company will probably be granted permission to temporarily open and operate a cable landed at Miami, Florida, to relieve congestion resulting from the seizure of Transatlantic stations by Irish irregulars.

DIED IN THE HOUR OF SUCCESS.

BELFAST, Aug. 12.

Arthur Griffith, President of Dail Eireann, died in Dublin on Saturday following an attack of influenza.

BECOMING MORE THREATENING.

CHICAGO, Aug. 12.

Strike of United States Rail Shop-crafts employees adopted a still more threatening aspect on Saturday, when the walkout entered upon its seventh week, and paralysis of rail transportation in various sections, particularly Middle and Far West is imminent as the Big Four Brotherhoods have abandoned work or called meetings, to consider quitting, in protest against armed guards on railway properties, and against handling defective equipment.

For the Poor.

Some minstrels recently started on a tour, and advertised in a town to give a performance "for the benefit of the poor. Tickets reduced to sixpence." The hall was crammed, and the next morning a committee for the poor called upon the treasurer of the concern for the amount the said benefit had netted. But the treasurer wouldn't part with a penny.

"I thought," said the chairman of the committee, "you advertised this concert for the benefit of the poor!"
"Well," replied the treasurer, "didn't we reduce the tickets to sixpence so that the poor could all come?"

Air Scouting for Fish.

AEROPLANES TO HELP HERRING FLEETS BY LOCATING LIKELY GROUNDS.

Following successful experiments by France and America of locating fish shoals by aeroplanes the Scottish Fish Board and the Air Ministry will inaugurate interesting experiments this week.

Three aeroplanes will operate off the Fife and Forfar coasts to carry information as to the locality of herring shoals to fishing fleets in port. The only doubt lies in the fact that Scottish waters are more opaque than those in which such observation has already proved successful.—Daily Mirror.
