arrington today: New York, Sept. 29. - Noon. - Th oney situation has now become nitely and directly the dominating actor in the stock market, Loans s factor in the stock market. Loans so far have been made at 5½ and 6 per cent. The market has been chilled, and there has been some liquidation. So far, however, the liquidation has no been heavy nor have the declines been serious. Commission houses as a rule are not extended. Speculation has been conducted to a large extent by rich people, who are confident that the country is now so prosperous that in the ing run very much higher prices will prevail. A temporary stringency in the will be nothing like a serious decline.
